The monograph constitutes an attempt to demonstrate how Cognitive Grammar (CG) can be employed in the foreign language classroom with a

view to aiding learners in better understanding the complexities of English grammar. Its theoretical part provides a brief overview of the main tenets of Cognitive Grammar as well as illustrating how the description of English tense and aspect can be approached from a traditional and a CG perspective. The empirical part reports the findings of an empirical study which aimed to compare the effects of instruction utilizing traditional pedagogic descriptions with those grounded in CG on the explicit and implicit knowledge of the Present Simple and Present Continuous Tenses. The book closes with the discussion of directions for further research when it comes to the application of CG to language pedagogy as well as some pedagogic implications

The present volume contains a selection of papers presented at the conference Cognitive Approaches to English, an international event organized to mark the 30th anniversary of English studies at the Faculty of Philosophy, Josip Juraj Strossmayer University, Osijek, which was held in Osijek on October 18 – 19, 2007. The participants were invited to discuss issues in cognitive accounts of English, ranging from fundamental to methodological to interdisciplinary and applied. The volume is accordingly divided into four parts. Part I, Motivation in grammar, deals with various phenomena in the grammar of English in the broadest sense of the term, all of which are shown to be motivated by metaphorical and/or metonymic operations. Part II, Constructing meaning (between grammar and lexicon), contains five chapters dealing with phenomena ranging from various peculiarities of form-meaning pairings (such as synonymy, polysemy, and figurative meanings) to concept formation. The four chapters that make up Part III are concerned with the phenomenon of

interlinguistic and intercultural variation in the use of metaphorical and metonymic processes. The volume is concluded by Part IV, the three papers of which attempt to reconsider some TEFL issues from a cognitive linguistic point of view.

 THE LACK of transfiguration in low-impact African academia with regards to cultivated and insensate academics is largely accountable for Africa ' s incapacity to reinvent, transform, and redeem the material condition of the African people. Although this project is essentially a tale of woe regarding the largely unresponsive African academia, it is also methodical in its orientation in a measure to divulge the sub rosa and hegemonic regimes which preclude objective rationality in African intellectualism. Transfiguration is a prerequisite to transformation. The conceptual idea is that responsiveness and transformation are essentially about the pursuit of relative gains. In Africa, transformation can only be achieved when African people start observing Africa through African lenses. This project is intended for researchers and students of Africa as they would be introduced to introspective intuition as a fundamental framework for societal remediation.

An Easy-to-Use Guide with Clear Rules, Real-World Examples, and Reproducible Quizzes BoD - Books on Demand
 This book presents the first detailed and comprehensive study of information highlighting in advanced learner language, echoing the increasing interest in questions of near-native competence in SLA research and contributing to the description of advanced interlanguages. It examines the production and comprehension of specific means of

information highlighting in English by native speakers and German learners of English as a foreign language, presenting triangulated experimental and learner corpus data as corroborating evidence. The study focuses on learners' use of discourse-pragmatically motivated variations of the basic word order such as inversion, preposing, and it- and wh-clefts, an underexplored field in SLA research to date. The book also provides a critical re-assessment of the study of pragmatics within SLA. It has largely been neglected to date that L2 pragmatic knowledge includes more than the sociopragmatic and pragmalinguistic abilities for understanding and performing speech acts. Thus, the book argues for an extension of the scope of inquiry in interlanguage pragmatics beyond the cross-cultural investigation of speech acts. It also discusses pedagogical implications for foreign language teaching and will be of interest to applied linguists and SLA researchers, language teachers and curriculum designers.

An essential guide to understanding autism - for autistic people and their families, friends and workmates. When Chanelle Moriah was diagnosed with autism at 21, life finally began to make sense. Hungry for information, Chanelle looked for a simple resource that could explain what autism is and how it can impact the different areas of an autistic person's life, but found that there was little written from the perspective of someone who is autistic. So Chanelle decided to create that missing resource. Chanelle discovered just how difficult it can be for autistic adults - particularly females or those assigned female at birth - to be diagnosed or even be assessed for autism. This is partly because there is very little understanding of the different ways autism can present itself. *I Am Autistic* is a tool for both diagnosed and undiagnosed autistics to explain or make sense of their experiences. It also offers non-autistic people the chance to learn more about autism from someone who is autistic. With clear sections describing the different aspects of autism, accompanied by

Chanelle's beautiful illustrations, and with space for readers to write down their thoughts, this book is designed to be personalised to the individual's experience. *I Am Autistic* helps people feel less alone in their autism and brings knowledge to an often-misunderstood condition.
