Advanced Natural Gas Engineering

Natural gas is a subcategory of petroleum which is naturally occurring complex mixture of hydrocarbons, with a minor amount of inorganic compounds.

Geologists and chemists agree that petroleum originates from plants and animal remains that accumulate on the sea floor along with the sediments that form sedimentary rocks.

Advanced Natural Gas Engineering - Knovel

Natural-gas processing is a complex industrial process designed to clean raw natural gas by separating impurities and various non-methane

hydrocarbons and fluids to produce what is known as pipeline quality dry natural gas. Natural-gas processing begins at the well head. The composition of the raw natural gas extracted from producing wells depends on the type, depth, and location of the underground deposit and the geology of the area. Oil and natural gas are often found together in the same ...
