### The Mary Frances First Aid Book: With Ready Reference List of Ordinary Accidents and Illnesses, and Approved Home Remedies Austin Macauley

One diver, after a seemingly brief period below the surface, discovers that his gas supply has run perilously low. Another, paralyzed, bobs helplessly on the surface, and when a poorly trained divemaster attempts rescue, things go from bad to worse. Two other divers, fascinated by the bountiful undersea life of the Caribbean, fail to notice that a powerful current is sweeping them rapidly away from their unattended boat. These are just a few of the true stories you'll find in Diver Down, most of them involving diver error and resulting in serious injury or death. Each of these tales is accompanied by an in-depth analysis of what went wrong and how you can recognize, avoid, and respond to similar underwater calamities. This unique survival guide explores the gamut of diving situations, including cave and wreck diving, deep-water dives, river and drift diving, decompression sickness, and much more. It shows you how to prevent tragic mishaps through: Inspection and maintenance of primary and secondary diving gear Learning and following established safety protocols Confirming the training and credentials of diving professionals Practicing emergency responses under real-world conditions

Scuba Confidential also gives you valuable insights on a vast range of topics such as what it is like to do a cave diving course, how to make sure you buy the right equipment, what to consider when choosing an instructor, things even the pros get wrong and where to find the best diving in the world. This is candid, no-nonsense practical advice from a professional who has been involved over the last three decades with virtually every aspect of the sport. Have you ever wondered? How to look as comfortable in the water as the professionals do? What it is like to dive inside shipwrecks? Which training courses are most worthwhile? If you would make a good technical diver? If you should be considering a rebreather? How you can improve your diving skills? How you can reduce your air consumption? Why diving accidents happen and how to prevent them? Whether you might sometimes actually be safer solo diving? How to dive deep safely? Or How muck diving can possibly be any fun? Scuba Confidential has the answers to these questions and many more.

### Lifeguarding Manual Houghton Mifflin Harcourt

Years after the Summer of Love, the promise of the psychoactive 1960s—that deeper self-awareness and greater harmony can be achieved through reality-bending substances and practices—is close to becoming a mainstream phenomenon. The signs are everywhere, from a renewed interest in the therapeutic effects of LSD to the popularity of ayahuasca trips and the annual spectacle of Burning Man. The Psychedelic Experience, created

by the prophetic shaman-professors Timothy Leary, Ralph Metzner, and Richard Alpert (Ram Dass), is a foundational text that serves as a model and a guide for all subsequent mind-expanding inquiries. Based on a unique interpretation of The Tibetan Book of the Dead, The Psychedelic Experience remains a vital testament to broadening spiritual consciousness through a combination of Tibetan meditation techniques and psychotropic substances. For a new generation seeking the trip of a lifetime, The Psychedelic Experience is the essential guidebook to getting there.

### Great Underwater Adventure Stories Human Kinetics

300 million powerpoint presentations are given daily, yet there is a disconnect between the amazing technology of powerpoint and a mediocre student learning experience. To unleash the full potential of powerpoint presentations, we must do a better job of creating presentations that fit the educational needs of students. Slides for Students does just that. Slides for Students is an open and honest discussion about powerpoint in the classroom. A need exists for thoughtfully designed and implemented classroom instruction that focuses on the learner rather than on the technology. This book was written to translate academic research findings into practical suggestions about powerpoint that educators can use. Divided into two parts, Slides for Students discusses the history of powerpoint, explores academic studies on the topic, and demonstrates how to design slides to best suit educational needs and engage with students to avoid the dreaded "death by powerpoint."

### Complete Wreck Diving DK

One Breath is a gripping and powerful exploration of the strange and fascinating sport of freediving, and of the tragic, untimely death of America's greatest freediver Competitive freediving—a sport built on diving as deep as possible on a single breath—tests the limits of human ability in the most hostile environment on earth. The unique and eclectic breed of individuals who freedive at the highest level regularly dive hundreds of feet below the ocean's surface, reaching such depths that their organs compress, light disappears, and one mistake could kill them. Even among freedivers, few have ever gone as deep as Nicholas Mevoli. A handsome young American with an unmatched talent for the sport, Nick

---

was among freediving 's brightest stars. He was also an extraordinary individual, one who rebelled against the vapid and commoditized society around him by relentlessly questing for something more meaningful and authentic, whatever the risks. So when Nick Mevoli arrived at Vertical Blue in 2013, the world 's premier freediving competition, he was widely expected to challenge records and continue his meteoric rise to stardom. Instead, before the end of that fateful competition Nick Mevoli had died, a victim of the sport that had made him a star, and the very future of free diving was called into question. With unparalleled access and masterfully crafted prose, *One Breath* tells his unforgettable story, and of the sport which shaped and ultimately destroyed him.

Advanced Open Water Diver Manual Citadel Press

SCUBA is a fun, relaxing, educational, interesting, and -- if approached properly -- safe activity, it is nonetheless a sport that has risks. SCUBA diving is in fact an extreme sport that can injure or even kill very quickly, and in some very nasty ways. What we are doing is entering an alien environment that is normally hostile to human life. We cannot breathe in water without some kind of mechanical assistance. These are facts and the details should be covered in every Open Water (OW) class. All too often in today's society, however, people do not want to take the time to properly prepare and get the education to safely take on new tasks. Some agencies appear to have responded to this by developing training programs that turn out high numbers of certified divers in shorter time frames, necessitating the reduction of time spent on what I consider to be some necessary basic skills. While this has resulted in great numbers of new divers entering the water, it has not resulted in many of those divers staying in the water. New divers are often given just enough training to enable them to dive in the most benign conditions under close supervision. Even then, there are still those who find out their initial training was just not adequate. It is at this point that they either make the decision to get more training or they leave the sport. The latter happens all too often. The former, when it does happen, does not always occur for the right reasons. Students should return to training to expand their diving and learn new skills; they should not have to return for new training just to be able to enjoy the sport safely. To require students to come back for basic information is something I find very troubling, and in some cases, has actually cost divers their lives. A lack of rescue instruction has resulted in a number of diver deaths when buddies did not know how to drop weights, support a diver at the surface, or even stay in contact with their buddy. This is another area frequently talked about, but all too often not actually put into practice. The concept of always diving with a buddy and just what that means in the "real world" is often given too little attention. Unfortunately, it is impossible to foresee every conceivable situation that can arise, but there are many basic issues that can be covered. The following chapters will hopefully address much of what is being overlooked or delayed in many programs as they exist today. It is my hope that this information also finds its way into the hands of those who have not yet begun the training process. I have included a chapter on how to select an instructor based on the quality of instruction and the content of the course. In some cases, these classes may cost more than the less comprehensive courses also available, but usually they do not. In fact, when you consider the additional skills and education gained from a more comprehensive course, you will find that you have received much more value for each dollar spent. In addition, you gain priceless benefits in the form of greater confidence, enjoyment, skills, and -- most importantly -- safety. Enjoy and dive safe
