Restorative dentistry will also fix structural problems to your teeth such as damaged or missing teeth. Restorative dentists use devices such as dentures, crowns, bridges, onlays, inlays and also dental implants to restore your teeth and their proper functioning.

But that 's where restorative dentistry ends.

Restorative Dentistry Esthetic Dentistry

From an esthetic/restorative perspective, biomimetics or biomimicry is the application of

methods and systems to artificially replace biologic elements in order to recreate optimal

oral health. Practicing interdisciplinary esthetic restorative dentistry enables dentists to

achieve biomimetic results with cosmetic dentistry.
