A hand-winding watch is one of the few instances in which the wearer can truly engage with their timepiece. No matter how you want to justify watch collecting as a hobby, there's no getting around how fundamentally passive it is. Find a watch, buy a watch, affix watch to the wrist, then look at it. That's it.

A barrel transfers the energy from the mainspring through a gear train to power the watch. The two main types of mechanical movements are manual and automatic. As its name suggests, a manual caliber requires the wearer to manually wind the external crown, which in turn winds the internal mainspring.
