The wristwatch is the only jewellery that most men will wear, although many would not want to call it that. A watch may be a practical device for the sole purpose of telling the time as accurately as possible, a complicated machine, a wearable design object, or a status symbol. Some watch wearers, like scuba divers or pilots, rely on their timepieces for safety and survival. Gene Stone's The Watch covers all these things and more. It ranges over the world of watches without prejudice, mixing the old with the new, and the expensive with the economical. It introduces the fifty major brands that any watch collector must be familiar with. Essential wisdom on buying, collecting, maintaining and wearing watches is provided. And an encyclopedic glossary offers a crash course in watch lore. Best of all are the more than 500 photographs of terrific watches, including remarkable details of dials and movements, and selected for their beauty and diversity from collections around the world. Be bold. Take on your project. This book will hold your hand every step of the way and guide you to success. YOU CAN DO IT.

Why does a Cuckoo Clock stop Working?
Most likely, it is because the works are dirty, need oiling, or most likely both. When the clock stops, think of it as "the oil light is on". It's a "cry for help". Without oil, the metal parts grind on each other, causing serious wear and damage.

Oil also attracts dust which can make the oil "gummy" and add drag to its operation until it can no longer overcome the friction.

If a clock is oiled regularly [every three to five years], chances are you will only ever need to reoil your clock.

If the clock is allowed to run until it stops, the only sure way to service it is to remove the works from its case, dismantle the parts, clean, service, and put the movement back together with fresh oil and correct adjustment.

This book will teach you how to do all this.

Covered: Regula, Baduf, Hubert Herr, Schatz, Rack & Snail, Count Wheel, Bellows and Weights, Movement ID, Cleaning and Oiling, Complete Step by Step Repair Procedure.
