An African Classical Age Oxford University Press
"This book tells the story of an African world that grew out of more than one thousand years of trans-Saharan trade linking the Mediterranean lands of North Africa with the internal Sudanic grasslands stretching from the Nile River to the Atlantic Ocean. It traces the early role of the Sahara, the globe's largest desert, as a divider that separated these two regions into very different worlds. During the heyday of camel caravan traffic--from the eighth-century CE Arab invasions of North Africa to the early-twentieth-century building of European colonial railroads that linked the Sudan with the Atlantic--the Sahara became one of the world's great commercial highways. The most enduring impact of this trade and the common cultural reference point of trans-Saharan Africa was Islam. This faith played various roles throughout the region, as a legal system for regulating trade, an inspiration for reformist religious-political movements, and a vehicle of literacy and cosmopolitan knowledge that inspired creativity--often of a very unorthodox kind--within the various ethno-linguistic communities of the region. From the mid-1400s, European voyages to the coast of West and Central Africa provided an alternative international trade route that marginalized trans-Saharan commerce in global terms but stimulated its accelerated local growth. Inland territorial conquest by France and Britain in the 1800s and early 1900s brought more serious disruptions. Trans-Saharan culture, however, not only adapted to these colonial and postcolonial changes but often thrived upon them to remain a living force well into the twenty-first century"--Provided by publisher.

Patrick Manning follows the multiple routes that brought Africans and people of African descent into contact with one another and with Europe, Asia, and the Americas. In joining these stories, he shows how the waters of the Atlantic Ocean, the Mediterranean Sea, and the Indian Ocean fueled dynamic interactions among black communities and cultures and how these patterns resembled those of a number of connected diasporas concurrently taking shaping across the globe. Manning begins in 1400 and traces the connections that enabled Africans to mutually identify and hold together as a global community. He tracks discourses on race, changes in economic circumstance, the evolving character of family life, and the growth of popular culture. He underscores the profound influence that the African diaspora had on world history and demonstrates the inextricable link between black migration and the rise of modernity. Inclusive and far-reaching, The African Diaspora proves that the advent of modernity cannot be fully understood without taking the African peoples and the African continent into account.

The Dawn of Everything Columbia University Press
This book explores Africa's involvement in the Atlantic world from the fifteenth century to the eighteenth century. It focuses especially on the causes and consequences of the slave trade, in Africa, in Europe, and in the New World. African institutions, political events, and economic structures shaped Africa's voluntary involvement in the Atlantic arena before 1680. Africa's economic and military strength gave African elites the capacity to determine how trade with Europe developed. Thornton examines the dynamics of colonization which made slaves so necessary to European colonizers, and he explains why African slaves were placed in roles of central significance. Estate structure and demography affected the capacity of slaves to form a self-sustaining society and behave as cultural actors, transferring and transforming African culture in the New World.

An Oral History as Told by Jon Stewart, the Correspondents, Staff and Guests UNESCO
This volume begins in the early centuries of the Common Era with the various groups of people who had settled in southern Africa. Stone Age foragers, farmers with iron technology, and pastoralists all interacted to create a complex society before Europeans arrived. In the seventeenth century, Dutch settlers developed a colonial society based on the menial labor of indigenous inhabitants of the Cape and slaves imported from the East Indies and other parts of Africa. British conquest in the early nineteenth century brought an end to slavery, as well as new forms of colonial domination, tension between the British and the original Dutch settlers, armed struggle between expanding European communities and Africans (including the highly militarized Zulu kingdom), and intensive missionary activity that transformed many African societies. The discovery of diamonds and gold in the late nineteenth century brought industrialization based on migrant labor, new clashes between British and Africaaners, the final conquest of African societies, and new European migrants. During the twentieth-century, despite further economic development, African communities were increasingly impoverished. New forms of racial domination lead to the implementation of apartheid in 1948 and heightened political organizing among both African and Africaaner

nationalists. The intensification of resistance in the 1970s and '80s coupled with drastic changes in the international balance of power brought an end to the apartheid state in 1994 and an intensified struggle to overcome apartheid's economic and political legacy by building a new nonracial society. The book emphasizes social and cultural history, focusing on people's interactions and identities according to race, class, gender, religion and ethnicity. It also addresses changes in literature (both oral and written), music, and the arts and draws on the extensive biographical and autobiographical literature to provide a personal focus for the discussion of major themes. While this emphasis reflects dominant trends in historical scholarship for the past two decades, it also includes recent material on environmental history and relationships between African Americans and South Africans. Where relevant, it highlights comparisons between South African and U.S. history.

Specialists in various aspects of African history and civilization contribute to an integrated portrait of internal and foreign influences on the course of Africa's development UNESCO General History of Africa, Vol. III, Abridged Edition UNC Press Books
There is a paradox about Africa: it remains a subject that attracts considerable attention yet rarely is there a full appreciation of its complexity. African historiography has typically consisted of writing Africa for Europe—instead of writing Africa for itself, as itself, from its own perspectives. The History of Africa redresses this by letting the perspectives of Africans themselves take center stage. Authoritative and comprehensive, this book provides a wide-ranging history of Africa from earliest prehistory to the present day—using the cultural, social, political, and economic lenses of Africa as instruments to illuminate the ordinary lives of Africans. The result is a fresh survey that includes a wealth of indigenous ideas, African concepts, and traditional outlooks that have escaped the writing of African history in the West. The new edition includes information on the Arab Spring, the rise of FrancAfrica, the presence of the Chinese in Africa, and the birth of South Sudan. The chapters go up to the present day, addressing US President Barack Obama's policies toward Africa. A new companion website provides students and scholars of Africa with access to a wealth of supporting resources for each chapter, including images, video and audio clips, and links to sites for further research. This straightforward, illustrated, and factual text allows the reader to access the major developments, personalities, and events on the African continent. This groundbreaking survey is an indispensable guide to African history.

The Real Story Africa in World HistoryFrom Prehistory to the Present
The World and a Very Small Place in Africa is a fascinating look at how contacts with the wider world have affected how people have lived in Niumi, a small and little-known region at the mouth of West Africa ' s Gambia River, for over a thousand years. Drawing on archives, oral traditions and published works, Donald

R. Wright connects world history with real people on a local level through an exploration of how global events have affected life in Niumi. Thoroughly revised and updated throughout, this new edition rests on recent thinking in globalization theory, reflects the latest historiography and has been extended to the present day through discussion of the final years of Gambian President Yahya Jammeh ’ s regime, the role of global forces in the events of the 2016 presidential elections and the changes that resulted from these elections. The book is supported throughout by photographs, maps and Perspectives boxes that present detailed information on such topics as Alex Haley ’ s Roots (part set in Niumi), why Gambians take the risky "back way" to reach Europe, or "Wiri-Wiri," the Senegalese soap that has Gambians ’ attention. Written in a clear and personal style and taking a critical yet sensitive approach, it remains an essential resource for students and scholars of African history, particularly those interested in the impact of globalization on the lives of real people.

The History of Africa Oxford University Press

In a vast and all-embracing study of Africa, from the origins of mankind to the AIDS epidemic, John Iliffe refocuses its history on the peopling of an environmentally hostile continent. Africans have been pioneers struggling against disease and nature, and their social, economic and political institutions have been designed to ensure their survival. In the context of medical progress and other twentieth-century innovations, however, the same institutions have bred the most rapid population growth the world has ever seen. Africans: The History of a Continent is thus a single story binding living Africans to their earliest human ancestors.
