By the time of his death in 1988, Romare Bearden was most widely celebrated for his large-scale public murals and collages, which were reproduced in such places as Time and Esquire to symbolize and evoke the black

experience in America. As Mary Schmidt Campbell shows us in this definitive, defining, and immersive biography, the relationship between art and race was central to his life and work -- a constant, driving creative tension. Bearden started as a cartoonist during his college years, but in the later 1930s turned to painting and became part of a community of artists supported by the WPA. As his reputation grew he perfected his skills, studying the European masters and analyzing and breaking down their techniques, finding new ways of applying them to the America he knew, one in which the struggle for civil rights became all-absorbing. By the time of the March on Washington in 1963, he had begun to experiment with the Projections, as he called his major collages, in which he tried to capture the full spectrum of the black experience, from the grind of daily life to broader visions and aspirations. Campbell's book offers a full and vibrant account of Bearden's life -- his years in Harlem (his studio was above the Apollo theater), to his travels and commissions, along with illuminating analysis of his work and artistic career. Campbell, who met Bearden

in the 1970s, was among the first to compile a catalogue of his works. An American Odyssey goes far beyond that, offering a living portrait of an artist and the impact he made upon the world he sought both to recreate and celebrate.

A 2018 CHOICE Outstanding Academic Title New scholarship provides insights into the archaeology and cultural history of African American life from a collection of sites in the Mid-Atlantic This groundbreaking volume explores the archaeology of African American life and cultures in the Upper Mid-Atlantic region, using sites dating from the eighteenth through the twentieth centuries. Sites in Delaware, Pennsylvania, New Jersey, and New York are all examined, highlighting the potential for historical archaeology to illuminate the often overlooked contributions and experiences of the region's free and enslaved African American settlers. *Archaeologies of African American Life in the Upper Mid-Atlantic* brings together cutting-edge scholarship from both

emerging and established scholars. Analyzing the research through sophisticated theoretical lenses and employing up-to-date methodologies, the essays reveal the diverse ways in which African Americans reacted to and resisted the challenges posed by life in a borderland between the North and South through the transition from slavery to freedom. In addition to extensive archival research, contributors synthesize the material finds of archaeological work in slave quarter sites, tenant farms, communities, and graveyards. Editors Michael J. Gall and Richard F. Veit have gathered new and nuanced perspectives on the important role free and enslaved African Americans played in the region's cultural history. This collection provides scholars of the Mid-Atlantic and Northeast regions, African American studies, material culture studies, religious studies, slavery, the African diaspora, and historical archaeologists with a well-balanced array of rural archaeological sites that represent cultural traditions and developments among African Americans in the region. Collectively, these sites illustrate African Americans' formation of fluid cultural and

racial identities, communities, religious traditions, and modes of navigating complex cultural landscapes in the region under harsh and disenfranchising circumstances. The African-American Odyssey, Volume 1 Prentice Hall

A decade before the American Civil War, James Churchwill Vaughan (1828-1893) set out to fulfill his formerly enslaved father's dying wish that he should leave America to start a new life in Africa. Over the next forty years, Vaughan was taken captive, fought in African wars, built and rebuilt a livelihood, and led a revolt against white racism, finally becoming a successful

merchant and the founder of a wealthy, educated, and politically active family. Tracing Vaughan's journey from South Carolina to Liberia to several parts of Yorubaland (present-day southwestern Nigeria), Lisa Lindsay documents this "free" man's struggle to find economic and political autonomy in an era when freedom was not clear and unhindered anywhere for people of African descent. In a tour de force of historical investigation on two continents, Lindsay tells a story of Vaughan's survival, prosperity, and activism against a seemingly endless series of obstacles. By following Vaughan's transatlantic journeys and comparing his experiences to those of his parents, contemporaries, and descendants in Nigeria and South Carolina, Lindsay reveals the expansive reach of slavery, the ambiguities of freedom, and the surprising ways that Africa, rather than America, offered new opportunities for people of African descent. **The African American Odyssey** Pearson College Division

The African-American Odyssey Pearson

Following the collapse of Reconstruction in 1877, African Americans organized a movement—distinct from the white Populist movement—in the South and parts of the Midwest for economic and political reform: Black Populism. Between 1886 and 1898, tens of thousands of black farmers, sharecroppers, and agrarian workers created their own organizations and tactics primarily under black leadership. As Black Populism grew as a regional force, it met fierce resistance from the Southern Democrats and constituent white planters and local merchants. African Americans carried out a wide range of activities in this

hostile environment. They established farming exchanges and cooperatives; raised money for schools; published newspapers; lobbied for better agrarian legislation; mounted boycotts against agricultural trusts and business monopolies; carried out strikes for better wages; protested the convict lease system, segregated coach boxes, and lynching; demanded black jurors in cases involving black defendants; promoted local political reforms and federal supervision of elections; and ran independent and fusion campaigns. Growing out of the networks established by black churches and fraternal organizations, Black Populism found further expression in the Colored Agricultural Wheels, the southern branch of the Knights of Labor, the Cooperative Workers of America, the Farmers Union, and the Colored Farmers Alliance. In the early 1890s African Americans, together with their white counterparts, launched the People's Party and ran fusion campaigns with the Republican Party. By the turn of the century, Black Populism had been crushed by relentless attack, hostile propaganda, and targeted assassinations of leaders and foot soldiers of the movement. The movement's legacy remains, though, as the largest independent black political movement until the rise of the modern civil rights movement.

This groundbreaking volume offers a fresh approach to conceptualizing the historical geography of North America by taking a thematic rather than a traditional regional perspective. Leading geographers, building on current scholarship in the field, explore five central themes. Part I explores the settling and resettling of the continent through the experiences of Native Americans, early European arrivals, and Africans. Part II examines nineteenth-century European immigrants, the reconfiguration of Native society, and the internal migration of African Americans. Part III considers human transformations of the natural landscape in carving out a transportation network, replumbing waterways, extracting timber and minerals, preserving wilderness, and protecting wildlife. Part IV focuses on human landscapes, blending discussions of the visible imprint of society and distinctive approaches to interpreting these features. The authors discuss survey systems, regional landscapes, and tourist and mythic landscapes as well as the role of race, gender, and photographic representation in shaping our understanding of past landscapes. Part V follows the urban impulse in an analysis of the development of the mercantile city,

nineteenth- and twentieth-century planning, and environmental justice. With its focus on human-environment interactions, the mobility of people, and growing urbanization, this thoughtful text will give students a uniquely geographical way to understand North American history.
