When prospectors set up camp on Cherry Creek in 1858, Denver emerged as a lightning rod for the extraordinary. Time has washed away so many unusual stories—from the dark days of nineteenth century Law and Order League lynchings and the KKK's later rise and fall to the heroism of suffragettes and the touching plight of the gypsies. Elizabeth Wallace knocks the dust off these details and introduces readers to characters like world heavyweight boxing champion Charles L. "Sonny" Liston, hit-man turned rodeo promoter Leland Varain, aka "Diamond Jack," and the city's daring wall dogs, whose hand-painted building advertisements are fading reminders of a bygone Denver.

Since 1976 newcomers and natives alike have learned about the rich history of the magnificent place they call home from *Colorado: A History of the Centennial State*. In this revised edition, co-authors

Carl Abbott, Stephen J. Leonard, and Thomas J. Noel incorporate more than a decade of new events, findings, and insights about Colorado in an accessible volume that general readers and students will enjoy. The fourth edition tells of conflicts, new alliances, and changing ways of life as Hispanic, European, and African American settlers flooded into a region that was already home to Native Americans. Providing balanced coverage of the entire state's history - from Grand Junction to Lamar and from Trinidad to Craig - the authors also reveal how Denver and its surrounding communities developed and gained influence. While continuing to elucidate the significant impact of mining, agriculture, manufacturing, and tourism on Colorado, this edition broadens its coverage. The authors expand their discussion of the twentieth century with several new chapters on the economy, politics, and cultural conflicts of recent years. In addition, they address changes in attitudes toward the natural environment as well as the contributions of women, Hispanics, African Americans, and Asian Americans to the state. Dozens of new

illustrations, updated statistics, and an extensive bibliography of the most recent research on Colorado history enhance this edition.

The idea of "The Green Book" is to give the Motorist and Tourist a Guide not only of the Hotels and Tourist Homes in all of the large cities, but other classifications that will be found useful wherever he may be. Also facts and information that the Negro Motorist can use and depend upon. There are thousands of places that the public doesn't know about and aren't listed. Perhaps you know of some? If so send in their names and addresses and the kind of business, so that we might pass it along to the rest of your fellow Motorists. You will find it handy on your travels, whether at home or in some other state, and is up to date. Each year we are compiling new lists as some of these places move, or go out of business and new business places are started giving added employment to

members of our race.

Nonfiction, Black Caucus of the American Library

Association In this insightful and eclectic history,

Adrian Miller delves into the influences,

ingredients, and innovations that make up the soul

food tradition. Focusing each chapter on the

culinary and social history of one dish--such as

fried chicken, chitlins, yams, greens, and "red

drinks--Miller uncovers how it got on the soul

food plate and what it means for African American

culture and identity. Miller argues that the story is

more complex and surprising than commonly

thought. Four centuries in the making, and fusing

European, Native American, and West African

cuisines, soul food--in all its fried, pork-infused,

and sugary glory--is but one aspect of African

American culinary heritage. Miller discusses how

soul food has become incorporated into American

culture and explores its connections to identity

politics, bad health raps, and healthier alternatives.

This refreshing look at one of America's most

celebrated, mythologized, and maligned cuisines is

enriched by spirited sidebars, photographs, and

James Beard award-winning author Adrian

Miller vividly tells the stories of the

African Americans who worked in the

presidential food service as chefs, personal

cooks, butlers, stewards, and servers for

every First Family since George and Martha

Washington. Miller brings together the

names and words of more than 150 black

men and women who played remarkable

roles in unforgettable events in the nation's

history. Daisy McAfee Bonner, for

example, FDR's cook at his Warm Springs

retreat, described the president's final day

on earth in 1945, when he was struck down

just as his lunchtime cheese souffle

emerged from the oven. Sorrowfully, but

with a cook's pride, she recalled, "He never

ate that souffle, but it never fell until the

minute he died." A treasury of information

about cooking techniques and equipment,

the book includes twenty recipes for which

black chefs were celebrated. From Samuel

Fraunces's "onions done in the Brazilian

way" for George Washington to Zephyr

Wright's popovers, beloved by LBJ's

family, Miller highlights African

Americans' contributions to our shared

American foodways. Surveying the labor of

enslaved people during the antebellum

period and the gradual opening of

employment after Emancipation, Miller

highlights how food-related work slowly

became professionalized and the important

part African Americans played in that

process. His chronicle of the daily table in

The Space Age began just as the struggle

for civil rights forced Americans to

confront the long and bitter legacy of

slavery, discrimination, and violence

against African Americans. Presidents John

F. Kennedy and Lyndon Johnson utilized

the space program as an agent for social

change, using federal equal employment

opportunity laws to open workplaces at

NASA and NASA contractors to African

Americans while creating thousands of

research and technology jobs in the Deep

South to ameliorate poverty. We Could Not

Fail tells the inspiring, largely unknown

story of how shooting for the stars helped

to overcome segregation on earth. Richard

Paul and Steven Moss profile ten pioneer

African American space workers whose

stories illustrate the role NASA and the

space program played in promoting civil rights. They recount how these technicians, mathematicians, engineers, and an astronaut candidate surmounted barriers to move, in some cases literally, from the cotton fields to the launching pad. The authors vividly describe what it was like to be the sole African American in a NASA work group and how these brave and determined men also helped to transform Southern society by integrating colleges, patenting new inventions, holding elective office, and reviving and governing defunct towns. Adding new names to the roster of civil rights heroes and a new chapter to the story of space exploration, *We Could Not Fail* demonstrates how African Americans broke the color barrier by competing successfully at the highest level of American intellectual and technological achievement.

Nestled between the Rocky Mountains to the west and the High Plains to the east, Denver, Colorado, is nicknamed the Mile High City because its official elevation is exactly one mile above sea level. Over the past ten years, it has also been one of the

country's fastest-growing metropolitan areas. In Denver's early days, its geographic proximity to the mineral-rich mountains attracted miners, and gold and silver booms and busts played a large role in its economic success. Today, its central location—between the west and east coasts and between major cities of the Midwest—makes it a key node for the distribution of goods and services as well as an optimal site for federal agencies and telecommunications companies. In *Metropolitan Denver*, Andrew R. Goetz and E. Eric Boschmann show how the city evolved from its origins as a mining town into a cosmopolitan metropolis. They chart the foundations of Denver's recent economic development—from mining and agriculture to energy, defense, and technology—and examine the challenges engendered by a postwar population explosion that led to increasing income inequality and rapid growth in the number of Latino residents. Highlighting the risks and rewards of regional collaboration in municipal governance, Goetz and Boschmann recount public works projects such as the construction of the Denver International Airport and explore the smart

growth movement that shifted development from postwar low-density, automobile-based, suburban and exurban sprawl to higher-density, mixed use, transit-oriented urban centers. Because of its proximity to the mountains and generally sunny weather, Denver has a reputation as a very active, outdoor-oriented city and a desirable place to live and work. *Metropolitan Denver* reveals the purposeful civic decisions made regarding tourism, downtown urban revitalization, and cultural-led economic development that make the city a destination.

The Future. The beautiful part about the colored race in America, is the future. As a mixed race we are undeveloped. We may become whatever we WILL to become. This race is a growing people. The future is veiled but it may reveal some strange things to the world. What opportunities there are for leadership! If there were only some ways to "squench" the fakers and arouse the dreamers! *The Colored Child Beautiful*. Every baby is beautiful to its mother. Every colored baby is generally, only cunning or cute to many of the white race who have their own ideal of baby beauty, which depends mainly upon a white

skin. A child should be taught to love and be proud of its race and to know the good points of the race.

First published in 1965, this is a unique text in the history of the American Civil Rights Movement. Robert Penn Warren interviewed a wide range of African American leaders, activists, and artists across the country, among them Martin Luther King, Malcom X, and James Baldwin. Sections from the transcripts of these interviews are combined with the author's reflections on the interviewees and the Civil Rights Movement as a whole to create a powerful oral history of this all-important struggle. A new introduction by David W. Blight places Warren's book in historical perspective. "In this new edition introduced by the eminent historian David Blight, *Who Speaks for the Negro?* reveals a provocative admixture of history's variance. Warren's book is a burden of the past from which we cannot escape. It summons us to awaken a more vital national heartbeat of reparations for an American dilemma."—Houston Baker, Vanderbilt University

By the 1870s, the word was out about Colorado. East coast and Midwest prospectors, European immigrants, and African Americans newly freed from slavery, rushed to Denver to find work and their fortune in silver and gold. Captured here in almost 200 vintage images is

the story of the African Americans who escaped the oppression and racism of the post Civil War South, and created a city within a city: the Five Points neighborhood of Denver. Named in 1881 for a bustling five-way intersection, the Five Points area became the commercial and social sector for African American churches, businesses, clubs, and homes, and the heart of Denver's black community. Showcased here are the photographs of once thriving Five Points businesses in the Welton Street business district, such as Otha Rice's Tap Room and Oven and the Rossonian Hotel, as well as the familiar faces of the Cosmopolitan Club, Madame CJ Walker, and Dr. Justina Ford, Denver's first African-American female doctor. **A Virginia Family's Rise from Slavery and a Legacy Forged a Mile High** Cambridge Scholars Publishing

An award-winning journalist's dramatic account of a shooting that shook a community to its core, with important implications for the future On the last evening of summer in 2013, five shots rang out in a part of northeast Denver known as the Holly. Long a destination for African American families fleeing the Jim Crow South, the area had become an "invisible city" within a historically white metropolis. While shootings there weren't uncommon, the identity of the shooter that night came as a shock. Terrance Roberts was a revered anti-gang activist. His attempts to bring peace to

his community had won the accolades of both his neighbors and the state's most important power brokers. Why had he just fired a gun? In *The Holly*, the award-winning Denver-based journalist Julian Rubinstein reconstructs the events that left a local gang member paralyzed and Roberts facing the possibility of life in prison. Much more than a crime story, *The Holly* is a multigenerational saga of race and politics that runs from the civil rights movement to Black Lives Matter. With a cast that includes billionaires, elected officials, cops, developers, and street kids, the book explores the porous boundaries between a city's elites and its most disadvantaged citizens. It also probes the fraught relationships between police, confidential informants, activists, gang members, and ex-gang members as they struggle to put their pasts behind them. In *The Holly*, we see how well-intentioned efforts to curb violence and improve neighborhoods can go badly awry, and we track the interactions of law enforcement with gang members who conceive of themselves as defenders of a neighborhood. When Roberts goes on trial, the city's fault lines are fully exposed. In a time of national reckoning over race, policing, and the uses and abuses of power, Rubinstein offers a dramatic and humane illumination of what's at stake.

Colorado Women is the first full-length chronicle of the lives, roles, and contributions of women in Colorado from prehistory through the modern day. A national leader in women's rights, Colorado was one of the first states to approve suffrage and the first to elect a woman to its legislature.

Nevertheless, only a small fraction of the literature on Colorado history is devoted to women and, of those, most focus on well-known individuals. The experiences of Colorado women differed greatly across economic, ethnic, and racial backgrounds. Marital status, religious affiliation, and sexual orientation colored their worlds and others' perceptions and expectations of them. Each chapter addresses the everyday lives of women in a certain period, placing them in historical context,

and is followed by vignettes on women's organizations and notable individuals of the time. Native American, Hispanic, African American, Asian and Anglo women's stories hail from across the state--from the Eastern Plains to the Front Range to the Western Slope--and in their telling a more complete history of Colorado emerges. *Colorado Women* makes a significant contribution to the discussion of women's presence in Colorado that will be of interest to historians, students, and the general reader interested in Colorado, women's and western history.
