Interpreting the German-Polish relationship  
according to a paradigm of 'synthesis' between  
nations, this book examines the process and  
socio-political effects of how conflict and  
contradiction between Germans and Poles gave  
rise to mentalities and behaviours that were  
'transnational'; representing the harmonization  
of the national dichotomy.

Peter Stark is the legendary white Bushman who writes about his experiences in the former German South West Africa.

*Fundamentals of Nanoparticles* William Andrew

*Fundamentals of Nanoparticles: Classifications, Synthesis Methods, Properties and Characterization* explores the nanoparticles and architecture of nanostructured materials being used today in a comprehensive, detailed manner. This book focuses primarily on the characterization, properties and synthesis of nanoscale materials, and is divided into three major parts. This is a valuable reference for materials scientists, and chemical and mechanical engineers working in R&D and academia, who want to learn more about how nanoparticles and nanomaterials are characterized and engineered. Part one covers nanoparticles formation, self-assembly in the architecture nanostructures, types and classifications of nanoparticles, and signature physical and chemical properties, toxicity and regulations. Part two presents different ways to form nanometer particles, including bottom-up and top-down approaches, the classical and

non-classical theories of nanoparticles formation and self-assembly, surface functionalization and other surface treatments to allow practical use. Part three covers characterization of nanoparticles and nanostructured materials, including the determination of size and shape, in addition to atomic and electronic structures and other important properties. Includes new physical and chemical techniques for the synthesis of nanoparticles and architecture nanostructures Features an in-depth treatment of nanoparticles and nanostructures, including their characterization and chemical and physical properties Explores the unusual properties of materials that are developed by modifying their shape and composition and by manipulating the arrangement of atoms and molecules Explains important techniques for the synthesis, fabrication and the characterization of complex nano-architectures

Financial statements give invaluable insights into the performance and future potential of a business. But they

do not evaluate the accounting results they reflect. This book offers practical insights into the essential information that financial statements reflect.

The French Refugees at the Cape  
Cambridge University Press

This beautifully written novel, by one of South Africa's most celebrated writers, has an almost hypnotic power that draws the reader into one woman's life. As a post-apartheid novel, *This Life* considers both the past and future of the Afrikaner people through four generations of one family. In an elegiac narrator's tone, there is also a sense of compulsion in the narrator's attempts to understand the past and achieve reconciliation in the present.

*This Life* is a powerful story partly of suffering and partly of reflection.

This is a concise and informal introductory book on the mathematical concepts that underpin computer graphics. The author, John Vince, makes the concepts easy to understand, enabling non-experts to come to terms with computer animation work. The book complements the author's other works in the series (Essential Computer Animation fast and Essential Virtual Reality fast) and is written in the same accessible and easy-to-read style. It is also a useful reference book for programmers working in the field of computer graphics, virtual reality,

computer animation, as well as students on digital media courses, and even mathematics courses.

The Blank Canvas Van Schaik

Since the 1970s West German historiography has been one of the main arenas of international comparative history. It has produced important empirical studies particularly in social history as well as methodological and theoretical reflections on comparative history. During the last twenty years however, this approach has felt pressure from two sources: cultural historical approaches, which stress microhistory and the construction of cultural transfer on the one hand, global history and transnational approaches with emphasis on connected history on the other. This volume introduces the reader to some of the major methodological debates and to recent empirical research of German historians, who do comparative and transnational work.
