“ A searing and emotionally gripping account of a young black girl growing up to become a strong black woman during the most difficult time of racial segregation. ” —Professor Charles Ogletree, Harvard Law School “ Provides important context for an important moment in America ’ s history. ” —Associated Press When fourteen-year-old Carlotta Walls walked up the stairs of Little Rock Central High School on September 25, 1957, she and eight other black students only wanted to make it to class. But the journey of the “ Little Rock Nine, ” as they came to be known, would lead the nation on an even longer and much more turbulent path, one that would challenge prevailing attitudes, break down barriers, and forever change the landscape of America. For Carlotta and the eight other children, simply getting through the door of this admired academic institution involved angry mobs, racist elected officials, and intervention by President Dwight D. Eisenhower, who was forced to send in the 101st Airborne to escort the Nine into the building. But entry was simply the first of many trials. Breaking her silence at last and sharing her story for the first time, Carlotta Walls has written an engrossing memoir that is a testament not only to the power of a single person to make a difference but also to the sacrifices made by families and communities that found themselves a part of history.

"At the end of the 20th century, and at the dawn of the 21st, the United Nations was tasked with the administration of justice in territories placed under its executive authority, an undertaking for which there was no established precedent or doctrine. Examining the UN's legal and judicial reform efforts in Kosovo and East Timor, this volume argues that rather than helping to establish a sustainable legal system, the UN's approach detracted from it, as it confused ends with means." --Publisher's description.

The popular New Yorker writer combines the style of Mary Roach with the on-the-ground food savvy of Anthony Bourdain. Dana Goodyear ’ s narrative debut is a highly entertaining, revelatory look into the raucous, strange, fascinatingly complex world of contemporary American food culture. At once an uproarious behind-the-scenes adventure and a serious attempt to understand the implications of an emergent new cuisine, it introduces a cast of compelling and unexpected characters—from Los Angeles Times critic Jonathan Gold, to a high-end Las Vegas purveyor of rare and exotic ingredients, to the traffickers and promoters of raw milk and other forbidden products, to the hottest chefs who rely on them—all of whom, along with today ’ s diners, are changing the face of American eating. Ultimately, Goodyear looks at what we eat, and tells us who we are. As she places all of this within a vivid historical and cultural framework, she shows how these gathering culinary trends may eventually shape the way all Americans dine. What emerges is a picture of America at a moment of transition, designing the future as it reimagines the past.

The subject of this volume is two-fold. First, it gathers typical polarization patterns occurring in nature. Second, it surveys the polarization-sensitive animals, the physiological mechanisms and biological functions of polarization sensitivity as well as the polarization-guided behaviour in animals. The monograph is prepared for biologists, physicists and meteorologists, especially for experts of atmospheric optics and animal vision, who wish to understand and reveal the message hidden in polarization patterns of the optical environment not directly accessible to the human visual system, but measurable by polarimetry and perceived by many animals. Our volume is an attempt to build a bridge between these two physical and biological fields. In Part I we introduce the reader to the elements of imaging polarimetry. This technique can be efficiently used, e. g. in atmospheric optics, remote sensing and biology. In Part II we deal with typical polarization patterns of the natural optical environment. Sunrise/sunset, clear skies, cloudy skies, moonshine and total solar eclipses all mean quite different illumination conditions, which also affect the spatial distribution and strength of celestial polarization. We present the polarization patterns of the sky and its unpolarized (neutral) points under sunlit, moonlit, clear, cloudy and eclipsed conditions as a function of solar elevation. The polarization pattern of a rainbow is also shown. That part of the spectrum is derived in which perception of skylight polarization is optimal under partly cloudy skies.

Rural movements have recently emerged to become some of the most important social forces in opposition to neoliberalism. From Brazil and Mexico to Zimbabwe and the Philippines, rural movements of diverse political character, but all sharing the same social basis of dispossessed peasants and unemployed workers, have used land occupations and other tactics to confront the neoliberal state. This volume brings together for the first time across three continents - Africa, Latin America and Asia - an intellectually consistent set of original investigations into this new generation of rural social movements. These country studies seek to identify their social composition, strategies, tactics, and ideologies; to assess their relations with other social actors, including political parties, urban social movements, and international aid agencies and other institutions; and to examine their most common tactic, the land occupation, its origins, pace and patterns, as well as the responses of governments and landowners. At a more fundamental level, this volume explores the ways in which two decades of neoliberal policy - including new land tenure arrangements intended to hasten the commodification of land, and new land uses linked to global markets -- have undermined the social reproduction of the rural labour force and created the conditions for popular resistance. The volume demonstrates the longer-term potential impact of these movements. In economic terms, they raise the possibility of tackling immiseration by means of the redistribution of land and the reorganisation of production on a more efficient and socially responsible basis. And in political terms, breaking the power of landowners and transnational capital with interests in land could ultimately open the way to an alternative pattern of capital accumulation and development.

Over the past 20 years European theatre underwent fundamental changes in terms of aesthetic focus, institutional structure and in its position in society. The impetus for these changes was provided by a new generation in the independent theatre scene. This book brings together studies on the state of independent theatre in different European countries, focusing on the fields of dance and performance, children and youth theatre, theatre and migration and post-migrant theatre.

Additionally, it includes essays on experimental musical theatre and different cultural policies for independent theatre scenes in a range of European countries.

The Tongue and Quill has been a valued Air Force resource for decades and many Airmen from our Total Force of uniformed and civilian members have contributed their talents to various editions over the years. This revision is built upon the foundation of governing directives and user's inputs from the unit level all the way up to Headquarters Air Force. A small team of Total Force Airmen from the Air University, the United States Air Force Academy, Headquarters Air Education and Training Command (AETC), the Air Force Reserve Command (AFRC), Air National Guard (ANG), and Headquarters Air Force compiled inputs from the field and rebuilt The Tongue and Quill to meet the needs of today's Airmen. The team put many hours into this effort over a span of almost two years to improve the content, relevance, and organization of material throughout this handbook. As the final files go to press it is the desire of The Tongue and Quill team to say thank you to every Airman who assisted in making this edition better; you have our sincere appreciation!

When acclaimed journalist Alan Deutschman came to the California wine country as the lucky house guest of very rich friends, he was surprised to discover a raging controversy. A civil war was being fought between the Napa Valley, which epitomized elitism, prestige and wealthy excess, and the neighboring Sonoma Valley, a rag-tag bohemian enclave so stubbornly backward that rambunctious chickens wandered freely through town. But the antics really began when new-money invaders began pushing out Sonoma's poets and painters to make way for luxury resorts and trophy houses that seemed a parody of opulence. A Tale of Two Valleys captures these stranger-than-fiction locales with the wit of a Tom Wolfe novel and uncorks the hilarious absurdities of life among the wine world's glitterati. Deutschman found that on the weekends the wine country was like a bunch of gracious hosts smiling upon their guests, but during the week the families feuded with each other and their neighbors like the Hatfields and McCoys. Napa was a comically exclusive club where the super-rich fought desperately to get in. Sonoma's colorful free spirits and iconoclasts were wary of their bohemia becoming the next playground for the rapacious elite. So, led by a former taxicab driver and wine-grape picker, a cheese merchant, and an artist who lived in a barn surrounded by wild peacocks, they formed a populist revolt to seize power and repel the rich invaders. Deutschman's cast of characters brims with eccentrics, egomaniacs, and a mysterious man in black who crashed the elegant Napa Valley Wine Auction before proceeding to pay a half-million dollars for a single bottle. What develops is nothing less than a battle for the good life, a clash between old and new, the struggle for the soul of one of America's last bits of paradise. A dishy glimpse behind the scenes of a West Coast wonderland, A Tale of Two Valleys makes for intoxicating reading.
