Le Tour de France Hachette India
Drawing on rich empirical material from elite French sport, this book offers a detailed history of how the concept of doping evolved from the twentieth to the twenty-first century. The first study to span the period from 1950 to 2010, it sheds new light on the extraordinary world of elite sport in France – a world governed by its own moral standards and defined by extreme expectations of physical performance and highly medicalised training regimes. Including exclusive insights from athletes and their doctors, it explains how the use of drugs became an integral part of training in elite French sport. Considering the complex and paradoxical moral arguments that frame this phenomenon, it explores the decades-long social and political process that resulted in the normalisation of this doping culture. Drawing on examples from cycling, athletics, weightlifting, wrestling and bodybuilding, this book compares doping practices in these sports and questions the effectiveness of anti-doping policies. This is fascinating reading for all those interested in the use of drugs in sports, the ethics and philosophy of sport, or sports history.

The essential guide to the Tour de France, Speed Read Tour de France will make you an instant expert on its history, its winners and rivalries, the tactics necessary to win it, and the technology of its bicycles. Le Tour has sometimes been called “chess on wheels” because of the complicated strategies used by the race’s 22 teams and 176 riders. This book—written by award-winning cycling journalist John Wilcockson, who has covered the Tour 45 times—will help you understand those tactics along with informing you about the race’s century-plus history, its famed winners and rivalries, and the technology that has gone into creating the modern racing bicycle and determining how today’s athletes train. Among the questions answered are: Who owns the Tour? How are the course’s 21 stages selected? What are the most famous mountain climbs? How is the overall winner determined? What is a peloton, a soigneur, or an echelon? How big are the prizes? What are time bonuses? Who was the first American to compete in the Tour, and who was the first one to win it? How fast do the racers go down mountain descents? What speeds can the riders reach in sprint finishes? Why are the teams known by the names of their sponsors and not their countries? What do the riders eat, and where do they sleep every night? What are all those motorcycles doing among the cyclists? How do the organizers deal with doping scandals? And is it true that, one year, the top four finishers were all disqualified? You will find the answers to all these questions, and many more, in this informative, beautifully illustrated, fun-to-read book: Speed Read Tour de France.

This book proposes a review of Long-Term Care insurance; this issue is addressed both from a global point of view (through a presentation of the risk of dependence associated with the aging of the population) and an actuarial point of view (with the presentation of existing insurance products and actuarial techniques for pricing and reserving). It proposes a cross-view of American and European experiences for this risk. This book is the first dedicated entirely to long-term care insurance and aims to provide a useful reference for all actuaries facing this issue. It is intended for both professionals and academics.

Find yourself confused, nodding along when a rouleur relates how le biscuit was effrit é (crumbled)? How today they ’ re feeling Angers (past caring)? Fear no more, for Boulting's Velosaurus will illuminate, enlighten and, frankly, mislead. In his Velosaurus, ITV Tour de France commentator and

cycling writer Ned Boulting provides the ultimate lexicon of nonsense terminology surrounding the esteemed Tour de France. Featuring essential vocabulary like Alpe (an Alp), panache (riding with doomed flamboyance, conscious of the need to renew one ’ s contract), moutarde (any race that ends, begins or passes through the city of Dijon) and maillot (a jumper, obviously), Boulting ’ s Velosaurus is the ideal companion to all things peloton for linguistically-challenged fans of non-automotive two-wheeled sport. Risk management practices are growing both in number and complexity in businesses, notably driven by new regulatory standards that

feature risk management at their core. Although large businesses are more likely to adopt a formal, holistic approach to risk management, the stakes are just as high for SMEs. Risk management in SMEs can contribute to a certain organizational, entrepreneurial and partnership dynamic which constitutes a real opportunity to evolve practices and improve performance. This book offers varied responses to this question by combining conceptual approaches, empirical illustrations and the associated managerial implications.

Nicolas Roche has a famous surname to all fans of cycling. The son of legendary Irish and World Champion Stephen Roche, Nicolas had to fight to make it as a professional and even harder to make his mark as his own man in this toughest of competitive sports. His rise up the ranks has been meteoric, with top 15 finishes in both the Tour de France and the Vuelta a España, but his attitude to his chosen profession has remained undimmed. Honest, eloquent and passionate about the cycling world, Nicolas gained acclaim and a devoted fan following for his Tour diaries serialised in the Irish Independent. Now a major contender for a podium finish in a grand tour, in the award-winning Inside the Peloton Nicolas tells in full the story of life as a professional cyclist and of the remarkable events that have brought him this far. From furious spats with teammates and exhilarating races against the world's best, this is a gripping cycling adventure and tale of a fiercely competitive sportsman.
