This book is a study of ancient views about 'moral luck'. It examines the

fundamental ethical problem that many of the valued constituents of a well-lived life are vulnerable to factors outside a person's control, and asks how this affects our appraisal of persons and their lives. The Greeks made a profound contribution to these questions, yet neither the problems nor the Greek views of them have received the attention they deserve. This book thus recovers a central dimension of Greek thought and addresses major issues in contemporary ethical theory. One of its most original aspects is its interrelated treatment of both literary and philosophical texts. The Fragility of Goodness has proven to be important reading for philosophers and classicists, and its non-technical style makes it accessible to any educated person interested in the difficult problems it tackles. This edition, first published in 2001, features a preface by Martha Nussbaum.

Amoral, cunning, ruthless, and instructive, this multi-million-copy New York Times bestseller is the definitive manual for anyone interested in gaining, observing, or defending against ultimate control – from the author of *The Laws of Human Nature*. In the book that *People* magazine proclaimed “beguiling” and “fascinating,” Robert Greene and Joost Elffers have distilled three thousand years of the history of power into 48 essential laws by drawing from the philosophies of Machiavelli, Sun Tzu, and Carl Von Clausewitz and also from the lives of figures ranging from Henry Kissinger to P.T. Barnum. Some laws teach the need for prudence (“Law 1: Never Outshine the Master”), others teach the value of confidence (“Law 28: Enter Action with Boldness”), and many recommend absolute self-preservation (“Law 15: Crush Your Enemy Totally”). Every law, though, has one thing in common: an interest in total domination. In a bold and arresting two-color package, *The 48 Laws of Power* is ideal whether your aim is conquest, self-defense, or simply to understand the rules of the game.

Identifying the Culprit: Assessing Eyewitness Identification makes the case that better data collection and research on eyewitness

identification, new law enforcement training protocols, standardized procedures for administering line-ups, and improvements in the handling of eyewitness identification in court can increase the chances that accurate identifications are made. This report explains the science that has emerged during the past 30 years on eyewitness identifications and identifies best practices in eyewitness procedures for the law enforcement community and in the presentation of eyewitness evidence in the courtroom. In order to continue the advancement of eyewitness identification research, the report recommends a focused research agenda.

The year 2017 saw a multitude of conferences and exhibitions devoted to the centenary of the Russian Revolutions, both in Russia and in other parts of the world. The commemoration of

this event would be incomplete without an exploration of its Northern dimension; in October 2017, UiT The Arctic University of Norway hosted the conference The Russian Revolutions of 1917: The Northern Impact and Beyond. Norway and Russia are both northern states, and the two countries have a common border in the High North. Some articles in this volume, based on the conference proceedings, investigate the impact of the Russian Revolution in Norway and Sweden, while others deal with the High North, e.g. the Revolution and Civil War in Northern Russia and the radicalization of the workers' movement of Northern Norway; some are also devoted to representations of the Russian Revolution at exhibitions and on the big screen.

The ascent of globalisation tells the sweeping historical drama of the development of globalisation, from the Second World War to the present day. The story is told through the richly detailed accounts of eighteen remarkable men and women, describing how these architects reshaped the modern world, for better or worse. Profiling their lives, ideas and struggles reveals fresh insights into the nature of globalisation. The book also examines their legacies, shedding new light on many of the problems the world faces today: the global financial crisis, the political and economic malaise afflicting Europe, the numerous failures of the United Nations, the unchecked power of corporations and the inability of governments to cooperate on critical issues such as climate change.

Since precious few architectural drawings and no theoretical treatises on architecture remain from the premodern Islamic world, the Timurid pattern scroll in the collection of the Topkapi Palace Museum Library is an exceedingly rich and valuable source of information. In the course of her in-depth analysis of this scroll dating from the late fifteenth or early sixteenth century, Gülru Necipoğlu throws new light on the conceptualization, recording, and transmission of architectural design in the Islamic world between the tenth and sixteenth centuries. Her text has particularly far-reaching implications for recent discussions on vision, subjectivity, and the semiotics of abstract representation. She also compares the Islamic understanding of geometry with that found in medieval Western art, making this book particularly

valuable for all historians and critics of architecture. The scroll, with its 114 individual geometric patterns for wall surfaces and vaulting, is reproduced entirely in color in this elegant, large-format volume. An extensive catalogue includes illustrations showing the underlying geometries (in the form of incised "dead" drawings) from which the individual patterns are generated. An essay by Mohammad al-Asad discusses the geometry of the muqarnas and demonstrates by means of CAD drawings how one of the scroll's patterns could be used to design a three-dimensional vault.

More children born today will survive to adulthood than at any time in history. It is now time to emphasize health and development in middle childhood and adolescence--developmental phases that are critical to health in adulthood and the next generation. *Child and Adolescent Health and Development* explores the benefits that accrue from sustained and targeted interventions across the first two decades of life. The volume outlines the investment case for effective, costed, and scalable interventions for low-resource settings, emphasizing the cross-sectoral role of education. This evidence base can guide policy makers in prioritizing actions to promote survival, health, cognition, and physical growth throughout childhood and adolescence.

Privatization has been on the right-wing agenda for years. Health care, schools, Social Security, public lands, the military, prisons—all are considered fair game. Through stories, analysis, impassioned argument—even song lyrics—Si Kahn and Elizabeth Minnich show that corporations are, by their very nature, unable to fulfill effectively what have traditionally been the responsibilities of government. They make a powerful case that the market is not the measure of all things, and that a vital public sector is an indispensable component of a healthy democracy.

'A landmark in the process of decolonizing imperial Western knowledge.' Walter Dignolo, Duke University To the colonized, the term 'research' is conflated with European colonialism; the ways in which academic research has been implicated in the throes of imperialism remains a painful memory. This essential volume explores intersections of imperialism and research - specifically, the ways in which imperialism is embedded in disciplines of knowledge and tradition as 'regimes of truth.' Concepts such as 'discovery' and 'claiming' are discussed and

an argument presented that the decolonization of research methods will help to reclaim control over indigenous ways of knowing and being. Now in its eagerly awaited second edition, this bestselling book has been substantially revised, with new case-studies and examples and important additions on new indigenous literature, the role of research in indigenous struggles for social justice, which brings this essential volume urgently up-to-date.
