A riveting, beautiful novel in verse by Australia's greatest contemporary poet, winner of the 1996 T. S. Eliot Prize. I never learned the old top ropes, I was always in steam. Less capstan, less climbing, more re-stowing cargo. Which could be hard and slow as farming- but to say Why this is Valparaiso! Or: I'm in Singapore and know my way about takes a long time to get stale .-from Book I, "The Middle Sea" When German-Australian sailor Friedrich "Fredy" Boettcher is shanghaied aboard a German Navy battleship at the outbreak of World War I, the sight of frenzied mobs burning Armenian women to death in Turkey causes him, through moral shock, to lose his sense of touch. This mysterious disability, which he knows he must hide, is both protection and curse, as he orbits the high horror and low humor of a catastrophic age. Told in a blue-collar English that regains freshness by eschewing the mind-set of literary language, Fredy's picaresque life-as, perhaps, the only Nordic Superman ever-is deep-dyed in layers of irony and attains a mind-inverting resolution.

Beating the Unbeatable Foe Imprint

First published in Germany in 1997 as 'Eine Kuh für Hillary: Die Subsistenzperspektive'. Provides an alternative to the current global free market industrial system, by calling for a new economics and politics based on a subsistence perspective. Explains subsistence as empowerment based on people's strength and cooperation. Analyses recent feminist politics and argues that the fight for equality

with men has failed to make an egalitarian society. Includes case studies from Africa, Latin America and Europe, references and an index. Mies is professor of sociology at the Fachhochschule, Cologne. Bennholdt-Thomsen is director of the institute of the theory and praxis of subsistence, Bielefeld, Germany.

The Strait Orbit
A groundbreaking history of Europe's "new lefts," from the antifascist 1920s to the anti-establishment 1960s In the 1960s, the radical youth of Western Europe's New Left rebelled against the democratic welfare state and their parents' antiquated politics of reform. It was not the first time an upstart leftist movement was built on the ruins of the old. This book traces the history of neoleftism from its antifascist roots in the first half of the twentieth century, to its postwar reconstruction in the 1950s, to its explosive reinvention by the 1960s counterculture. Terence Renaud demonstrates why the left in Europe underwent a series of internal revolts against the organizational forms of established parties and unions. He describes how small groups of militant youth such as New Beginning in Germany tried to sustain grassroots movements without reproducing the bureaucratic, hierarchical, and supposedly obsolete structures of Social Democracy and Communism. Neoleftist militants experimented with alternative modes of organization such as councils, assemblies, and action committees. However, Renaud reveals that these same militants, decades later, often came to defend the very institutions they had opposed in their youth. Providing vital historical perspective on the challenges confronting leftists today, this book tells the story of generations of antifascists, left socialists, and anti-authoritarians who tried to build radical democratic alternatives to capitalism and kindle hope in reactionary times.

A field-defining masterwork, this posthumous publication maps the evolution of the idea of the state from ancient Greece to today István Mészáros was one of the greatest political theorists of the twentieth century. Left unfinished at the time of his death, *Beyond Leviathan* is written on the magisterial scale of his previous book, *Beyond Capital*, and meant to complement that work. It focuses on the transcendence of the state, along with the transcendence of capital and alienated labor, while traversing the history of political theory from Plato to the present. Aristotle, More, Machiavelli, and Vico are only a few of the thinkers discussed in depth. The larger objective of this work is no less than to develop a full-edged critique of the state, in the Marxian tradition, and set against the critique of capital. Not only does it provide, for the first time, an all-embracing Marxian theory of the state, it gives new political meaning to the notion of "the withering away of the state." In his definitive, seminal work, Mészáros seeks to illuminate the political preconditions for a society of substantive equality and substantive democracy. *Nemesis Games* Cambridge University Press

A ground-breaking 2005 exploration of multinational corporations that differs from other books on the subject by offering the reader a totally global perspective of multinationals without portraying them simply as economic entities. Written by experts on various aspects of the history, development, cultural and social implications of the multinational corporation, the book paints a compelling and coherent picture of the way these businesses affect almost all areas of our existence. As we might expect, the multinational company is shown to play a major role in the globalization that is reshaping so much

of our lives.

Advisor of Leadership at Google and former vice president of leadership at LinkedIn claims that the biggest driver of motivation is the chance to serve a larger purpose beyond our careers and ourselves, rather than salary, benefits, bonuses, or other material incentives; companies that are able to successfully focus their people, their teams, and their culture around meaning outperform their competition. Fred Kofman's approach to leadership has little to do with the standard practices taught in business school and traditional books. Bringing together economics and business theory, communications and conflict resolution, family counseling and mindfulness mediation, Kofman argues in The Meaning Revolution that our most deep-seated, unspoken, and universal anxiety stems from our fear that our life is being wasted--that the end of life will overtake us when our song is still unsung. Material incentives--salary and

benefits--account for perhaps 15 percent of employees' motivation at work. The other 85 percent is driven by a need to belong, a feeling that what we do day in and day out makes a difference, that how we spend our time on earth serves a larger purpose beyond just ourselves. Kofman claims that transcendental leaders, wherever they are in the hierarchy, are able to put aside their self-interests and help others to feel connected with others on a team or in an organization on a great mission and part of an ennobling purpose. He argues that every organization involved in work that is nonviolent and non-addictive has what he calls an "immortality project" at its core. And the challenge for leaders is to identify and expand on that core, to inspire all stakeholders to take part. The Impossible, Patience Cato Institute

' . . . the more honourable animals have been allotted a more honourable soul. . . ' What is the nature of the soul? It is this question that Aristotle sought to answer in De Anima (On the Soul). In doing so he offers a psychological theory that encompasses not only human beings but all living beings. Its basic thesis, that the soul is the form of an organic body, sets it in sharp contrast with both Pre-Socratic physicalism and Platonic dualism. On the Soul contains Aristotle's definition of the soul, and his explanations of nutrition, perception, cognition, and animal self-motion. The general theory in De Anima is augmented in the shorter works of Parva Naturalia, which deal with perception, memory and recollection, sleep and dreams, longevity, life-cycles, and psycho-physiology. This new translation brings together all of Aristotle's extant and complementary psychological works, and adds as a supplement ancient testimony concerning his lost writings dealing with the soul. The introduction by Fred D. Miller, Jr. explains the central place of the soul in Aristotle's natural science, the unifying themes of his psychological theory, and his continuing relevance for modern philosophy and psychology.

By the time Joseph Stalin died in 1953, Communism was a rapidly spreading disease - one seemingly without a cure. Enter Dr. Frederick Schwarz, a "pathologist of Communism" who had already spent more than twenty years in the study of Communism's basic ideas. At Dr. Billy Graham's suggestion, Dr. Schwarz formed the United States Christian Anti-Communism Crusade (CACC). For the next four decades, the CACC was the steel spine of the American anti-Communist movement, helping to educate such great anti-Communist leaders as Ronald Reagan. Beating the Unbeatable Foe is Dr. Schwarz's first-hand account of his lifelong battle against Communism, his devotion to truth and freedom, and his vibrant Christian faith.

From a New York Times bestselling and Hugo award-winning author comes a modern masterwork of science fiction, introducing a captain, his crew, and a detective as they unravel a horrifying solar system wide conspiracy that begins with a single missing girl. Now a Prime Original series. Humanity has colonized the solar system—Mars, the Moon, the Asteroid Belt and beyond—but the stars are still out of our reach. Jim Holden is XO of an ice miner making runs from the rings of Saturn to the mining stations of the Belt. When he and his crew stumble upon a derelict ship, the Scopuli, they find themselves in possession of a secret they never wanted. A secret that someone is willing to kill for—and kill on a scale unfathomable to Jim and his crew. War is brewing in the system unless he can find out who left the ship and why. Detective Miller is looking for a girl. One girl in a system of billions, but her parents

have money and money talks. When the trail leads him to the Scopuli and rebel sympathizer Holden, he realizes that this girl may be the key to everything. Holden and Miller must thread the needle between the Earth government, the Outer Planet revolutionaries, and secretive corporations—and the odds are against them. But out in the Belt, the rules are different, and one small ship can change the fate of the universe. "Interplanetary adventure the way it ought to be written." —George R. R.
