is 10 years old and Nick is 30 years old. 60. Stanley is 8 years old and Phil is 32 years old. 54. Jason is 14 years old and Eric is 4 years old.

lwtech.edu

Age problems are all about labeling things in relationship to each other (your sister's age was written in terms of your age "a", etc.), and then writing a math sentence to express whatever "truth" was written in English. In this case, that "truth" was the fact that you were twice your sister's age 3 years ago.

Algebra word problems worksheet with answers

AGE PROBLEMS 1. A man is 3 times as old as his son. The sum of their ages is 48 years. How old is the son? 2. A man is 3 times as old as his son. Four years ago the sum of their ages was 60 years. How old is the son? Solution: Let x – son's age now Then $3x$ = father's age now Now form
