Food consumption patterns and practices are rapidly changing in Asia and the Pacific, and nowhere are these changes more striking than in urban areas. This book brings together scholars from anthropology, sociology, environmental studies, tourism, architecture and development studies to provide a comprehensive examination of food consumption trends in the cities of Asia and the Pacific, including household food consumption, eating out and food waste. The chapters cover different scales of analysis, from household research to national data, and combine different methodologies and approaches, from quantifiable data that show how much people consume to qualitative findings that reveal how and why consumption takes place in urban settings. Detailed case studies are included from China, India, Japan, Malaysia, Philippines, South Korea and Vietnam, as well as Hawai'i and Australia. The book makes a timely contribution to current debates on the challenges and opportunities for socially just and environmentally sound food consumption in urbanizing Asia and the Pacific. Critical Issues in Contemporary China: Unity, Stability and Development comprehensively examines key problems crucial to understanding modern-day China. Organized around three interrelated themes of unity, stability and development, each chapter explores distinct issues and debate their significance for China domestically and for Beijing's engagement with the wider world. While presenting contending explanatory approaches, contributors advance arguments to further critical discussion on selected topics. Main issues analysed include: political change military transformation legal reforms economic development energy security environmental degradation food security and safety demographic trends migration and urbanization labour unrest health and education social inequalities ethnic conflicts Hong Kong's integration cross-Strait relations. Given its thorough and up-to-date assessment of major political, social and economic challenges facing China, this fully
