The Imam and the Indian is an extensive compilation of Amitav Ghosh's non-fiction writings. Sporadically published between his novels, in magazines, journals, academic books and periodicals, these essays and articles trace the evolution of the ideas that shape his fiction. He explores the connections between past and present, events and memories, people, cultures and countries that have a shared history. Ghosh combines his historical and anthropological bent of mind with his skills of a novelist, to present a collection like no other.

What's It Like in Space? Penguin Books India

Atlas of Human Body: Central Nervous System and Vascularization is a multidisciplinary approach to the technical coverage of anatomical structures and relationships. It contains surface and 3D dissection images, native and colored cross sectional views made in different planes, MRI comparisons, demonstrations of cranial nerve origins, distribution of blood vessels by dissection, and systematic presentation of arterial distribution from the precapillary level, using the methyl metacrylate injection and subsequent tissue digestion method. Included throughout are late prenatal (fetal) and early postnatal images to contribute to a better understanding of structure/relationship specificity of differentiation at various developmental intervals (conduits, organs, somatic, or branchial derivatives). Each chapter features clinical correlations providing a unique perspective of side-by-side comparisons of dissection images, magnetic resonance imaging and computed tomography. Created after many years of professional and scientific cooperation between the authors and their parent institutions, this important resource will serve researchers, students, and doctors in their professional work. Contains over 700 color photos of ideal anatomical preparations and sections of each part of the body that have been prepared, recorded, and processed by the authors Covers existing gaps including developmental and prenatal periods, detailed vascular anatomy, and neuro anatomy Features a comprehensive alphabetical index of structures for ease of use Features a companion website which contains access to all images within the book

Magbook Indian Economy 2020 Routledge

Core Curriculum for Nephrology Nursing V&S Publishers

Offering students choices about their learning, says author Mike Anderson, is one of the most powerful ways teachers can boost student learning, motivation, and achievement. In his latest book, Anderson offers numerous examples of choice in action, ideas to try with different students, and a step-by-step process to help you plan and incorporate choice into your classroom. You'll explore * What effective student choice looks like in the classroom. * Why it's important to offer students choices. * How to create learning environments, set the right tone for learning, and teach specific skills that enable choice to work well. When students have more choices about their learning, they can find ways of learning that match their personal needs and be more engaged in their work, building skills and work habits that will serve them well in school and beyond. This teacher-friendly guide offers everything you need to help students who are bored, frustrated, or underperforming come alive to learning through the fundamental power of choice.

Learning to Choose, Choosing to Learn Penguin UK

What did the writer of Genesis mean by "the first day"? Is it a literal week or a series of time periods? If I believe that the earth is 4.5 billion years old, am I denying the authority of Scripture? In response to the continuing controversy over the interpretation of the creation narrative in Genesis, John Lennox proposes a succinct method of reading and interpreting the first chapters of Genesis without discounting either science or Scripture. With examples from history, a brief but thorough exploration of the major interpretations, and a look into the particular significance of the creation of human beings, Lennox suggests that Christians can heed modern scientific knowledge while staying faithful to the biblical narrative. He moves beyond a simple response to the controversy, insisting that Genesis teaches us far more about the God of Jesus Christ and about God's intention for creation than it does about the age of the earth. With this book, Lennox offers a careful yet accessible introduction to a scientifically-savvy, theologically-astute, and Scripturally faithful interpretation of Genesis.

First Published in 2000. Based on the real-life experiences of teachers and student teachers using action research for the first time, this introductory text demystifies the issues commonly faced by the novice researcher. In an accessible and user-friendly style, the author explains how: the principles of action research can be effectively applied; small scale classroom research can discover important cues to aid learning; to implement action research in different curricular areas, individually or in groups, and with children of different abilities; the whole endeavour can be structured to form an undergraduate or postgraduate thesis. This book, which is suitable for use in nursery, primary and secondary schools, will be invaluable to any education professional wishing to progress from observing what happens in the classroom, to actually explaining why.

Steve Jobs: Insanely Great Pearson UK

An Englishwoman named Lydia is living in a small, nondescript town somewhere in the American Midwest. She has a circle of friends: one owns a dress shop; another sells houses; another is a frenzied stay-at-home mother. Lydia works at an animal shelter and swims every morning. Her lover, who adores her, feels she won't let him know her. Who is she? Imagine if this woman was once one of the most famous living on our planet? A woman who captivated the entire world? A woman whose sudden death was mourned by millions. Who is she?

Master Mind Brain Teasers Hassell Street Press

Wisdom and inspiration from India's best-loved president My India: Ideas for the Future is a collection of excerpts from Dr A.P.J. Abdul Kalam's speeches in his post-presidency years. Drawn from Dr Kalam's addresses to parliaments, universities, schools and other institutions in India and abroad, they include his ideas on science, nation-building, poverty, compassion and self-confidence. Dr Kalam draws on the lives of stalwarts such as Marie Curie and Dr Vikram Sarabhai to encourage and inspire his young readers. Through these speeches, he shares many valuable lessons in humility, resilience and determination, and leads children to think, grow and evolve. A project very close to his heart, Dr Kalam's last book for children is a road map for every child to pursue their dreams, to be the best they can be, leading to the realization of a better India.
