A Zen poem is nothing other than an expression of the enlightened mind, a handful of simple words that disappear beneath the moment of insight to which it bears witness. Poetry has been an essential aid to Zen Buddhist practice from the dawn of Zen—and Zen has also had a profound influence on the secular poetry of the countries in which it has flourished. Here, two of America's most renowned poets and translators provide an overview of Zen poetry from China and Japan in all its rich variety, from the earliest days to the twentieth century. Included are works by Lao Tzu, Han Shan, Li Po, Dogen Kigen, Saigyō, Bashō, Chiao Jan, Yuan Mei, Ryōkan, and many others. Hamill and Seaton provide illuminating introductions to the Chinese and Japanese sections that set the poets and their work in historical and philosophical context. Short biographies of the poets are also included.

AIDS and the virus that causes it have challenged the world's scientists, health care systems, and public health policies as much or more than any medical problem in recorded history. Perhaps this is so because this particular infirmity constitutes more than a merely medical problem: it is enmeshed in psychological, social, cultural, political, and economic contexts. This book examines the need for pragmatic and research-based suggestions on how to address some important problems related to these contexts. Although much basic research in virology and immunology can be accomplished within the biomedical domain, biobehavioral disciplines such as behavioral medicine offer more opportunities for the comprehensive approach necessary to confront the AIDS/HIV problem. The editors of this groundbreaking volume suggest that the very nature of this constantly evolving problem encourages an approach to research and intervention/prevention efforts that emphasizes flexibility of response to changing knowledge, patterns of the pandemic, new treatments, and shifts in public opinion and behavior. A major triumph in dealing with this phenomenon would include a bridging of the gap between research and applied efforts, which has been the largest obstacle for progress to date. In this book, such previously uncharted territory is explored, opening a host of new possibilities for dealing with the very real threat of AIDS.

The Middle Ages were a period of tremendous cultural and scientific advancement in the Islamic Empire—ideas and inventions that shaped our world. Did you know that: • The numbers you use every day (Arabic numerals!) are a Muslim invention? • The marching band you hear at football games has its roots in the Middle East? • You are drinking orange juice at breakfast today thanks to Islamic farming innovations? • The modern city's skyline was made possible by Islamic architecture? The Muslim world has often been a bridge between East and West, but many of Islam's crucial innovations are hidden within the folds of history. In this important book, Bryn Barnard uses short, engaging text and gorgeous full-color artwork to bring Islam's contributions gloriously to life. Chockful of information and pictures, and eminently browsable, *The Genius of Islam* is the definitive guide to a fascinating topic.

This work is the first monograph devoted solely to *Bombax ceiba*, popularly known as the Red Silk Cotton Tree. Consisting of seven chapters, it covers all relevant aspects of this plant, from its historical and spiritual importance, to its botanical characterization, pharmacognostical details and ethnobiological uses, to its scientific validation in various animal and human studies. Each part of the tree is of medicinal value and possesses many novel chemical constituents such as shamimicin, bombasin, bombamalone, bombamaloside etc. along with other bioactive secondary metabolites. The book presents the chemical structures of the most important constituents and highlights various pharmacological activities, predominantly antioxidant, anti-inflammatory, anti-mutagenic, hypoglycemic, hypotensive, hepatoprotective and fibrinolytic, which may prove to be a source for the development of a novel phyto-pharmaceutical agent to treat diabetes, heart disease and cancer. In addition, separate chapters deal with the commercial and ecological significance of *B. ceiba*, as well as a case study on its conservation. Numerous color illustrations are included to identify the plant and to justify its nickname, the "Little Bird's Cafeteria".

The Complete and Balanced Muscle-Toning Program for Renewed Vitality and a More Youthful Appearance Carole Maggio's Faceercise program has helped many thousands of women and men look younger and more vibrant without surgery, chemical peels, or Botox. Now, using the most advanced face technology, Carole has devised Ultimate Faceercise, a program that is even faster and more efficient than the original. By working the muscles with more intensity, using body posturing and precision movements, the results are even more dramatic. In just eight minutes, twice a day, you can open up your entire eye area, reduce puffiness and eliminate hollows, lift your eyebrows, define your cheeks, plump up your lips, turn up the corners of your mouth, smooth out lines, and firm your entire neck and jawline. Carole also gives advice on the most advanced (nonsurgical) beauty treatments and even describes how to get rid of the hard lumps left under the skin by collagen or fillers and how the Ultimate Faceercise program can help smooth out the effects of botched cosmetic surgery.

Difficulties in motor behavior are commonly associated with a variety of disabilities. Early research efforts focused on descriptions of specific groups of people or on evaluations of intervention programs. Only recently have investigators begun to explore questions from a variety of theoretical positions in an attempt to build a more fundamental understanding of the disabled person. The present volume represents views of major

methodological issues, current research fronts and selected applied concerns from the perspective of the disabled performer. Authors write from a number of theoretical viewpoints and sketch future research directions in these chapters.

Quantum Leadership: Transdisciplinary leadership in complex systems

Quantum Leadership: Building Better Partnerships for Sustainable Health, Fourth Edition skillfully prepares graduate students to thrive in a world of healthcare reform, complexity, and essential caring service. The Fourth Edition focuses on the current concepts of leadership, data, and research related to the complexities of leadership. The text also emphasizes the importance of principle-driven approaches and minimizes specific procedure-based solutions. This text is a seminal work around the complexity leadership as it applies to healthcare. There are very few other references that have the clarity, depth, and detail essential to enumerate this topic in healthcare organizations. It is especially valuable for graduate programs and DNP programs as it provides a foundation for contemporary leadership and emphasizes the characteristics necessary to lead complex organizations. The Fourth Edition features an additional chapter on the complexity of leadership in health care reform in an effort to incorporate the newest requirements of the Patient Protection Affordable Care Act in a manner that is relevant to leadership development and capacity. Case studies found within each chapter help reinforce translational work while new application exercises found in the "The Quantum Workbook" are an excellent supplement for learning. Additional updates to the text include: chapter podcasts, additional translational and learning material related to chapter case studies. Lastly, all references have been revised and updated to reflect the most current evidence around learning leadership.
