prices include VAT and Delivery.

Air Conditioner Installation | Appliances Direct

A BTU (British Thermal Unit) is a rating used to determine the heating or in the case of an Air Conditioner the cooling capacity of an appliance. Typically a minimum of 7000 BTU is needed to cool a small room, whereas commercial units can reach up to 25,000 BTU and beyond. Simply, the greater the BTU, the larger the space that the unit can cool.

Air Conditioner Installation
Costs Explained - Canstar
Blue

Some times called high wall
air conditioners, wall
mounted monoblock air
conditioning is a neat solution
to older buildings where
planning does not permit the
installation of an external
condenser unit. The wall
mounted monoblock air
conditioner attaches high on
the wall and two air pipes are
routed from the back directly
through the wall. The
disadvantage of these air
conditioners is that they are
slightly larger in-depth
compared to split wall
mounted unit as the
condenser is contained ...

Wall mounted air conditioners
are arguably the most popular
form of AC units in the UK,
used to eliminate warm air from
the room. This is due in part to

the recognition of the
affordability of these cooling
units as well as their flexibility in
aesthetic and positioning. The
units can be mounted on almost
any wall and are positioned at a
high level on the wall, ensuring
an unobtrusiveness that will
easily blend into the background
in most settings.
