Air pollution garners attention mostly for the harm it can cause to our bodies internally. For instance, there's considerable evidence linking lung cancer rates to air pollution. But some of the same particles we breathe in are also capable of harming our skin cells, like chemicals released by burning diesel or cigarette smoke. *Solutions Manual To Accompany Air Pollution Control (1986*

I like the detailed coverage of
critical control technologies and
its application to real-world
solutions. Students prefer the
textbook for its problem-solving
approaches and rigorous worked
examples." -- John Kuruvilla,
University of North Texas "One of
the best books in air pollution."
-- Shekar Viswanathan, San Diego
State University

What are the Steps in
Developing a Control Strategy?
Determine priority pollutants.
The pollutants of concern for a
specific location will be based
on the nature of the associated
health or environmental effects
and the severity of the air
quality problem in that area.
Identify measures to control
sources of pollution.
