Written for the automobile
restorer, automotive technician,
and locksmith, this manual
provides step-by-step instructions
on column service and ignition
replacement procedures for 1969
to 2000 domestic GM cars,
trucks, and vans. It includes 284
pages of detailed instructions that
are fully illustrated with large,
detailed photographs and line
art. Since the introduction of the
in-column ignition lock and
Saginaw column, GM has
produced a number of different
columns and ignition types; each
offering servicing challenges for
the automotive technician,
restorer, locksmith, and hobbyist.

This manual was written to
address these challenges, and
includes service instructions for
the following GM columns and
ignitions:• Saginaw standard and
tilt-columns• Saginaw tilt-
telescopic column• Standard and
Tilt Square columns,• MATS
column• Alpha Technologies

column Before servicing a column
or ignition, the automotive
technician's first concern is often
removing a steering wheel,

airbag, and hornpad.

Unfortunately, in is as many
columns as GM has produced,
there are an even greater number
of different types of steering
wheels, airbags, and hornpads. To
address this challenge, this manual
covers the various types of each,
along with detailed removal
procedures under the following
separate chapters:• Steering
Wheels• Airbags, and•

Hornpads In addition to various
columns and ignitions, GM has
also introduced several electronic
security systems that are often an
integral part of the ignition lock
and/or column. To properly
prepare the technician, a separate
chapter is dedicated to the
following GM electronic security
systems:• VATS (PASS-Key I
and PASS-Key II)• Passlock,
and• PASS-Key III Finally, a
Dangers & Warnings section
highlights some of the problem
areas related to column/ignition
service, including discussions
on:• Collapsing steering shaft•
Block tooth alignment• Rack and
sector problems• Shift park cable
adjustment• Delco-Loc radio
systems, and• Driveability
