ICAO Equipment Code Explanations

IATA aircraft type designators are trigram letter/digit codes used for aircraft models, like

"J41" (British Aerospace Jetstream 41) and "744" (Boeing 747-400). Country codes.

Digram letter codes are used for countries as specified in ISO 3166-1 alpha-2. One additional code is used:

International Air Transport Association code - Wikipedia

The ICAO aircraft type designator is a two-, three- or four-character alphanumeric code designating every aircraft type (and some sub-types) that may appear in flight planning. These codes are defined by ICAO, and published in ICAO 's

Aircraft Type Designators (Doc 8643). ICAO codes are used by air traffic control and airline operations in flight planning.
