Airguide Hygrometer 1950s - Analog Weather

This Airguide hygrometer probably
dates from the 1950s. It uses a
metal-paper sensor coil directly
connected to the indicator needle.
The coil consists of a salt-
impregnated paper strip attached
to a metal coil. As the paper
strip absorbs or releases moisture
it causes the metal coil to
wind/unwind, much like a
bimetallic thermometer coil.
