Throughout the mining and processing of minerals, the mined ore undergoes a number of crushing, grinding, cleaning, drying, and product sizing operations as it is processed into a marketable commodity. These operations are highly mechanized, and both individually and collectively these processes can generate large amounts of dust. If control technologies are inadequate, hazardous levels of respirable dust may be liberated into the work environment, potentially exposing workers. Accordingly, federal regulations are in place to limit the respirable dust exposure of mine workers. Engineering controls are implemented in mining operations in an effort to reduce dust generation and limit worker exposure.

A lively, unorthodox look at economics, business, and public policy told in the form of a novel. A love story that embraces the business and economic issues of the day? The Invisible Heart takes a provocative look at business, economics, and regulation through the eyes of Sam Gordon and Laura Silver, teachers at the exclusive Edwards School in Washington, D.C. Sam lives and breathes capitalism. He thinks that most government regulation is unnecessary or even harmful. He believes that success in business is a virtue. He believes that our humanity flourishes under economic freedom. Laura prefers Wordsworth to the Wall Street Journal. Where Sam sees victors, she sees victims. She wants the government to protect consumers and workers from the excesses of Sam's beloved marketplace. While Sam and Laura argue about how to make the world a better place, a parallel story unfolds across town. Erica Baldwin, the crusading head of a government watchdog agency, tries to bring Charles Krauss, a ruthless CEO, to justice. How are these two dramas connected? Why is Sam under threat of dismissal? Will Erica Baldwin find the evidence she needs? Can Laura love a man with an Adam Smith poster on his wall? The answers in The Invisible Heart give the reader a richer appreciation for how business and the marketplace transform our lives.

A teenage boy goes shopping on the Internet, sees something he likes, immediately reaches his mother via cell phone, and in a few short keystrokes, types in her credit card number and gets a shiny new lacrosse stick. Thanks to technological advances including computers, the Internet, cell phones, and satellites, today's children are faced with a world markedly more complex—and often distracting—than that of any other preceding generation. Generation Text examines why and how this phenomenon shapes children's values, attitudes, and behavior in a way that is fundamentally different from previous generations...and provides strategies for coping with the particular challenges of growing up in the new millennium. Parents who want to ensure that their children successfully develop key social skills, a healthy identity, and a strong work ethic need to make the right choices every step of the way. Clinical psychologist Dr. Michael Osit draws on his professional—as well as personal—experiences working with children and teens who have been challenged by unprecedented access to information, possessions, and temptation. Using case studies and examples, the book provides reasonable, down-to-earth strategies readers can use to address the unique issues faced by children surrounded by infinite choices...and very few limits.

This book is a comprehensive introduction to financial modeling that teaches advanced undergraduate and graduate students in finance and economics how to use R to analyze financial data and implement financial models. This text will show students how to obtain publicly available data, manipulate such data, implement the models, and generate typical output expected for a particular analysis. This text aims to overcome several common obstacles in teaching financial modeling. First, most texts do not provide students with enough information to allow them to implement models from start to finish. In this book, we walk through each step in

relatively more detail and show intermediate R output to help students make sure they are implementing the analyses correctly. Second, most books deal with sanitized or clean data that have been organized to suit a particular analysis. Consequently, many students do not know how to deal with real-world data or know how to apply simple data manipulation techniques to get the real-world data into a usable form. This book will expose students to the notion of data checking and make them aware of problems that exist when using real-world data. Third, most classes or texts use expensive commercial software or toolboxes. In this text, we use R to analyze financial data and implement models. R and the accompanying packages used in the text are freely available; therefore, any code or models we implement do not require any additional expenditure on the part of the student. Demonstrating rigorous techniques applied to real-world data, this text covers a wide spectrum of timely and practical issues in financial modeling, including return and risk measurement, portfolio management, options pricing, and fixed income analysis.

These "aluminum skinned, gleaming silver bullets" are currently enjoying a revival in popularity.

Praised for their clean lines and timeless aesthetic, movie stars and design buffs are snapping up these vintage beauties. Airstream's equal parts travelogue, cultural history, and biography of Wally Byam, Airstream's charismatic inventor celebrates the trailer's enduring appeal as an icon of simple, aerodynamic living. A dazzling array of images tell the story of how Byam, the father of modern trailer travel, created less a product than an entire culture. From the Eiffel Tower to the pyramids of Giza, from the Acropolis to the Golden Gate Bridge, Airstream caravans continue to travel to the far reaches of the earth. Amazing photographs from the Airstream archives document this metallic nomad's significant place in the history of design, from its streamlined origins to its current vogue. Airstream has always been synonymous with the freedom of the open road. Today the dream lives on.

In 2005, *The Woman at the Washington Zoo* was published to major critical acclaim. The late Marjorie Williams possessed "a special voice, one capable not just of canny political observations but of tenderness and bracing intimacy," observed the *New York Times Book Review*. Now, in a collection of profiles with the richness of short fiction, Williams limns the personalities that dominated politics and the media during the final years of the twentieth century. In these pages, Clark Clifford grieves "in his laborious baritone" a bank scandal's blow to his re-pu-taaaaaay-shun. Lee Atwater likens himself to Ulysses and pleads, "tah me to the mast!" Patricia Duff sheds "precipitous tears" over her divorce from Ronald Perelman, resembling afterwards "a garden refreshed by spring rain." Reputation illuminates our recent past through expertly drawn portraits of powerful - and messily human - figures.

HVAC Training 101 is a site visited by over 100,000 enthusiasts monthly, who are interested in becoming HVAC technicians. The site initially began as the passion project of a retired HVAC technician. The site quickly gained popularity, building a strong community of aspiring HVAC technicians. Currently, it is managed by a team of ex-HVAC technicians with decades of experience in the industry. Head over to HVACTraining101.Com to learn more. We began by writing about how to become certified as an HVAC technician. With rules and certifications varying for each state, it was a challenging task. We had a few friends in other states help us out, but for some states, we had to dig really deep to find the information needed. Our audience at the time was very happy with the information we provided. At this point, we started getting many questions about EPA 608 certification. Once you get the education and experience needed to become a technician, prospective employers will ask for certification to handle refrigerants. When we started writing about how to become certified, viewers again requested we write a study guide to help them prepare for the 608 exams. The study guides out there were dense and had much more information than was needed to pass the test. This inspired us to embark on a journey to write the simplest study guide for the EPA 608 exam, which would still cover all the necessary information. We hope we have achieved our intended objective. The journey to becoming an HVAC technician can be long and arduous. We congratulate you on taking this path and wish you the best in cracking the EPA 608 exam.

Vintage camper trailers are a unique symbol of midcentury America that resonates with many people. This book introduces many of those people, along with the trailers they've lovingly maintained or restored. It includes hundreds of photographs of everything from fancy and comfortable trailers designed for glamping (glamorous camping), to trailers handed down through families across generations, and even entrepreneurs who have transformed their trailers into vending booths. Paul Lacinola enjoys everything about vintage camper trailers, including rescuing, restoring, and rallying. In 2011, he began publishing the first U.S.-based magazine for collectors, restorers, and admirers of American-made camper trailers, *Vintage Camper Trailers*, which now has thousands of subscribers in more than a dozen different countries. He lives in Elverta, California.
