An illustrated manual designed to help community health workers learn how to use simple drugs to treat common illnesses. Specific to health conditions in Southeast Asian countries, the book uses simple explanatory texts and illustrations to communicate instructions for treating illnesses and knowing when a patient must be referred to a doctor. First issued in 1988 and revised in 1992, the book has been further expanded and updated in line with new knowledge and considerable experience with use of the previous editions. The manual has two parts. The first provides instructions for the correct and appropriate use of 34 essential drugs, ranging from aspirin and paracetamol, through chloroquine and oral re-hydration salts, to penicillin tetracycline eye ointment and several vitamins. Each is described according to a common framework that explains how the drug helps, when it should be used, how it is supplied and given to patients, side effects that may occur, and special precautions to follow. Where appropriate, information on dosage and prescribing schedule by age and weight is set out in tabular form. Part two provides advice for the management or referral of 22 common medical problems moving from anemia, cough, diarrhea, and ear and eye problems through HIV/AIDS, leprosy, malaria and tuberculosis, to poisoning, snakebites, wounds, burns, and shock. Advice on pain relief and on the management of skin and tooth problems is also provided.

First published in 1895, this book recounts the author's 1893 expedition to the Tafilet oasis in Morocco, one of the largest oases in the world. Previously largely inaccessible (before the invention of the motor car it was at least 10 days' journey south of Fez across the Atlas mountains and the Sahara), Harris took advantage of the Sultan of Morocco Mulai el Hassen's decision to pay a visit to the oasis during the autumn of that year. Throughout the book the author describes in great detail the places he visited and the people he met along the way. There are detailed descriptions of Marrakesh and the villages of the Atlas Mountains, as well as ruminations on the differences between the Arabs and the Berber tribes, and the situation of the Jews. Crossing the desert, Harris reached the Sultan's camp at the edge of the oasis, and there follows a detailed description of the activities of the Sultan and his retinue, their dealings with the troublesome tribes of the area, and accounts of the history, geography and people of Tafilet. The book concludes with the author's return journey to the north, and an account of the events following the Sultan's own return from the oasis and his subsequent death. Painting as it does a vivid picture of the state of Morocco at the very end of the 19th century, Walter B. Harris's Tafilet is sure to be of great interest to all those fascinated by the history of this unique and diverse North African country.

The Complete Book of Magic and Witchcraft Legare Street Press

Teachers have often felt unnecessarily apprehensive about teaching without music without being gifted musicians themselves. Music 7-11 dispels the myth that to teach music effectively a teacher has to "be musical" and provides teachers with the opportunity of developing both the basic subject knowledge and the confidence needed to deliver enjoyable and valuable music lessons. It does this by encouraging practical engagement with the subject through making and listening to music, reflecting on experiences and sharing views.

In 1884, Whistler and Sickert stayed in the remote Cornish fishing village of St Ives. From that time onwards it has been the inspiration and home of many notable painters. The 1985 exhibition at the Tate Gallery focused on the years 1939-64, the era of Wallis, Nicholson, Hepworth, Lanyon, Wynter, Leach, Heron, Frost and Gabo, to name but a few of the 28 artists represented. It reawakened an interest in St Ives which led to the founding of the Tate Gallery St Ives eight years later. The biographical notes, exhibition histories and bibliographies on each of the artists have been fully updated for the second edition.

Offers a comprehensive and practical reference guide to antenna design and engineering for portable devices Antennas are often the most bulky components in many portable wireless devices such as mobile phones. Whilst the demand for ever smaller and more powerful wireless devices increases, as does the importance of designing and engineering smaller antennas to fit these devices. Antennas for Portable Devices provides a complete and cutting-edge guide to the design and engineering of small antennas for portable electronic devices such as mobile phone handsets, laptop computers, RFID (radio frequency identification), microwave thermal therapies devices, wearable devices, and UWB (ultra-wideband) based consumer devices. The book addresses practical engineering issues that antenna professionals have to deal with. It explains the immediate demands for existing systems; discusses the antenna technology for the latest and emerging applications, and gives comprehensive coverage of hot topics in the wireless industry. Issues including design considerations, engineering design, measurement setup and methodology, and practical applications are all covered in depth. Antennas for Portable Devices: Covers antennas for all modern portable wireless devices from handsets, RFID tags, laptops, wearable sensors, UWB-based wireless USB dongles and handheld microwave treatment devices Explains how to design and engineer applications for miniaturization of antenna technology, utilising practical case studies to provide the reader with an understanding of systems and design skills Links the basic antenna theory, with design methodology, and engineering design Is amply illustrated with numerous figures and data tables of antenna designs to aid understanding Features contributions from industry and research experts in antenna technology and applications This invaluable resource will provide a comprehensive overview of miniaturizing antenna technology for antenna engineers in industry, and R&D organizations, graduate students, consultants, researchers, RF professionals, technical managers, as well as practitioners working in the area of

The Works of Robert G. Ingersoll: Lectures Alfred Music Publishing

A sui generis autobiography, as it is a rich life story, with many achievements and definite purposes. It is the first of 12 books that the author will incorporate into his Collection called Africa. A story that begins with a lot of faith and prayer, attributes that have accompanied the 62 years of life of Celso Salles, completed on May 28, 2021. In his thoughts that making history is better than accumulating fortunes, in the pages from this book you can read a summary of what those 62 laps around the sun have been like. There was still a lot to be contacted, which Celso Salles will naturally be putting in the other issues, so that he can transmit in printed format a large series of important information already available in digital format on most of the main platforms existing in the world.

"Artwriting is concerned with texts of recent art critics. The analysis draws on Arthur Danto's theory of interpretation and upon three connected conceptual points: the need to properly identify an artwork; the possibility of conflicting interpretations; and the use of rhetoric in interpretation." -- Overture.
