"The Puyuma people reside in southeastern Taiwan in Taitung City and Peinan Township in Taitung County. There are still fourteen extant Formosan (Austronesian) languages in Taiwan, but only thirteen indigenous groups are officially recognised by the Taiwanese government. The present study investigates the Nanwang dialect of the Puyuma language, spoken by the people in Nanwang and Paoshang Suburbs of Taitung City in

southern Taiwan. The aim of this grammar is to describe the phonology and morphosyntax of Puyuma. The work is descriptive in nature, and the theoretical framework employed is Basic Linguistic Theory (BLT). BLT emphasises the need to describe each language in its own terms, rather than imposing on it concepts derived from other languages. Thus, in this study, the author abandons traditional terms used by linguists studying Philippine-type languages, such as agent focus, patient focus, locative focus, or instrumental focus, and replaces them with the terms like transitive and intransitive that are more familiar to most of the worlds linguists."--Provided by publisher.

The National Puzzlers' League (NPL) was founded in 1883 and is the oldest puzzlers' organization in the world. For over 100 years, crosswords and other word puzzles that appear in the NPL's monthly magazine, The Enigma, could be enjoyed only by NPL members. Now, for the first time, a selection of the league's favorite cryptic crosswords is available in book form for puzzle fans everywhere to enjoy. Unlike regular crossword puzzles, each clue in a cryptic crossword has two parts--one that's straightforward and one that involves one or more types of

wordplay--and part of the fun is determining which part is which and what type of wordplay is involved. For example, Shoestring allowances lead to tears (11) is a cryptic clue for LACERATIONS. The straightforward part of the clue is tears, which is a definition for LACERATIONS. The wordplay part of the clue is Shoestring allowances which can be expressed as LACE + RATIONS which lead to LACERATIONS. The number in parentheses tells you the number and length of the answer words--in this case, it's one 11-letter word. Another example, with a different type of wordplay is Rearrange, rearrange ram's front (9) which is a cryptic clue for TRANSFORM. Rearrange is a straightforward definition of TRANSFORM and rearrange ram's front tells you to rearrange, or anagram, the nine letters in ram's front giving you the nine-letter word TRANSFORM. One of most fascinating things about cryptics is that the clues are a combination of tremendous creativity and imagination, on one hand, and strict, formal rules, on the other. This book contains 45 variety cryptics from members of the NPL, many of them by distinguished puzzle authors, as well as a foreword by Will Shortz, the New York Times crossword editor and the NPL's official historian [PuzzleMeter: Difficulty--Very Difficult; Style--Contemporary] *BeagleBone Robotic Projects* Packt Publishing Ltd This Second Edition contains key themes with all new contributors and is a completely separate work from the first. Emotion in Organization presents original work from leading scholars in the field, they engage with emotion

as a qualitative phenomenon which shapes and is shaped by organizational life. Examining how emotion cannot be simply separated from thinking, judgment, decision-making and other so-called rational organizational processes, the book challenges us to build a passionate theory of organizations. The introduction reviews the expansion of organizational emotion studies and their appeal to several social-scientific disciplines. Divided into four parts, the book reveals through stories, interview

With the alarming increase in cancer diagnoses and genetic illnesses, traditional drug agents and their delivery media need to be re-evaluated to address a quickly evolving field. With newer smart materials for the controlled release of macromolecules, peptides, genetic material, etc. further complications arise, such as material performance, synthesis, functionalization and targeting, biological identity, and biocompatibility. The book provides a comprehensive overview of the recent developments on 'smart' targeting and drug delivery systems with a

variety of carriers like nanoparticles, membranes, and hydrogels. It contains detailed descriptions on the recent trends in this field in the ongoing battle with catastrophic diseases like cancer. This field of research has been in its infancy and continues to face growth, and with it, further challenges and difficulties along the way toward maturity, which are accurately introduced in this book.

This book covers anaphora resolution for the English language from a linguistic and computational point of view. First, a definition of anaphors that applies to linguistics as well as information technology is given. On this foundation, all types of anaphors and their characteristics for English are outlined. To examine how frequent each type of anaphor is, a corpus of different hypertexts has been established and analysed with regard to anaphors. The most frequent type are non-finite clause

anaphors - a type which has never been investigated so far. Therefore, the potential of non-finite clause anaphors are further explored with respect to anaphora resolution. After presenting the fundamentals of computational anaphora resolution and its application in text retrieval, rules for resolving non-finite clause anaphors are established. Therefore, this book shows that a truly interdisciplinary approach can achieve results which would not have been possible otherwise. Open Access: In July 2019, this volume was retroactively turned into an Open Access publication thanks to the support of the Fachinformationsdienst Linguistik.

Aristoteles hat eine allgemeine, d.h. für Mensch und Tier gemeinsam konzipierte Theorie der Motivation: die Theorie der animalischen Ortsbewegung. Dieses Buch interpretiert die Theorie und analysiert ihre grundlegenden Begriffe. Im ersten, begriffsanalytisch gehaltenen Teil werden Aristoteles' Bestimmung der Lust/Leid-Empfindung, der Strebung und der drei Arten der Strebung behandelt. Im zweiten Teil folgt die zusammenhängende Interpretation der für die Theorie unmittelbar relevanten Texte. Dies sind De Anima III, Kapitel

9 bis 11, sowie die kleine Schrift De Motu Animalium (Kap. 6 bis 11). Im Resultat zeigt sich, dass Aristoteles' Motivationstheorie einen ganz eigenen Ansatz verfolgt, der, obgleich er stark auf den essentialistischen und hylemorphistischen Grundannahmen seiner Naturphilosophie aufbaut, interessante Perspektiven auf die Sachfragen bietet und die philosophische Debatte in der Handlungstheorie bereichern kann: Es ist gerade sein essentialistischer Naturbegriff, der es Aristoteles gestattet, dort zu überzeugenden Resultaten zu gelangen, wo die moderne Diskussion ins Stocken gekommen ist. Dies betrifft vor allem die Theorie der Strebung, die Psychophysik intentionaler Zustände und den Zusammenhang von Denken und Bewegung.

Capitalist Nigger is an explosive and jarring indictment of the black race. The book asserts that the Negroid race, as naturally endowed as any other, is culpably a non-productive

race, a consumer race that depends on other communities for its culture, its language, its feeding and its clothing. Despite enormous natural resources, blacks are economic slaves because they lack the 'devil-may-care' attitude and the 'killer instinct' of the Caucasian, as well as the spider web mentality of the Asian. A Capitalist Nigger must embody ruthlessness in pursuit of excellence in his drive towards achieving the goal of becoming an economic warrior. In putting forward the idea of the Capitalist Nigger, Chika Onyeani charts a road to success whereby black economic warriors employ the 'Spider Web Doctrine' – discipline, self-reliance, ruthlessness – to escape from their victim mentality. Born in Nigeria, Chika Onyeani is a journalist, editor and former diplomat.

Unlike many books about adult literacy, which focus on abstract concepts related to test scores, this volume develops an understanding of literacy through the engaging life stories of twelve adults from diverse backgrounds living in the United States.

In the process of coming to know these adults, we learn, contrary to commonly held assumptions and beliefs about literacy, that adults with limited literacy skills work hard and long, make limited use of public resources, can use technology when shown, and have pride and self-respect. In addition to all of the scientific information and policy implications yielded by this research study, this is foremost a compelling story of human struggle and survival. Readers will find themselves caring about these adults, feeling angry about their underemployment and their pain, and excited about their triumphs.

new laser materials such as OLED. It also contains new chapters on the applications of phosphors in solid state lighting, photoionization of luminescent centers in insulating phosphors, and recent developments in halide-based scintillators. The handbook provides a comprehensive description of phosphors with an emphasis on practical phosphors and their uses in various kinds of technological applications. It covers the fundamentals, namely the basic principles of luminescence, the principle phosphor materials, and their optical properties. The authors describe phosphors used in lamps, cathode-ray tubes, x-ray, and ionizing radiation detection. They cover common measurement methodology used to characterize phosphor properties, discuss a number of related items, and conclude with the history of phosphor technology and industry.

Classes of Labour: Work

and Life in a Central Indian Steel Town is a classic in the social sciences. The rigour and richness of the ethnographic data of this book and its analysis is matched only by its literary style. This magnum opus of 732 pages, an outcome of fieldwork covering twenty-one years, complete with diagrams and photographs, reads like an epic novel, difficult to put down.

Professor Jonathan Parry looks at a context in which the manual workforce is divided into distinct social classes, which have a clear sense of themselves as separate and interests that are sometimes opposed. The relationship between them may even be one of exploitation; and they are associated with different lifestyles and outlooks, kinship and marriage practices, and suicide patterns. A central concern is with the intersection between class, caste, gender and regional ethnicity, with how class trumps caste in most contexts and with how classes have become increasingly structured as the 'structuration' of castes has declined. The wider theoretical ambition is to specify the general conditions under which the so-called 'working class' has any realistic prospect of

unity.

"Oceanian ceramic cultures making earthenware pottery spread during the past 3500 years through a dozen major island groups spanning 6000 km of the tropical Pacific Ocean from western Micronesia to western Polynesia. Island potters mixed sand as temper into clay bodies during ceramic manufacture. The nature of island sands is governed by the geotectonics of hotspot chains, island arcs, subduction zones, backarc basins, and remnant arcs as well as by sedimentology. Because small islands with bedrock exposures of restricted character are virtual point sources of sand, many tempers are diagnostic of specific islands. Petrographic study of temper sands in thin section allows distinction between indigenous pottery and exotic pottery transported from elsewhere. Study of 2223 prehistoric Oceanian potsherds from 130 islands and island clusters indicates the nature of Oceanian temper types and documents 105 cases of interisland transport of ceramics over distances typically

Whether we're buying a pair of jeans, ordering a cup of coffee, selecting a long-distance carrier, applying to college, choosing a doctor, or setting up a 401(k), everyday decisions -- both big and small

---

-- have become increasingly complex due to the overwhelming abundance of choice with which we are presented. As Americans, we assume that more choice means better options and greater satisfaction. But beware of excessive choice: choice overload can make you question the decisions you make before you even make them, it can set you up for unrealistically high expectations, and it can make you blame yourself for any and all failures. In the long run, this can lead to decision-making paralysis, anxiety, and perpetual stress. And, in a culture that tells us that there is no excuse for falling short of perfection when your options are limitless, too much choice can lead to clinical depression. In *The Paradox of Choice*, Barry Schwartz explains at what point choice -- the hallmark of individual freedom and self-determination that we so cherish -- becomes detrimental to our psychological and emotional well-being. In accessible, engaging, and anecdotal prose, Schwartz shows how the dramatic explosion in choice -- from the mundane to the profound challenges of balancing career, family, and individual needs -- has paradoxically become a problem instead of a solution. Schwartz also shows how our obsession with choice encourages us to seek that which makes us feel worse. By synthesizing current research in the social sciences,

Schwartz makes the counter intuitive case that eliminating choices can greatly reduce the stress, anxiety, and busyness of our lives. He offers eleven practical steps on how to limit choices to a manageable number, have the discipline to focus on those that are important and ignore the rest, and ultimately derive greater satisfaction from the choices you have to make.

Publishing Company Exploring compliance from an anthropological perspective, this book offers a varied and international selection of chapters covering taxation, corporate governance, medicine, development, carbon offsetting, irregular migration and the building trade. Compliance emerges as more than the opposite of resistance: instead, it appears as a valuable heuristic approach for understanding collective life, as a means by which actors strive to accommodate themselves to others. This perspective transcends conventional distinctions between power and resistance, and offers to open up new avenues of anthropological enquiry.

Global Nomads provides a unique introduction to the globalization of countercultures, a topic largely unknown in and outside academia. Anthony D'Andrea examines the social life of mobile expatriates who live within a global circuit of countercultural practice in paradoxical paradises. Based on nomadic fieldwork across Spain and India, the study analyzes how and why these post-metropolitan subjects reject the homeland in order to shape an alternative lifestyle. They become artists, therapists, exotic traders and bohemian workers seeking to integrate labor, mobility and spirituality within a

cosmopolitan culture of expressive individualism. These countercultural formations, however, unfold under neo-liberal regimes that appropriate utopian spaces, practices and imaginaries as commodities for tourism, entertainment and media consumption. In order to understand the paradoxical globalization of countercultures, Global Nomads develops a dialogue between global and critical studies by introducing the concept of 'neo-nomadism' which seeks to overcome some of the shortcomings in studies of globalization. This book is an essential aide for undergraduate, postgraduate and research students of Sociology, Anthropology of Globalization, Cultural Studies and Tourism Studies.
