The prevailing discourse surrounding urban music education suggests the deficit-laden notion that urban school settings are "less than," rather than "different than," their counterparts. Through the lens of contextually-specific teaching, this book provides a counternarrative on urban music education that encourages urban music teachers to focus on the strengths of their students as their primary resource. Through a combination of research-based strategies and practical

suggestions from the author's own experience teaching music in urban settings, the book highlights important issues for teachers to consider, such as culturally relevant pedagogy, the "opportunity gap," race, ethnicity, socioeconomic status, musical content, curricular change, music program development, student motivation, and strategies for finding inspiration and support. Throughout the book, the stories of five highly successful urban music teachers are highlighted, providing practical, real-world advice for music teachers across the domains of general, choral, band, and string music teaching. Recognizing that the term "urban" can encompass a wide variety of different school and community settings, this book challenges all teachers who work in under-served and under-resourced settings to take a critical look at their own music classroom and work to tailor their pedagogy to meet the particular needs of their students.

Bioassay Methods in Natural Product Research and Drug Development contains the proceedings from the Phytochemical Society of Europe's very successful symposium on this topic, held August 24-27, 1997 in Uppsala, Sweden. In this volume, leading academic and industrial scientists discuss novel methods for assaying natural products to find new structure-activity relationships. Of key importance in this process is the availability and reliability of specific bioassay methods, but chapters also discuss chemical and biological diversity and how to dereplicate natural product extracts to increase efficiency in lead discovery. Anti-tumor, HIV-inhibitory, antiprotozoal, anti-infective and immunomodulatory natural products are discussed. Various industrial projects are presented for the first time. This volume bridges the gap between academic and industrial research and scientists, and should be required reading in drug companies and faculties of pharmacy, as well as serving scientists in pharmacognosy, pharmacology, phytochemistry, natural products and drug discovery.

The Hieroglyphic Dictionary is part of Museum Tours' series "The Essentials" ... books that anyone serious about the study of Egyptology will find useful. It has been created to fill a need for a low cost, yet comprehensive, translation aid to hieroglyphs that is convenient to use. Its emphasis is on words found in monumental inscriptions, as opposed to words found strictly in papyri. The words it contains are most likely to be encountered on the monuments in Egypt or in museums. It contains a about 4,000 entries. This compares favorably to the 2,500 entries in the vocabulary of Alan Gardiner's "Egyptian Grammar", and the 5,000 plus entries in Raymond Faulkner's "Dictionary of Middle Egyptian". The volume's convenient size makes it ideal for everyday use anywhere one happens to be, a local museum or the monuments in Egypt. It is a "must have" for any serious student, Egyptologist or Egyptophile.From Museum Tours Press.
