What happens when we take a chance and jump into the unknown? Mag the Mighty Marshmallow will delight readers in this rhyming story. Mag is a shy, but curious marshmallow, living in a bag, amongst the same, square, boring marshmallows. Her secret wish is to see what life is beyond the high shelf in the kitchen from where she lives. If she can muster up the courage to take a leap of faith, she may find a friend or two down on the countertop, with unexpected surprises. Mag's adventure will

inspire readers to take chances on their dreams, handling stress positively when our plans don't go according to what we envisioned, and allowing new friends into our lives. Mag teaches us it's okay to be soft and vulnerable, yet strong and mighty. We meet important people on our journey; some for seasons and others as keepers. The ones who remain often become life-long friends to help us when we need it most, and who like us just the way we are, without trying to change us. Mag the Mighty Marshmallow is a story both adults and children can relate to and appreciate.

History of the Electric Automobile covers the evolution from the first electric vehicles of the

1880s to the advances of today. Beginning with early electric vehicle development in England, France, and the United States, this book provides an in-depth look at the so-called "golden age of electric vehicles" (1895-1905), demonstrating the technological improvements and business risks of this era. This history also explores the "dead period" of the 1930s, 1940s and 1950s, and the subsequent re-birth of interest in electric vehicles in the early 1960s. Events which have impacted the development of electric cars since then -- most notably the Electric Vehicle Act of 1976 -- are also examined. The book also features an appendix section containing such information as a name table of American electric cars, the Electric Vehicle Act of 1976, "nostalgia", and more. A glossary and index are also included. "For more than a century, nearly all seers who have predicted the role of electric vehicles in personal transportation have been wrong. This book records what actually happened, both within America and internationally." - Ernest H. Wakefield

Chicken Soup for the Soul: Read, Laugh, Repeat Bedford

"Whatever it takes" That was Federal Reserve Chairman Ben Bernanke's vow as the worst financial panic in more than fifty years gripped the world and he struggled to avoid the once unthinkable: a repeat of the Great Depression. Brilliant but temperamentally cautious, Bernanke researched and wrote about the causes of the Depression during his career as an academic. Then when thrust into a role as one of the most important people in the world, he was compelled to boldness by circumstances he never anticipated. The

president of the United States can respond instantly to a missile attack with America's military might, but he cannot respond to a financial crisis with real money unless Congress acts. The Fed chairman can. Bernanke did. Under his leadership the Fed spearheaded the biggest government intervention in more than half a century and effectively became the fourth branch of government, with no direct accountability to the nation's voters. Believing that the economic catastrophe of the 1930s was largely the fault of a sluggish and wrongheaded Federal Reserve, Bernanke was determined not to repeat that epic mistake. In this penetrating look inside the most powerful economic institution in the world, David Wessel illuminates its opaque and undemocratic inner workings, while revealing how the Bernanke Fed led the desperate effort to prevent the world's financial engine from grinding to a halt. In piecing together the fullest, most authoritative, and alarming picture yet of this decisive moment in our nation's history, In Fed We Trust answers the most critical questions. Among them: • What did Bernanke and his team at the Fed know—and what took them by surprise? Which of their actions stretched—or even ripped through—the Fed's legal authority? Which chilling numbers and indicators made them feel they had no choice? • What were they thinking at pivotal moments during the race to sell Bear Stearns, the unsuccessful quest to save Lehman Brothers, and the virtual nationalization of AIG, Fannie Mae, and Freddie Mac? What were they saying to one another when, as Bernanke put it to Wessel: "We came very close to Depression 2.0"? • How well did Bernanke, former treasury secretary Hank Paulson, and then New York Fed president Tim Geithner perform under intense pressure? • How did the crisis prompt a reappraisal of the once-impregnable reputation of Alan Greenspan? In Fed We Trust is a breathtaking and singularly perceptive look at a historic episode in

American and global economic history. Part Mao biography, part historical overview of the turbulent story of China's Communist revolutions, the introductory essay traces the history of twentieth-century China, from Mao's early career up to the Chinese Communist Party's victory in 1949, through three decades of revolution to Mao's death in 1976. The second half of the volume offers a selection of Mao's writings – including such seminal pieces as "On New Democracy" and selections from the Little Red Book – and writings about Mao and his legacy by both his contemporaries and modern scholars.

Airport Emergency Plan John Wiley & Sons

This book presents the papers from the Internal Combustion Engines: Performance, fuel economy and emissions held in London, UK. This popular international conference from the Institution of Mechanical Engineers provides a forum for IC engine experts looking closely at developments for personal transport applications, though many of the drivers of change apply to light and heavy duty, on and off highway, transport and other sectors. These are

exciting times to be working in the IC engine field. With the move towards downsizing, advances in FIE and alternative fuels, new engine architectures and the introduction of Euro 6 in 2014, there are plenty of challenges. The aim remains to reduce both CO2 emissions and the dependence on oil-derivate fossil fuels whilst meeting the future, more stringent constraints on gaseous and particulate material emissions as set by EU, North American and Japanese regulations. How will technology developments enhance performance and shape the next generation of designs? The book introduces compression and internal combustion engines' applications, followed by chapters on the challenges faced by alternative fuels and fuel delivery. The remaining chapters explore current improvements in combustion, pollution prevention strategies and data comparisons.

In 1967, Canada celebrated the 100th anniversary of its founding with a spectacular party, and the whole world was invited. Montreal's Expo 67 was the first world's fair held in Canada, and it was a huge success, attracting over 50 million visitors. The 1,000-acre site was built on two man-made islands in the St. Lawrence River and incorporated 90 futuristic pavilions created by some of the world's greatest architects and designers. Over 60 countries were represented, along with many private, corporate and thematic pavilions, all brought together under the theme "Man and his World." With performers and entertainers of all varieties, restaurants, cultural attractions, exhibitions and a world-class amusement park, Expo 67 was literally the party of the century, exceeding all expectations. *Biosimilars of Monoclonal Antibodies* From flirtation and lust to sexual passion and ecstasy, Kama Sutra Erotica takes you on a journey through all the stages of a

Mao Zedong China's Revolution

'Fascinating ... not only a history of graffiti, but also a history of the 18th century through lost voices of the people who lived through it.' The Times What if walls could talk? For historian Madeleine Pelling, they can - if you know where to look. A brilliant new cultural history of the long eighteenth century, *Writing on the Wall* is told through the marks its citizens left behind, bringing into focus lost voices from the highest to the lowest in society. From the centre of London to the islands of the Caribbean, Pelling goes in search of graffiti, evidence of how ordinary people experienced the world-changing events that defined their lives - from political prisoners to sex workers, homesick sailors, Romantic poets and the artisans of the industrial revolution. Here are lives, loves, triumphs and failures, scratched into the walls of prisons and latrines, chalked up on doors and etched into windows. The names of their creators may be lost to history, but together they tell the real story of Britain's most rebellious and transformative century.
