Alexander Cooper Square Publishers Following the course of Civil War campaigns can be taxing for even the most well-read military scholar. The operations at major sites such as Vicksburg, Gettysburg, and Petersburg were complicated matters, with generals on each side commanding infantry and cavalry brigades from different positions and making simultaneous movements along complex geographic routes; the

battles were less climactic moments than prolonged struggles marked by continual flux. But Theodore Ayrault Dodge makes it easy. With his well-drawn maps, his positioning of each movement with its date and, where important, time, his enumeration of the size of—and the losses suffered by—the various forces engaged, Dodge makes every episode of this long war clear and comprehensible. His concise military history of the American Civil War evenhandedly treats major and minor operations with the space each deserves, presenting a kind of skeleton of the Civil War. Here is perhaps the only general history that avoids over-detailed descriptions and technical terms, withholds partisan bias, treats generals on both sides with admiration and respect, and communicates elegantly yet succinctly, calmly yet vividly, the entire course of the conflict that changed the way men and nations make war.

Great Captains; A Course of Six Lectures Showing the Influence on the Art of War of the Campaigns of Alexander, Hannibal, Caesar, Gustavus Adolphus, Frederick, and Napoleon - War College Series

A classic history of one of the world's greatest military commanders. At the age of 20, Alexander the Great inherited the near-bankrupt kingdom of Macedonia and its small but revolutionary army, built around an unbreakable infantry phalanx and a shock cavalry force. In just ten years, he led this army on a march of conquest across most of the known world: Greece, Asia Minor, the Near East, Egypt, the lands of

the Fertile Crescent, and on into what we now know as Afghanistan, Pakistan, and India. Undefeated in battle, in his short life he immeasurably changed the course of history. Theodore Ayrault Dodge's account of the campaigns was first published in 1890, as part of his "Great Captains" series. The author, an experienced military officer and historian, follows the entire career of Alexander the Great, reconstructs his army, his strategy, and all of his battles, and explains his lasting impact on the art of war. The result is a classic military history and biography. This ebook edition includes an active table of contents, reflowable text, and over 200 campaign maps, battle diagrams, and illustrations.

#### Hannibal

The following lectures aim to indicate briefly what we owe to the great captains, and to draw an intelligible outline of their careers. Caesar is the only one of the great captains who trained himself to arms. Alexander,

Hannibal, Gustavus Adolphus, Frederick, owed their early military training to their fathers, though, indeed, Frederick's was but the pipe-clay of war. Napoleon got his in the best school in France. But hey all have contributed to the growth of the art of war. This new large print edition, designed to make reading comfortable, is illustrated with beautiful paintings.
