Having left motor

racing in the early distinguished itself
1950s - at least by preparing and
officially - Alfa racing about 30 of
Romeo returned the
to the sport once the
again at the start manufacturer's
of the following different cars that
decade due to the really did make
commitment and history. Among
enthusiasm of them, the Giulia
Autodelta. This TZ holds a place
Alfa offshoot at the head of the
crowd. It had a

1.5-litre, 113 hp engine from the Giulia SS, front and rear suspension of modern conception, disc brakes and an especially bold body shaped by Zagato on a modern tubular chassis. Those were the strong points of this car, which scored results of absolute prestige in its brief career at Sebring, in the Targa Florio, the 24 Hours of Le Mans and the Tour de France. Vito Witting da Prato, already the author of a meticulously written book on the Alfa Romeo SZ, covers the winning, human, technical and

sporting factors of this unforgettable car in a monumental work. A book which, to the precise text and painstaking historical reconstruction, has been added illustrations of previously unpublished pictures and technical designs by Autodelta.

Since the book first appeared in 1976, **Methods of Seawater Analysis** has found widespread acceptance as a reliable and detailed source of information. Its second extended and revised edition published in 1983 reflected the rapid pace of instrumental and methodological

evolution in the preceding years. The development has lost nothing of its momentum, and many methods and procedures still suffering their teething troubles then have now matured into dependable tools for the analyst. This is especially evident for trace and ultra-trace analyses of organic and inorganic seawater constituents which have diversified considerably and now require more space for their description than before. Methods to determine volatile halocarbons, dimethyl sulphide, photosynthetic pigments and

natural radioactive tracers have been added as well as applications of X-ray fluorescence spectroscopy and various electrochemical methods for trace metal analysis. Another method not previously described deals with the determination of the partial pressure of carbon dioxide as part of standardised procedures to describe the marine CO₂ system. *Road & Track* John Wiley & Sons De Kampioen is the magazine of The Royal Dutch Touring Club ANWB in The Netherlands. The complete history
of farm machinery,
from steam and
vintage tractors to the
latest combine
harvesters, is
showcased in this
lavishly illustrated
volume. Packed with
more than 450
tractors, from the
pioneering engines of
Fowler and Froelich,
to the groundbreaking
AGCO Challenger,
DK's Tractor charts
the story of the
machines that
reshaped agriculture

in glorious visual detail.
Meet the
manufacturers whose
amazing machinery
transformed farming,
including John Deere,
Caterpillar, Massey
Ferguson, and SDF;
discover extraordinary
vehicles, remarkable
engines, and hi-tech
modern cabs; and
explore an incredible
range of tractors from
around the world.
**Alfa Romeo All the
Cars**
The story of Alfa
Romeo, the
prestigious Italian
marque which
created some of the
most memorable
cars of all time
during its 100 year-
plus history, is told
by specification
after specification
in a "virtual gallery"
of many of the

models produced by the company, both road-goers and racers. The 1750 GS of the 1930s, the 8C 2900 B, the Giulietta, the Giulia, the 33s, the Alfettas right up to the most modern 8C Competizione are just some of the cars that find a place in this long catalog in which the illustrations of Michele Leonello, the authoritative car designer, come together with the words of Lorenzo Ardizio, the expert on the history of Alfa Romeo.

Eigen huis & interieur

It was in 1919 that Ugo Zagato

established Carrozzeria U. Zagato & C., a business that acquired great fame in just a few years among the numerous car manufacturers of the period, first of all Alfa Romeo, which entrusted the Milanese body stylist with designing and building the body of the unforgettable 6C 1750, as it did its 8C 2900 that appeared in the '30s. From then on, the famous marque became synonymous with style - not only in Italy - designing a series of masterpieces

including the Lancia Aprilia Sport, the various Panoramic cars of the immediate post-war period, the Aston Martin DB4, the Alfa Romeo SZ and TZ, the Lancias Fulvia, Flavia and Flaminia and many more. From the '90s Zagato re-emerged as an atelier, designing small production run cars and sometimes one-offs for its wealthy clients. Luciano Greggio, the automobile historian, covers the fascinating story of this prestigious body stylist and has also written other books in the series

as well as Zagato.
The series, to be
published soon,
includes books on
Touring, Bertone,
Pininfarina,
Giugiaro and
Vignale & Ghia.
