Microsoft Press
Microsoft Azure Essentials from Microsoft Press is a series of free ebooks designed to help you advance your technical skills with Microsoft Azure. This third ebook in the series introduces Microsoft Azure Machine Learning, a service that a developer can use to build predictive analytics models (using training datasets from a variety of data sources) and then easily deploy those models for consumption as cloud web services. The ebook presents an overview of modern data science theory and principles, the associated workflow,

and then covers some of the more common machine learning algorithms in use today. It builds a variety of predictive analytics models using real world data, evaluates several different machine learning algorithms and modeling strategies, and then deploys the finished models as machine learning web services on Azure within a matter of minutes. The ebook also expands on a working Azure Machine Learning predictive model example to explore the types of client and server applications you can create to consume Azure Machine Learning web services. #1 "New York Times" bestselling author Frederick

Forsyth's unforgettable novel of a conspiracy, a killer, and the one man who can stop him... He is known only as "The Jackal"--a cold, calculating assassin without emotion, or loyalty, or equal. He's just received a contract from an enigmatic employer to eliminate one of the most heavily guarded men in the world--Charles De Gaulle, president of France. It is only a twist of fate that allows the authorities to discover the plot. They know next to nothing--only that the assassin is on the move. To track him, they dispatch their finest detective, Claude Lebel, on a manhunt that will push him to his limit, in a race to stop an assassin's bullet from

reaching its target.
