Maintenance Manual for Alfa Romeo Sport Sedan-Sprint Veloce, 2000 Spider Veloce Robert Bentley, Incorporated
VelocePress, in close cooperation with Brooklands Books Ltd., has brought this and other repair manuals previously published as part of the Autobooks Owners Workshop Manual Series back into print. The series is an invaluable resource for the classic car enthusiast and a must have for owners interested in performing their own maintenance.
Alfa 33 Workshop Manual
ALFA ROMEO GIULIA WORKSHOP MANUAL 1962-1975 ALL MODELS 1300, 1600, 1750

& 2000cc
The Alfa Romeo 105 series Spider is one of the most admired drop-head sports cars to come out of Italy. Launched in 1966, its radical new look was not immediately welcomed. As prospective buyers gradually warmed to the model, enhancements were introduced including more powerful engines and higher-spec body and interior fittings. Despite its inauspicious start, production of this much-admired car lasted for twenty-seven years, finally stopping in 1993. Jim Talbott and Andrew Brown pay homage to the 105/115 series Alfa Spider. With over 330 photographs, many specially commissioned, this new book describes the Alfa Romeo company history including its philosophy of incorporating driver appeal into all of its products, resulting in some of the most desirable vehicles of their age; it details the

evolution of the 105/115 series through four distinct body styles; lists the technical design specifications and every major version of the Spider and finally, discusses the issues and challenges of finding and owning a classic Spider.

How To Build & Power Tune
Weber & Dellorto DCOE,
DCO/SP & DHLA
Carburettors 3rd Edition The
Crowood Press
With 340 pages, and more
than 500 illustrations and
charts, size 8.25 x 10.75 inches,
this is possibly the most
complete workshop manual for
the Alfa Romeo 750 & 101
series of automobiles. It
includes: A reprint of the
September 1958 factory
Workshop Manual (No.637).
The 12-page 'Transmission
Appendix' from the December
1957 manual (No.611). The
15-page 1962 'Enclosure to the
Shop Manual-Technical
Characteristics' (No.854) plus
the 1963 and 1964 'Technical
Characteristics' publications
for the 1600cc models (27
pages). Introduced in 1954, the
initial 750 Series Giulietta was
replaced by the 101 Series
Giulietta in 1959. Both the 750
and 101 models were powered
by a 1300cc (1290cc) engine.
The engine capacity was
increased in 1962 with the
introduction of a 1600cc

(1570cc) unit. Co-incident with
this engine update, the Giulietta
name was changed to Giulia,
although they still retained their
original 101 Series designation.
From 1962 onwards, the
updated Giulietta continued to
be sold under the Giulia name
until they were replaced by the
all-new 105 Series Giulia-based
models in 1965. As the
predominance of the basic
mechanical components of the
750 and 101 models remained
unchanged during their
1954-1965 production run, the
original Giulietta workshop
manual was considered
adequate and the factory
supplemented it with the
publication of 'Technical
Characteristics' booklets (1963
& 1964) that updated the
Factory manual with technical
data specific to the 1600cc
equipped cars. Timeline of the
English language manuals
issued by the Alfa factory for
the 750 & 101 Series Giulietta
and Giulia models: The first
English language Workshop
Manual (Part No.577 - 600
copies) was issued in May 1957
and it consisted of 14 individual
booklets in a ring binder. In
addition, a separate booklet
numbered 15 was added a little
later that was identified as
'Special Repair Data for the
'Sprint Veloce, Spider and
Super Spider'. In December
1957, Alfa issued 1000 copies of
a softbound workshop manual
(Part No.611) that combined
the booklets from the May 1957

publication into a single volume.
It should be noted that booklet
14 'Special Tools and
Equipment' was omitted from
this edition and that the images
are of poor quality. In
September 1958, another 1000
copies of a softbound single
volume manual (Part No.637)
was issued and the images in
this manual are almost photo
quality. This edition also
included the previously missing
'Special Tools' section.
However, for some unknown
reason the 12-page appendix to
the transmission section from
the December 1957 edition was
omitted. This same part
number (637) was reprinted by
the factory in September 1961
(1000 copies). Finally, in
November 1962, Alfa issued
2000 copies of a 15-page
booklet 'Enclosure to the Shop
Manual - Technical
Characteristics' (Part No.854).
This booklet expanded the
technical data for the 1300cc
models that was previously
included in 'Technical
Specifications' section of both
the ring bound and softbound
workshop manuals. However,
in 1962, the Giulietta sport
models: Sprint, Sprint Special
and Spider were fitted with the
new 1600cc engine and the
Giulietta Series 101 name was
dropped but they continued to
be sold under the Giulia name
(as 101 Series vehicles) until
they were replaced by the all-
new 105 Series Giulia-based
models in 1965. Consequently,

for the sake of completeness, the 20-page October 1963 'Technical Characteristics' booklet (Part No. 955 -1000 copies) for the 1600cc Giulia Ti, Spider & Sprint and the 7-page October 1964 'Technical Characteristics' for the Giulia Spider Veloce should be a required addition to this list of manuals for the 750 and 101 Series models.
