David and Charles

This book chronicles the development and racing career of a car regarded as the ultimate example of the purebred sports car of the 20th century and the epitome of functional beauty and extraordinary performance: the 1952 Mercedes-Benz 300 SL. Taking second place at its 1952 Mille Miglia debut, it went on

---

to win every one of its races that season.

With Building in

France, Building in

Iron, Building in

Ferroconcrete

(1928)—published now for the first time in

English—Sigfried

Giedion positioned himself as an eloquent advocate of modern

architecture. This was the first book to exalt

Le Corbusier as the artistic champion of the

new movement. It also spelled out many of the

tenets of Modernism that are now regarded

as myths, among them

the impoverishment of nineteenth-century architectural thinking and practice, the contrasting vigor of engineering innovations, and the notion of Modernism as technologically preordained.

David and Charles

Having left motor racing in

the early 1950s - at least

officially - Alfa Romeo

returned to the sport once

again at the start of the

following decade due to the commitment and enthusiasm

of Autodelta. This Alfa

offshoot distinguished itself by preparing and racing

about 30 of the

manufacturer's different cars that really did make history.

Among them, the Giulia TZ

holds a place at the head of

the crowd. It had a 1.5-litre,

---

113 hp engine from the Giulia SS, front and rear suspension of modern conception, disc brakes and an especially bold body shaped by Zagato on a modern tubular chassis.

Those were the strong points of this car, which scored results of absolute prestige in its brief career at Sebring, in the Targa Florio, the 24 Hours of Le Mans and the Tour de France. Vito Witting da Prato, already the author of a meticulously written book on the Alfa Romeo SZ, covers the winning, human, technical and sporting factors of this unforgettable car in a monumental work. A book which, to the precise text and painstaking historical reconstruction, has been added illustrations of previously unpublished pictures and technical designs by Autodelta.

*Two Summers* BradyGames

Revised and updated to 2007, “Alfa Romeo - Production Cars” was first published in 1996, written by two experts: Stefano d’Amico (President of RIAR, the Alfa Romeo Italian Register) and Maurizio Tabucchi (consultant at both RIAR and ASI, the Italian Vintage Automobile Association). This fascinating story of Alfa Romeo’s cars is told model by model by a text that results from precise reconstruction of the facts, enriched with detailed technical specifications (chassis numbering included) and rare archive illustrative material. All of Alfa’s recent production can also be found in the book, starting with the 155, the last car in the previous edition, the following 156, 145, 146, 147, 166, 159, up to the last “Brera” and “Spider”; A long-awaited new edition that no Alfa Romeo fan should miss. Written in English and Italian.

U.S. Army Ranger Handbook Giorgio Nada Editore Srl  
F1 Mavericks is the story of the grandest, most influential,

and most fondly remembered era in Formula 1 racing as seen through the lens of master motorsports photographer, Pete Biro. The period from 1960 to 1982 saw the greatest technological changes in the history of Formula 1 racing: the transition from front engines to rear engines, narrow-treaded tires, massive racing slicks, zero downforce, and neck-wrenching ground effects—and, of course, a staggering increase in performance and reduction in lap times. In short, the period saw the creation of the modern Formula 1 car. This is also the time when legendary names who defined F1 were out in full force: Jim Clark, Jack Brabham, Dan Gurney, Sir Jackie Stewart, Graham Hill, Niki Lauda, James Hunt, Bruce McLaren, Jody Scheckter. We'll see and meet all of them. But F1 Mavericks also focuses on the designers and engineers behind the cars—men

---

like Colin Chapman, Sir Patrick Head, Maurice Philippe, Franco Rochhi, Gordon Murray, and many others. We'll hear directly from many of them, including a foreword from 1978 F1 World Champion, Mario Andretti. Every chapter is a photographic account of key races throughout the period, supplemented with sidebars featuring key designers and technologies, like wings, ground effects, slick tires, turbochargers, and the Brabham "fan" suction car. F1 Mavericks is an international story, and includes loads of information on designs from Japan (Honda), Britain (McLaren, Tyrrell, Cooper, BRM) Italy (Ferrari, Maserati, Alfa Romeo), France (Matra, Ligier, Renault), Germany (Porsche, BMW) and the United States (Eagle, Shadow, Penske, Parnelli). Strap yourself in for the story of the greatest era in Formula 1

Mavericks.

This is the story of a man, a team, and their life and times, as well as a complete record of all their achievements and failures. It logs the financial and personal cost of racing in the prewar and postwar periods. It tells of how the mighty car company Renault became involved with them in the late 1950s, and how Amedee Gordini became known throughout the world as one of the greatest engine tuners of his time.

**Alfa Romeo Spider** David and Charles

Immediately after saving Alfa Romeo, Fiat decided to enter motorsport wholeheartedly as a means of marketing the brand. This book charts its early attempts at this, and comprehensively describes the development and racing history of the first 'Fiat' Alfa Romeo - the 155 - and the subsequent 156 and 147 models.
