The Eureka Math curriculum provides detailed daily lessons and

assessments to support teachers in integrating the Common Core

State Standards for Mathematics (CCSSM) into their instruction.

The companion guides to Eureka Math gather the key components of

the curriculum for each grade into a single location. Both users

and non-users of Eureka Math can benefit equally from the content

presented. The CCSSM require careful study. A thorough study of

the Guidebooks is a professional development experience in itself

as users come to better understand the standards and the

associated content. Each book includes narratives that provide

educators with an overview of what students learn throughout the

year, information on alignment to the instructional shifts and

the standards, design of curricular components, and descriptions

of mathematical models. The Guidebooks can serve as either a self-

study professional development resource or as the basis for a

deep group study of the standards for a particular grade. For

teachers who are either brand new to the classroom or to the

Eureka Math curriculum, the Grade Level Guidebooks introduce them

not only to Eureka Math but also to the content of the grade

level in a way they will find manageable and useful. Teachers

already familiar with the curriculum will also find this resource

valuable as it allows for a meaningful study of the grade level

content in a way that highlights the coherence between modules

and topics. The Guidebooks allow teachers to obtain a firm grasp

on what it is that students should master during the year.
