Algebra 1 Unit 4 Mandatory

*Illustrative Mathematics Algebra 1, Unit 4.11 - Teachers ...*

The swing is 1.5 feet (18 inches) above ground. The chains that hold the seat and suspend it from the top beam are 7 feet long. The highest point that the child swings up to is 4 feet above the ground. If time is limited, ask each partner to choose two functions (different than their partner's) and write the domain and range only for those ...

Algebra 1 Unit 4 Mandatory

The mathematical purpose of this lesson is to describe distributions using the appropriate terminology. In order to learn more about different kinds of distributions, one thing students do is invent reasonable contexts for a given distribution.

This activity introduces students to average rate of change, by building on what students know about rate of change and slope.. Students see that finding the change in the output for every unit of change in the input can be a useful way to generalize what happens between two function values, regardless of the behaviors of individual data points between them.
