A Book of Abstract Algebra Courier Corporation
This is the second in a series of three volumes dealing with important topics in algebra. Volume 2 is an introduction to linear algebra (including linear algebra over rings), Galois theory, representation theory, and the theory of group extensions. The section on linear algebra (chapters 1-5) does not require any background material from Algebra 1, except an understanding of set theory. Linear algebra is the most applicable branch of mathematics, and it is essential for students of science and engineering. As such, the text can be used for one-semester courses for these students. The remaining part of the volume discusses Jordan and rational forms, general linear algebra (linear algebra over rings), Galois theory, representation theory (linear algebra over group algebras), and the theory of extension of groups follow linear algebra, and is suitable as a text for the second and third year students specializing in mathematics.

I type "International Teaching Jobs" on the Google search line and find myself looking at a long list of teaching jobs all over the world. "Anything in Latin America?" my wife asks, coming into the room.. "No... but here's one in the Congo." "Africa!!!"

"Yea... really. They want a calculus teacher! I can do that!"

"Okay," Chantal says tentatively. "If you want." I hit the submit button and my resume is off across the world. What follows are four action-packed years of living, working and traveling in sub-saharan Africa. This book chronicles the second, third and fourth years of these adventures, including the day-to-day life of a teacher at The American School of Kinshasa from 2007-2009 who deals with a marginal infrastructure, the everyday challenges of living in a war-torn third-world country, and has adventures in

South Africa, Kenya, Ghana, Uganda and Zanzibar. This is the sequel to the book, *Calculus in the Congo Book 1*.

In Memoir of a Retired Teacher, author Edes Solina shares her concern that there is a real problem in education today: American children are performing at levels significantly below the skill levels of many countries in mathematics and science exams. College instructors are asking why such a large number of high school graduates are not prepared for college work in these and other subject areas. The United States has the best quality of college or higher education in the whole world, but the quality of education in high school is below acceptable levels for college entrance. She believes the root cause of the substandard performance of American students is the serious disruption caused by discipline problems taking place in the classroom today. Teachers need help in finding positive methods for turning the tide before its too late. She believes that the schools need to

allow the teachers to focus every minute of the class period on teaching and learning activities without the constant disruption from the rampant discipline problems plaguing their classrooms. Memoir of a Retired Teacher is Solinas life story in three parts: in the first part, she looks back on the final days of her teaching career; in the second part she remembers her teaching experiences; and in the final part she recounts her lifes journey.
