Module 4: Linear equations | Khan Academy

"With their sense of number expanded to include negative numbers, in Module 4 students begin formal study of algebraic expressions and equations. Students learn equivalent expressions by continuously relating algebraic expressions back to arithmetic and the properties of arithmetic (commutative, associative, and distributive). They write,

interpret, and use expressions and equations as they ...

FLVS stands for Florida Virtual School. So here's the deal. I studied and was taking a module 2 test in geometry. I did really well on the practice test and I knew that I would do well on this test. I was doing great but when I got to an extended response question I froze and couldn't remember anything. I looked through the lesson and at my past work and i got nothing so I looked up my ...

Below, you will find links to LearnZillion videos that will help you throughout Module 3. Below the videos, you will find the Problem Set with answers, the Homework with some answers, and/or a Video describing the homework.

"In Module 4, students use similar triangles learned in Module 3 to explain why the slope of a line is well-defined. Students learn the connection between proportional relationships, lines, and linear equations as they develop ways to represent a line by different equations ($y = mx + b$, $y - y_1 = m(x - x_1)$, etc.). They analyze and solve linear equations and pairs of simultaneous linear equations. The ...
