This second edition of the popular math teaching resource book *Math Stories for Problem Solving Success* offers updated true-to-life situations designed to motivate teenagers to use math skills for solving everyday problems. The book features intriguing short stories followed by sets of problems related to the stories that are correlated to

the standards of the National Council of Teachers of Mathematics. Each of the easy-to-read stories is followed by three increasingly difficult groups of problem sets. This makes it simple for teachers to select the appropriate problem set for students of different abilities and at different grade levels. To further enhance student involvement, the stories feature recurring characters and can be used either sequentially or out of order. The problems in the book cover many basic math topics, including decimals, fractions, and percents; measurement; geometry; data, statistics, and probability; algebra; and problem solving. In addition to having all the answers, an Answer Key at the end of the book offers explanations and background information about the problems that can

be helpful to both teachers and students. Math Stories for Problem Solving Success will help you show students that math is something they are already using every day.

This second edition presents an updated action-based curriculum for high school counselors that will meet the needs of 21st century students, helping to foster their growth and engage them in learning what they need to succeed beyond high school. This book takes a comprehensive, developmental approach, focusing on 9th-12th grade students rather than solely on those in 11th and 12th grade. It provides a model for

developing and enhancing a successful college advising office as well as essential advice on methods of working with parents. Specific topics discussed include successful transition to 9th grade, using technology in the college and career advising process, assisting and advising students in college research and application, and helping seniors make successful transitions to college. There is also a special focus on students in urban and rural schools to enable them to have the same enriched experiences in their college and career advising program as those students in private and suburban schools. The curriculum is geared for use by school counselors, college advisors, and readers in graduate counseling student courses.
