The Investigating Arthur Conan Doyle and Sherlock Holmes Colloquium and donation of the third largest private collection of Sherlockiana in the world were supposed to produce a weekend of great publicity for tiny St. Benignus college in Erin, Ohio. But when theft and murder come to campus, college

public relations director Jeff Cody finds himself knee-deep in Sherlockian suspects. Besieged by an aggressive reporter he loves but no longer dates, he is also competing with his eccentric brother-in-law, Sebastian McCabe, to solve the crimes first. The mess worsens when Jeff and his ex-girlfriend, Lynda Teal, themselves fall under suspicion of murder and with good reason, for they have something to hide. This satirical romp takes Sherlock Holmes seriously, but not Holmesians. A witty and engaging spoof sure to delight not only the deerstalker set but mystery fans in general.

"Prealgebra is designed to meet scope and sequence requirements for a one-semester prealgebra course. The text introduces the fundamental concepts of algebra while addressing the needs of students with diverse backgrounds and learning styles. Each topic builds upon previously developed material to demonstrate the cohesiveness and structure of mathematics. Prealgebra follows a nontraditional approach in its presentation of content. The beginning, in particular, is presented as a sequence of small steps so that students gain confidence in their ability to succeed in the course. The order of topics was carefully planned to emphasize the logical progression throughout the course and to facilitate a thorough understanding of each concept. As new ideas are presented, they are explicitly related to previous topics."--BC Campus website.
