How to solve Algebra Word Problems? (solutions, examples ...

Grade 6 math word problem worksheets with answers - Estimation word problems for 6th Grade are made of the following Math skills for kids: estimate to solve word problems, multi steps word problems, identifying word problems with extra or missing information, distance direction to starting point word problems, using logical reasoning to find the order, guest and check word problems.

Mathway | Algebra Problem Solver

Many students find solving algebra word problems difficult. The best way to approach word problems is to “ divide and conquer ” . Break the problem down into smaller bits and solve each bit at a time. First, we need to translate the word problem into equation (s) with variables.

Microsoft Math Solver - Math Problem Solver & Calculator

Solution. In this problem, we are asked to find two numbers. Therefore, we must let x be one of them. Let x , then, be the first number. We are told that the other number is 12 more, $x + 12$. The problem states that their sum is 84: $= 84$. The line over $x + 12$ is a grouping symbol called a vinculum.

Math Word Problems with Answers - Grade 8

Below are more complicated algebra word problems Example #6: The ratio of two numbers is 5 to 1. The sum is 18. What are the two numbers? Solution Let x be the first number. Let y be the second number $x / y = 5 / 1$ $x + y = 18$ Using $x / y = 5 / 1$, we get $x = 5y$ after doing cross multiplication Replacing $x = 5y$ into $x + y = 18$, we get $5y + y = 18$ $6y = 18$ $y = 3$
