This is the first-ever book about product and country images. It goes considerably beyond what was known until now about these images on buyer behavior and international market strategy. Thousands of companies use country identifiers as part of their international marketing strategy and hundreds of researchers have studied the ways in which these identifiers influence behavior. As markets become more international, the more prominently the origin of products will figure in sellers' and buyers' decisions. The time is ripe for practitioners and academicians to delve into the insights offered in this seminal volume so as to better prepare for meeting the competitive challenges of the global marketplace. National stereotyping and consumer biases in favor or against countries, based on image, have been known for some time to influence their marketplace decisions. Businesspeople who want to learn how to use country identifiers effectively, when to use them and when to avoid them, and how country images affect the behavior of consumers in their target markets will want to read this book cover to cover. *Product-Country Images* discusses the nature and role and influence of product-country images in international marketing strategy and consumer behavior. It is a wide-ranging and state-of-the-art book offering specific information and case studies to further understanding of the various aspects of this complex topic. Written by the world's preeminent researchers in the field from both academic and business sectors--a total of twenty-nine researchers from eleven countries--*Product-Country Images* presents the work of some of the best minds in the area--Johansson, Morello, Nebenzahl and Jaffe, Crawford and Lumpkin, Yaprak, Liefeld, and Wall, and the editors, Papadopoulos and Heslop, who have also authored some of its chapters. The chapters cover areas related to the main theme from both theoretical and practical perspectives and address questions of international marketing strategy, public policy, and research methodology. The subject is treated at a level suitable for business executives, public policymakers, academic researchers, and university students. Generally, the influence of product country images is so pervasive that this will be an indispensable reference and guidebook to anyone interested in understanding better, and/or enhancing the effectiveness of, international consumer behavior, international marketing, and international marketing strategy. Academic researchers specializing in country-product images, international marketing, and other fields, such as decisionmaking, cultural anthropology, international behavior,

and perhaps most importantly, social psychology for international relations, will find readily applicable information and new directions for further research. International business marketing practitioners and public policymakers will find the practical information on the role and importance of country image in attracting foreign investment, promoting a nation's exports, protecting domestic markets from imports, and capitalizing on major international events for promoting national image immediately useful in formulating strategies and policies. International marketing/business students will be better prepared for a competitive world from being exposed to this field of knowledge and its implications which are relevant to many subdisciplines. The made-in notion is a matter of tremendous importance in international marketing strategy, public policymaking, and research. With this in mind, editors Papadopoulos and Heslop take special care to achieve a blend of practice and theory and of the strategic, policy, and research perspectives. As such, *Product-Country Images* is divided into five main sections so that readers will be able to find the information they need: In the first section, the chapters that introduce the subject, provide an overview of the field, *Alice in the Country of Hearts: White Rabbit and Some Afternoon Tea, Vol. 1* Seven Seas

Decades ago in Brooklyn, three girls demonstrated against the Vietnam War, and each followed a distinct path into adulthood. Helen became a violent revolutionary. Val wrote a controversial book, essentially a novelization of Helen's all-too-short but vibrant life. And Olive became an editor and writer, now comfortably settled with her husband, Griff, in New Haven. When Olive is asked to write an essay about Val's book, doing so brings back to the forefront Olive and Griff's tangled histories and their complicated reflections on that tumultuous time in their young lives. *Conscience*, the dazzling new novel from award-winning author Alice Mattison, paints the nuanced relationships between characters with her signature wit and precision. And as Mattison explores the ways in which women make a difference—for good or ill—in the world, she elegantly weaves together the past and the present, and the political and the personal.

Software is eating the world. Technology mediates the conversations and commerce that define modern living. The importance and liability of software has led to the rise of a new kind of software application. Rather than making any one machine or person a central point of failure, emerging systems operate through the cooperation of all computers interacting with the software. Cryptography is necessary to make sure that everyone plays by the rules. From BitTorrent to Bitcoin, this book is a whirlwind tour of this new domain of software. By the end of reading this, you'll be able to dream up your own!

When Georgiana Molloy gave birth on the beach at Augusta in 1830 with boxes of her possessions lying where they'd landed, she was one of the many women who literally had to remake their homes out of the broken bones of their past. In this passionate book Maggie MacKellar tells the stories of women on the frontier in Canada and Australia who ventured out in bonnets and petticoats to collect seeds, who abandoned sidesaddles to ride in the mountains, who risked their reputations to climb mountains—and beyond this it tells of the risky business of women who put their lives on the page to claim the importance of their experience. Core of My Heart, My Country weaves together experience and insight from women who lived and wrote in different landscapes, in different climates and in different eras. It is a provocative and remarkable encounter with buried stories and persistent myths.

This is a collection of new essays on one of the most important works of New England local colour fiction, *The Country of the Pointed Firs* by Sarah Orne Jewett. It builds on feminist literary scholarship that affirms the importance and value of Jewett's work, but goes beyond previously published studies by offering an analysis of how race, nationalism, and the literary marketplace shape her narrative. The volume constitutes a major rethinking of Jewett's contribution to American literature, and will be of broad interest to the fields of American literary studies, feminist cultural criticism, and American studies.
