Growing human populations and higher demands for water impose increasing impacts and stresses upon freshwater biodiversity. Their combined effects have made these animals more endangered than their terrestrial and marine counterparts. Overuse and contamination of water, overexploitation and overfishing, introduction of alien species, and alteration of natural flow regimes have led to a 'great thinning' and declines in abundance of freshwater animals, a 'great shrinking' in body size with reductions in large species, and a 'great mixing' whereby the spread of introduced species has tended to homogenize previously dissimilar communities in different parts of the world. Climate change and warming temperatures will alter global water availability, and exacerbate the other threat factors. What conservation action is needed to halt or reverse these trends, and preserve freshwater biodiversity in a rapidly changing world? This book offers the tools and approaches that can be deployed to help conserve freshwater biodiversity.

An alien race calls on one woman to revive mankind after Earth's apocalypse in this science fiction classic from the award-winning author of Parable of the Sower. Lilith Iyapo has just lost her husband and son when atomic fire consumes Earth—the last stage of the planet's final war. Hundreds of years later Lilith awakes, deep in the hold of a massive alien spacecraft piloted by the Oankali—who arrived just in time to save humanity from extinction. They have kept Lilith and other survivors asleep for centuries, as they learned whatever they could about Earth. Now it is time for Lilith to lead them back to her home world, but life among the Oankali on the newly resettled planet will be nothing like it was before. The Oankali survive by genetically merging with primitive civilizations—whether their new hosts like it or not. For the first time since the nuclear holocaust, Earth will be inhabited. Grass will grow, animals will run, and people will learn to survive the planet's untamed wilderness. But their children will not be human. Not exactly. Featuring strong and compelling characters and exploring complex

themes of gender and species, Octavia E. Butler presents a powerful, postapocalyptic interplanetary epic, as well as a ray of hope for humanity. This ebook features an illustrated biography of Octavia E. Butler including rare images from the author's estate.

A Darkling Sea Houghton Mifflin

This is the mysterious manuscript authored by a U.S. Government insider. It describes, in amazing detail, the inter relationship between the U.S. Government and several extraterrestrials societies with whom we have working agreements. I've been told this information was once classified as "Above Top Secret" and that this information was never intended to be released to the public! The Blue Planet Project Book contains all the amazing notes and drawings made by the scientist. The scientist visited various UFO crash sites, and the notes and drawings were allegedly made from those visits. It is believed that this anonymous scientist (more info revealed in book) was contracted by the government over several years to visit all crash sites, interrogate captured Alien Life Forms and analyze all data gathered from that endeavor. This book compiled from what is believed to be the original and complete information. In keeping with the format of the original information that was in a binder format, this book has been published in a full size 8.5 x 11 page size and bound in a comb binding format. This makes it easier to lay flat and open pages fully for easier reading and studying. We believe this to be the most complete, accurate and highest quality version of this book available. Be cautious of inferior editions and eBook versions which have been reported by reviewers to be of inferior quality and may be difficult to read.

Terrestrial Mammal Conservation provides a thorough summary of the available scientific evidence of what is known, or not known, about the effectiveness of all of the conservation actions for wild terrestrial mammals across the world (excluding bats and primates, which are covered in separate synopses). Actions are organized into categories based on the International Union for Conservation of Nature classifications of direct threats and conservation actions. Over the course of fifteen chapters, the authors consider interventions as wide ranging as creating uncultivated margins around fields, prescribed burning, setting hunting quotas and removing non-native mammals. This book is written in an accessible style and is designed to be an invaluable resource for anyone concerned with the practical conservation of terrestrial mammals. The authors consulted an international group of terrestrial mammal experts and conservationists to produce this synopsis. Funding was provided by the MAVA Foundation, Arcadia and National Geographic Big Cats Initiative. Terrestrial Mammal Conservation is the seventeenth publication in the Conservation Evidence Series, linked to the online resource [www.ConservationEvidence.com](http://www.ConservationEvidence.com). Conservation Evidence Synopses are designed to promote a more evidence-based approach to biodiversity conservation. Others in the series include Bat Conservation, Primate Conservation, Bird Conservation and Forest Conservation and more are in preparation. Expert assessment of the evidence summarised within synopses is provided online and within the annual publication What Works in Conservation.

The Allies of Humanity Book Three: A Message to Earth presents the third set of “ Briefings ” from a mysterious off-planet source whose stated purpose is to orient the human family to the realities of life in our local universe and to alert us to a dangerous Intervention now occurring here on Earth. The Allies of Humanity Briefings are a genuine communication from a group claiming to represent the “ free races ” in our local region of space. The Allies distinguish themselves from those races who are intervening in the world today. They warn us against the presence of this Intervention, insisting that no foreign race should be visiting our world, either now or in the future, until humanity has gained the strength, unity and maturity necessary to engage successfully with a Greater Community of intelligent life in the universe. Whether humanity can ever attain this is uncertain, yet the Allies tell us that intervention in our world has already begun by several non-military races seeking to establish their influence and dominance in our world through deceptive and persuasive means. The Briefings reveal that we are in the unfortunate position of being the race who is being discovered. History has taught us the danger and the tragedy that native peoples faced when they encountered outside forces for the first time. Now we are all the natives of a new world, and the threat of Intervention is upon us. As a result, the Allies are calling for us to build enough human unity amongst the tribes, nations and religions of Earth so that we may protect our freedom in a non-human universe. Marshall Vian Summers received this unique communication from the Allies of Humanity in a state of revelation beginning in November 1997. In the years since, the Allies of Humanity have delivered three sets of Briefings. The Allies of Humanity Book Three represents their most recent communication to Earth. With the Allies Briefings, for the first time, we are being given a window into the reality of life beyond our world, a view that we would never have otherwise. This creates a greater context

for understanding why the Intervention is occurring, who is generating it and what humanity will need to know to preserve and build human freedom and sovereignty so that we can fulfill our destiny as a free race in the universe.

Biodiversity Conservation and Habitat Management is a component of Encyclopedia of Natural Resources Policy and Management in the global Encyclopedia of Life Support Systems (EOLSS), which is an integrated compendium of twenty one Encyclopedias. Biodiversity is declining worldwide at a very unprecedented rate as a complex response to several human-induced changes in the global environment. The magnitude of these changes is so large and their effects are so strongly linked to the altered ecosystem processes and to human (ab-)use of natural resources that biodiversity loss is today perceived as one of the most important issues that humankind should face with extreme urgency. Disseminating information, raising awareness, and propelling concern within a diversified target audience (general public, schools, local authorities, and government agencies) are also essential to develop shared responsibility and to encourage collaborative efforts and compliance. This has been the main objective of “ Biodiversity Conservation and Habitat Management ” . The Theme on Biodiversity Conservation and Habitat Management provides the essential aspects and a myriad of issues of great relevance to our world in eight major topics of discussion, and is focused on 1) History and Overview of Biodiversity Conservation and Protected Areas, 2) Management of Forests and other Wooded Habitats, 3) Management of Savannahs and Other Open Habitats, 4) Management of Wetlands, 5) Management of Tourism and Human Recreation Pressure, 6) Conservation Strategies, Species Action Plans and Translocation, 7) Captive Breeding and Gene Banks, and 8) Eradication and Control of Invasive Species. These two volumes are aimed at the following five major target audiences: University and College students Educators, Professional practitioners, Research personnel and Policy analysts, managers, and decision makers and NGOs.

Soon to be a Netflix Original Series! "Wildly imaginative." —President Barack Obama on The Three-Body Problem trilogy This near-future trilogy is the first chance for English-speaking readers to experience this multiple-award-winning phenomenon from Cixin Liu, China's most beloved science fiction author. In The Dark Forest, Earth is reeling from the revelation of a coming alien invasion-in just four centuries' time. The aliens' human collaborators may have been defeated, but the presence of the sophons, the subatomic particles that allow Trisolaris instant access to all human information, means that Earth's defense plans are totally exposed to the enemy. Only the human mind remains a secret. This is the motivation for the Wallfacer Project, a daring plan that grants four men enormous resources to design secret strategies, hidden through deceit and misdirection from Earth and Trisolaris alike. Three of the Wallfacers are influential statesmen and scientists, but the fourth is a total unknown. Luo Ji, an unambitious Chinese astronomer and sociologist, is baffled by his new status. All he knows is that he's the one Wallfacer that Trisolaris wants dead. Calculating God is the new near-future SF thriller from the popular and award-winning Robert J. Sawyer. An alien shuttle craft lands outside the Royal Ontario Museum in Toronto. A six-legged, two-armed alien emerges, who says, in perfect English, "Take me to a paleontologist." It seems that Earth, and the alien's home planet, and the home planet of another alien species traveling on the alien mother ship, all experienced the same five cataclysmic events at about the same time (one example of these "cataclysmic events" would be the meteor that wiped out the dinosaurs). Both alien races believe this proves the existence of God: i.e. he's obviously been playing with the evolution of life on each of these planets. From this provocative launch point, Sawyer tells a fast-paced, and morally and intellectually challenging, SF story that just grows larger and larger in scope. The evidence of God's universal existence is not universally well received on Earth, nor even immediately believed. And it reveals nothing of God's nature. In fact, it poses more questions than it answers. When a supernova explodes out in the galaxy but close enough to wipe out life on all three home-worlds, the big question is, Will God intervene or is this the sixth cataclysm? Calculating God is SF on the grand scale. Calculating God is a 2001 Hugo Award Nominee for Best Novel. At the Publisher's request, this title is being sold without

Fifty Years of Invasion Ecology Macmillan

An epic new science fiction series about faith, family, and alien invasion in the wilds of Alaska. When a shooting star plunges through the atmosphere and touches down in the Alaska wilderness, only two earthlings are present to witness the event. But they perceive two utterly different realities. What park ranger Jace Kuliak sees is a UFO and the arrival of a dangerous alien species from beyond the solar system. What Poppy Prophecy sees is the star called Wormwood, as recorded in Scripture, and the arrival of an archangel of the Apocalypse. The thing is -- they're both sorta right. Poppy Prophecy is the despotic patriarch of a large End-Times prepper family that is busily converting a depleted copper mine into its own private doomsday bunker. Their copper mine is a century-old relic from territorial days when East Coast robber barons ruled Alaska and plundered its mineral wealth. Today the abandoned mine sits in the middle of the largest, wildest, most majestic national park in the United States. But Poppy isn't impressed by mere earthly beauty, and he doesn't mind bulldozing federal land when it suits his purposes. Backcountry Ranger Jace Kuliak does mind, and he and fellow rangers confront the fundamentalist family in an armed standoff over the construction of an illegal airstrip. It doesn't help matters when Ranger Kuliak falls hopelessly in love with Poppy's second daughter, the lovely, innocent, and totally clueless Deuteronomy. An uneasy truce between the Prophecys and the park service is shattered when the falling star lands in their backyard and is claimed by both sides. What is it? Who is it? Better yet, of all the pit stops on all the planets in all the galaxies, why did the Visitor choose this particular rock to screw with?

the Sholen, their first extraterrestrial contact: so long as they don't disturb the Ilmataran habitat, they're free to conduct their missions in peace. But when Henri Kerlerrec, media personality and reckless adventurer, ends up sliced open by curious Ilmatarans, tensions between Terran and Sholen erupt, leading to a diplomatic disaster that threatens to escalate to war. Against the backdrop of deep-sea guerrilla conflict, a new age of human exploration begins as alien cultures collide. Both sides seek the aid of the newly enlightened Ilmatarans. But what this struggle means for the natives—and the future of human exploration—is anything but certain, in *A Darkling Sea* by James Cambias. Berkshire Encyclopedia of Sustainability 5/10 Macmillan

Alien Reptilians, who are multidimensional extraterrestrials, have been plaguing our planet for eons, lowering our vibrational frequency and using fear, manipulation, and mind-control to dominate and enslave humanity. They have no natural enemies here, so they have had free rein to carry out their agenda. But that is no longer the case! The Arcturians, a much more powerful race of multidimensional extraterrestrials, are right now helping to heal the planet and raise its vibrational frequency by removing alien Reptilians and sending them to the Light. The Arcturians are highly advanced, very loving and peaceful beings from Arcturus, a star in the Bootes Constellation. They are ready to communicate and work with any soul who aspires to journey with them to a higher level of consciousness. In their words: "The souls of the people of Mother Earth have suffered enough over the ages, and now is the time to make the Age of Aquarius a new and glorious era." Wayne Brewer is a prominent private investigator with over 35 years of experience uncovering hidden truths and the author of "Are You Possessed? Now Is the Time for Divine Intervention."

Armageddon Cometh, Species Intervention #6609 Edward W. Robertson

Whether you call them gods, angels, ETs, or aliens, sufficient proof now exists that beings more advanced than humans have influenced our history. Evidence suggests that these outsiders shaped our religions, genes, technology, and cultures. In fact, they may have provided the impetus for modern civilization. Paul Von Ward investigates why modern science and religion refuse to address the possibility that humans interact with Advanced Beings (ABs). He reviews sacred texts, myths and legends--from the Old Testament, Hebrew texts, and the Vedas, to the Greek myths, Sumerian tablets, and other historical sources to make the link between religions, their gods, and alien intervention. He shows how this history of AB intervention has been suppressed and challenges readers to reexamine the origins of notions like "divine revelation" to find common ground among the world's cultures and religions. Previously published as *God, Genes, and Consciousness*.
