Shortlisted for the 2020 Business Book Awards Why do some businesses thrive, while many more struggle and fail? A key reason – and the focus of this book – is strategic alignment. This is the careful arrangement of the various elements of an enterprise – from its business strategy to its organisation – to best support the fulfillment of its long-term purpose. The best-aligned enterprises are the best performing. Most executives recognise that their enterprises should be managed in this aligned way, but lack a robust system of thought to allow them to execute strategic alignment effectively and realise its full benefits. There are thousands of organisations globally that are operating below their potential simply because they are not aligned. This book aims to change that. In *Align*, Jonathan Trevor provides a blueprint for how strategic alignment can be effectively developed, implemented and sustained. Drawing upon active research at the University of Oxford's Saïd Business School (with contributions from the joint works of Dr Jonathan Trevor and Dr Barry Varcoe), Jonathan also provides practical case studies and evidence-based insights – culminating in a thoughtful and compelling message to help leaders everywhere to improve their alignment and enterprise performance.

What makes some training programs successful while others produce disappointing results? The answer, says Ron Stone, lies in the processes trainers employ to determine needs, design and develop programs, deliver the training, and partner to get business results. It is time to reexamine these processes, says the author, and bring them into the twenty-first century. In *Aligning Training for Results* Stone provides a potent, comprehensive, and versatile resource to help guide trainers through assessing, designing, and delivering training solutions that achieve real and measurable results. Many training programs have a limited chance to succeed, Stone explains, because trainers have not focused on the factors that really matter. This book lays out the five critical factors of alignment that drive the entire training process to desired results. The author addresses all aspects of the training process, beginning with needs assessment and ending with designing transfer strategies—and shows how to align training with business needs and goals. The guidelines, techniques, and tools in the book integrate best practices with the best available empirical evidence in making decisions about how to design and deliver training for business results. By following the author's research-based methods, trainers will sharpen their consulting skills, learn how to eliminate time wasters, clarify performance execution and outcome requirements, and—most important—satisfy the needs of clients. Full of evidence-based templates, strategies, assessments, and other tools, *Aligning Training for Results* communicates a foundation of concepts and principles, and a systematic process demonstrating how to create, sustain, and align training solutions to get business results.

If where an organization allocates its resources determines its strategy, why is it that so few companies actively manage the resource allocation process? "Optimizing Corporate Portfolio Management: Aligning Investment Proposals with Organizational Strategy" goes beyond platitudes about why you should use corporate portfolio management (CPM) by offering a practical methodology to bring this powerful discipline to your organization. "Optimizing Corporate Portfolio Management" takes an expansive view of where CPM can be utilized by demonstrating that it can be used across any business line, product group or functional area, e.g., IT, R&D, innovation, marketing, salesforce, capital expenditure, etc. CPM is appropriate anywhere discretionary investments are being selected and executed. As a result, other terms used to describe portfolio management such as IT portfolio management, enterprise portfolio management, and project portfolio management are all merely subsets or slices of CPM. The book is written by Anand Sanwal, an expert on CPM, who has led American Express' CPM discipline (referred to as American Express Investment Optimization). American Express' CPM efforts are widely recognized as the most extensive, substantial and progressive deployment of CPM across any organization. Sanwal avoids academic theories and consultant jargon to ultimately deliver pragmatic and proven recommendations on how to make CPM a reality. The book features a foreword by Gary Crittenden, former CFO and EVP of American Express, and several case studies from leading financial services, technology, and government organizations utilizing CPM. Additionally, the book has received significant praise from thought leaders at Google, HP, American Express, The CFO Executive Board, Gartner, Accenture Marketing Sciences, The Wharton School of Business and many others.
