'When people gave up on Wylie, Wylie refused to give up on people.' For a street dog born in the city of Kandahar, Afghanistan, to be crowned top dog at Scruffts, a competition for crossbreeds held during Crufts, the largest dog show on earth, is

nothing short of a miracle. But for Wylie, the gentle, cropped eared ball of fur, miracles seemed to happen quite regularly. Beaten and abused while being used as a bait dog, Wylie suffered terrible injuries that needed urgent treatment.

Rescued close to death, with hacked off ears and a severed tail, he was attended to by soldiers who feared he would not last the night. Astonishingly he did, only to return days later with new injuries. However a lifeline came when he was handed over

to animal welfare Charity Nowzad and flown to Britain in the hope of finding a new life. But would anyone take a chance on a seemingly nervous and undomesticated stray? Luckily for Wylie his biggest adventure yet was about to begin...

This is the incredible and heart-warming story, full of tragedy and triumph, of a dog who never gave up hope. Reports of Cases Argued and Determined in the Supreme Court of the State of

Written for all lovers of fiction, *Lives of the Novelists* succeeds both as introduction and re-introduction, as Sutherland presents favorite and familiar novelists in new

Anchor Dr. Gabriella Mondini, a strong-willed, young Venetian woman, has followed her father in the path of medicine. She possesses a singleminded passion for the art of physick, even though, in 1590, the male-dominated establishment is reluctant to accept a woman doctor. So when her father disappears on a mysterious journey, Gabriella's own status

in the Venetian medical society is threatened. Her father has left clues--beautiful, thoughtful, sometimes torrid, and often enigmatic letters from his travels as he researches his vast encyclopedia, *The Book of Diseases*. After ten years of missing his kindness, insight, and guidance, Gabriella decides to set off on a quest to find him--a daunting journey that will take her through great university cities, centers of medicine, and remote villages across Europe. Despite setbacks, wary strangers, and the menaces of the road, the young doctor bravely follows the clues to her lost father, all while taking notes on maladies and treating the ill to

supplement her own work. Gorgeous and brilliantly written, and filled with details about science, medicine, food, and madness, **THE BOOK OF MADNESS AND CURES** is an unforgettable debut. *The Politics of the Canoe* Penguin

For the first time, the Cambridge Analytica whistleblower tells the inside story of the data mining and psychological manipulation behind the election of Donald Trump and the Brexit referendum, connecting Facebook, WikiLeaks, Russian intelligence, and international hackers. “Mindf*ck demonstrates how digital influence operations, when they converged with the nasty business of

politics, managed to hollow out democracies.”—The Washington Post

Mindf*ck goes deep inside Cambridge Analytica’s “American operations,” which were driven by Steve Bannon’s vision to remake America and fueled by mysterious billionaire Robert Mercer’s money, as it weaponized and wielded the massive store of data it had harvested on individuals—in excess of 87 million—to disunite the United States and set Americans against each other. Bannon had long sensed that deep within America’s soul lurked an explosive tension. Cambridge Analytica had the data to prove it, and in 2016 Bannon had a

presidential campaign to use as his proving ground. Christopher Wylie might have seemed an unlikely figure to be at the center of such an operation. Canadian and liberal in his politics, he was only twenty-four when he got a job with a London firm that worked with the U.K. Ministry of Defense and was charged putatively with helping to build a team of data scientists to create new tools to identify and combat radical extremism online. In short order, those same military tools were turned to political purposes, and Cambridge Analytica was born. Wylie’s decision to become a whistleblower prompted the largest data-crime investigation in

history. His story is both exposé and dire warning about a sudden problem born of very new and powerful capabilities. It has not only laid bare the profound vulnerabilities—and profound carelessness—in the enormous companies that drive the attention economy, it has also exposed the profound vulnerabilities of democracy itself. What happened in 2016 was just a trial run. Ruthless actors are coming for your data, and they want to control what you think.

A woman receives an unexpected visitor during a deadly snowstorm in this chilling thriller from New York Times bestselling author Heather Gudenkauf. True crime writer Wylie Lark doesn't mind being snowed in at the isolated farmhouse where she's retreated to write her new book. A cozy fire, complete silence. It

would be perfect, if not for the fact that decades earlier, at this very house, two people were murdered in cold blood and a girl disappeared without a trace. As the storm worsens, Wylie finds herself trapped inside the house, haunted by the secrets contained within its walls—haunted by secrets of her own. Then she discovers a small child in the snow just outside. After bringing the child inside for warmth and safety, she begins to search for answers. But soon it becomes clear that the farmhouse isn't as isolated as she thought, and

someone is willing to do anything to find them. And don't miss these other great stories by Heather! The Weight of Silence These Things Hidden Little Mercies Missing Pieces Not a Sound Before She Was Found This is How I Lied

The Future Plans of College

Women Penguin Mapping with Words re-conceptualizes settler writing as literary cartography. The topographical descriptions of early Canadian settler writers generated not only picturesque and sublime landscapes, but also verbal maps. These worked to orient readers,

reinforcing and expanding the cartographic order of the emerging colonial dominion. Drawing upon the work of critical and cultural geographers as well as literary theorists, Sarah Wylie Krotz opens up important aesthetic and political dimensions of both familiar and obscure texts from the nineteenth century, including Thomas Cary's *Abram's Plains*, George Monro Grant's *Ocean to Ocean*, and Susanna Moodie's *Roughing it in the Bush*. Highlighting

the complex territoriality that emerges from their cartographic aesthetics, Krotz offers fresh readings of these texts, illuminating their role in an emerging spatial imaginary that was at once deeply invested in the production of colonial spaces and at the same time enmeshed in the realities of confronting Indigenous sovereignties. *The Southeastern Reporter* New York Review of Books Following the pack and doing what you are told
