Where did we come from? Where are we going? How can we get there? Who is God? What is God like? To what extent can God be known? Are beliefs influenced by our experiences? Are experiences shaped by our beliefs? How is the superstring field theorized by modern physicists related to us, the universe, and the Creator? Are there higher states of human consciousness? Can faith and science provide certain answers? Have we abolished wonder, mystery, and play? The nature of God puzzles me. From one perspective, God appears transcendental, beyond my experience, distant, up in heaven. From another perspective, God is intimate, personal, imminent, and to be found within me. Is there only one God? These questions and others have intrigued me on my spiritual journey. My Catholic education helped me to identify and clarify them. Three master's degrees and a doctorate in physiology helped me to appreciate research methods and to explore secrets

of living systems. Travels on three continents brought me into contact with people and traditions of other cultures. I became a teacher of the Transcendental Meditation program founded by Maharishi Mahesh Yogi. I lived under his direct guidance and taught Maharishi Vedic Science. Surviving acute sicknesses, chronic illness, and a car accident helped me to develop a dearer appreciation for human kindnesses and the power, mystery, and unconditional love of the Creator. Sunrises, seashells, stars, and seasonal changes became extraordinary wonders of nature I no longer wished to ignore. I reflected on God's omnipresence, intelligence, and bliss. Life tutored me in lessons of the heart. I honor all of the stepping-stones on my journey. In *Craving the Creator*, I share with you in prose and verse some of my experiences, inquiries, and insights. I offer them as food for thought to promote discussion, spark clarification, and enhance my personal growth and yours. Bon appétit!

Following the success of the bestselling *Clean Gut* and *Wheat Belly* comes this essential guide to improving digestive health from an expert in functional medicine—who reveals why everything that ails us, from fatigue to weight gain to bloating and bad skin, can be traced back to the gut, and shares his cleansing plan to help us reclaim our health. Dr. Vincent Pedre understands gut problems firsthand. He suffered from IBS for years before becoming an expert in functional medicine and learning how to heal his body from the inside. Dr. Pedre used his own experience to develop *The Gut C.A.R.E. Program*—an approach that draws from both Western and Eastern methodologies, combining integrative and functional medicine—that has a proven success record in his private practice in New York. Now, for the first time, Dr. Pedre makes his revolutionary plan for health and wellness available to everyone. *Happy Gut* takes readers step-by-step through Gut C.A.R.E.—Cleanse, Activate, Restore, and Enhance—which eliminates food triggers, clears the gut of unfriendly pathogens, and replaces them with healthy probiotics and nutrients that repair and heal the gut. Rather than masking symptoms with medication, he shows us how to address the problem at its core to restore the gastrointestinal system to its proper functioning state. By fixing problems in the gut, followers of Dr. Pedre ' s program have found that their other health woes are also cured and have lost weight, gained energy, and improved seemingly unrelated issues, such as seasonal allergies, in addition to eliminating their chronic muscle and abdominal pain. Complete with recipes and meal plans including gluten-free, low-fat, and vegetarian options, a 28-day gut cleanse, yoga postures to help digestion, and testimonials from many of his patients, *Happy Gut* will help you feel better and eliminate gut issues for life.

February 2007, a landmark clinical study by researchers at Harvard University was published in Biological Psychiatry and was soon picked up widely by the media. A survey of 3,000 participants found that 2.8 percent of them suffered from binge eating disorder (BED); that women were twice as likely to report binge eating; and that BED occurs across the age span, from children to the elderly. By extrapolating the statistics to the general population, health professionals estimate 5,250,000 American women and 3,000,000 men suffer from binge eating. The same month the study was published Jane Brody revealed in the New York Times that when she was a 23 years old, her food binges were so extreme that "Many mornings I awakened to find partly chewed food still in my mouth...." Cynthia Bulik, director of the UNC Eating Disorders Program, is a foremost authority on binge eating. BED can affect anyone, and can be caused by brain chemistry, genetic predisposition, psychology, and cultural pressures--but none of those triggers make giving in to food cravings inevitable. Crave helps readers understand why they crave specific foods, recognize their individual triggers, and modify their responses to those triggers. Binge eating disorder is highly treatable; 70% to 80% of patients at the UNC Eating Disorders Program triumph over their binge eating by using techniques to "curb the crave". Through the stories of some of these patients--men and women, young and old--and with the guidance of Bulik, readers will develop a variety of strategies to use in conquering their cravings and establishing healthy eating habits.
