Blind Career Examination Passbooks Anyone with financial responsibility for a company needs to

understand his or her liability, how to protect against wrongdoing, and how to proceed when implicated. Companies are

---

required to file accurate information reports and obey regulations designed to protect the public. In recent years, failure to comply with securities regulations has destroyed several prominent companies and implicated their executives. Securities Law Claims provides a complete and current examination of legal matters in the securities market from the perspective of an issuing company. This clearly written, issue-spotting guide combines a foundation for understanding securities law concepts with enough detail to begin an action plan at any stage from securities issue to prosecution. It is a must-read for any executive, board member, or trustee.

Covered in this volume: - Shareholder derivative actions - SEC enforcement - Increased responsibility of Boards of Directors under Caremark and Sarbanes-Oxley - State Securities and Blue Sky Laws - Managing company communications before and during litigation, including a discussion of privilege.

Today, alongside its all-important operations in direct support of the Global War on Terrorism, naval aviation also continues its now 60-year commitment to shaping the maritime and

littoral environment through persistent forward presence. In the longer term, naval aviation is also adapting to a series of geopolitical revolutions which will dramatically increase the future demand for a secure sea base capable of projecting dominant power ashore in wartime against the full spectrum of possible opponents. It is adapting to these demands by exploiting technologies and operational practices developed in the last decade that will greatly

increase its ability to surge and concentrate forces rapidly; protect the sea base from new air, surface, and undersea threats; and find, identify, locate, track, and strike mobile as well as fixed targets ashore, under all weather conditions, and in timely enough fashion to produce the desired effects. This report discusses the following topics: (1) Formal Alliances Provide Predictable Access, Informal Coalitions Do Not; (2) Distributed Ground Forces Require Persistent, Distributed Air

around the world, Toyota consistently makes the highest-quality cars with the fewest defects of any competing manufacturer, while using fewer man-hours, less on-hand inventory, and half the floor space of its competitors. The Toyota Way is the first book for a general audience that explains the management principles and business philosophy behind Toyota's worldwide reputation for quality and reliability. Complete with profiles of organizations that have successfully adopted Toyota's principles, this book shows managers in every industry how to improve business processes by:  
Eliminating wasted time and resources  
Building quality into

workplace systems

Masters Theses in the Pure and Applied Sciences was first conceived, published, and disseminated by the Center for Information and Numerical Data Analysis and Synthesis (CINDAS) \*at Purdue University in 1957, starting its coverage of theses with the academic year 1955. Beginning with Volume 13, the printing and dissemination phases of the activity were transferred to

University Microfilms/Xerox of Ann Arbor, Michigan, with the thought that such an arrangement would be more beneficial to the academic and general scientific and technical community. After five years of this joint undertaking we had concluded that it was in the interest of all concerned if the printing and distribution of the volume were handled by an international publishing house to assure improved service and broader dissemination. Hence, starting with Volume 18, Masters Theses in the Pure and Applied Sciences has been disseminated on a worldwide basis by Plenum Publishing Corporation of New York, and in the same year the coverage was

---

broadened to include Canadian universities. All back issues can also be ordered from Plenum. We have reported in Volume 20 (thesis year 1975) a total of 10,374 theses titles from 28 Canadian and 239 United States universities. We are sure that this broader base for theses titles reported will greatly enhance the value of this important annual reference work. The organization of Volume 20 is identical to that of past years. It consists of theses titles arranged by discipline and by university within each discipline. NBSIR. Springer Nature
