System Dynamics Greenleaf Book Group

This book is intended as a reference and a guide summarising and focusing on best practices when using intelligent techniques and building systems requiring a degree of adaptation and intelligence. It is therefore not intended as a collection of the most recent research results but a practical guide for experts from other areas and industrial users who are interested in building solutions to their problems using intelligent techniques. One of the main issues covered is an attempt to answer the question of how to select and/or combine suitable intelligent techniques from a large pool of potential solutions. Another attractive feature of the book is that it brings together experts from neural network, fuzzy, machine learning, evolutionary and hybrid systems communities who will provide their views on how these different intelligent technologies have contributed and will contribute to creation of smart adaptive systems of the future. An integration of these communities has been one of the main goals of the European Network of Excellence on Smart Adaptive Systems (EUNITE) within which the idea

of compiling such a volume has originated. Over three years of various EUNITE activities focusing on issues of adaptation and intelligent behaviour of computing and engineering systems has also led to posing the question which is the title of this book: Do smart adaptive systems exist?

This book is the first systematic analysis of the efforts of a broad range of contemporary far-right thinkers to popularize their critiques of liberal-democratic norms and institutions and make their ideas the subjects of sustained political and academic debate. The book focuses on outspoken thinkers in western and eastern Europe, Russia, the United States, Canada, and Australia. They include Alain de Benoist, Guillaume Faye, Götz Kubitschek, Pat Buchanan, Fróði Midjord, Jason Jorjani, contributors to the online magazine Quillette, and the elusive personality known as the Bronze Age Pervert. The book explores the diverse intellectual foundations of these thinkers' positions, the similarities and differences in their ideas, and their prospects for influencing attitudes about democratic politics within their respective countries. It examines diverse movements and schools of thought, including the European New Right, Paleoconservatism, the Alt-right, Identitarianism, White nationalism, and antifeminism.

Providing a much-needed global perspective, this book will be of considerable interest to students and scholars of populism, right-wing extremism, identity politics, fascism, racism, and conservatism.

The future of learning depends absolutely on the future of teaching. In this latest and most important collaboration, Andy Hargreaves and Michael Fullan show how the quality of teaching is captured in a compelling new idea: the professional capital of every teacher working together in every school. Speaking out against policies that result in a teaching force that is inexperienced, inexpensive, and exhausted in short order, these two world authorities--who know teaching and leadership inside out--set out a groundbreaking new agenda to transform the future of teaching and public education. Ideas-driven, evidence-based, and strategically powerful, *Professional Capital* combats the tired arguments and stereotypes of teachers and teaching and shows us how to change them by demanding more of the teaching profession and more from the systems that support it. This is a book that no one connected with schools can afford to ignore. This book features: (1) a powerful and practical solution to what ails American schools; (2) Action guidelines for all groups--individual teachers, administrators, schools and districts, state and federal leaders; (3) a next-generation update of core themes from the authors' bestselling book, "What's Worth Fighting for in Your School?" [This book was co-published with the Ontario Principals' Council.].

Accelerated Strategy Development and Execution
The company of today has its supply chains and finances stretched further around the globe than ever before while simultaneously having increasing pressures to drive value across a complicated and fluid set of metrics and deliver innovations, products, and services more quickly and reliably. The competitive advantage belongs to the companies that can quicken their vision-building and strategy-execution efforts—the ones that can identify challenges more swiftly and accelerate their decision making so they are better able to formulate and deploy responses decisively yet with greater agility. To successfully accomplish this, companies will have to prioritize creating a culture of leadership that strengthens communication skills and emphasizes systems thinking by building capacity and capability that cuts across the business smokestacks and permeates the entire organization. In State of Readiness, Joseph F. Paris Jr. shares over thirty years of international business and operations experience and guides C-suite executives and business-operations and -improvement specialists on a path toward operational excellence, the organizational capability and

situational awareness that is attained as the enterprise reaches a state of alignment for pursuing its strategies. In doing so, create a corporate culture that is committed to the continuous and deliberate improvement of company performance and the circumstances of those who work there—a precursor to becoming a high-performance organization.

Is there a common thread behind globalization, the EEC, and war in the Middle East? Why did we invade Iraq when the reasons given - weapons of mass-destruction and links with al-Qaeda - turn out to be wrong? Is it really the war on terror we should be most concerned about, or are we looking the wrong way? Nicholas Hagger places these events in the context of the last 100 years, and in doing so provides a controversial and challenging re-reading of history. From the Russian revolution to the present day it is money and oil that have driven events, rather than random individual acts of evil and aggression on the one hand, or the pursuit of liberty and democracy on the other. And behind these events there is a pattern, an inexorable drive to world government. Behind the pattern there are shadowy interests and organisations that undermine the integrity of nation-states and threaten to usher in a new and frightening era.

Rethinking the French New Right Teachers College Press

At the beginning of the twenty-first century, both the crisis of liberal democracy, as visible in, for example, the rise of far-right actors in Europe and the United States, and environmental crises, from declining biodiversity to climate change, are increasingly in the public spotlight. Whilst both areas have been analysed extensively on their own, *The Far Right and the Environment: Politics, Discourse and Communication* provides much-needed insights into their intersection by illuminating the environmental communication of far-right party and non-party actors in Europe and the United States. Although commonly perceived as a 'left-wing' issue today, concerns over the natural environment by the far right have a long, ideology-driven history. Thus, it is not surprising that some members of the far

right offer distinctive ecological visions of communal life, though, for example, climate-change scepticism is at times voiced too.

Investigating this range of stances within their discourse about the natural environment provides a window into the wider politics of the far right and points to a close connection between the politics of identity and the imagination of nature. Connecting the fields of environmental communication and study of the far right, contributions to this edited volume therefore offer timely assessments of this often-overlooked dimension of far-right politics.

Students at the Center Springer

This book focuses on the philosophy, politics and impact of the 'New Right' which originated in France and has since influenced activism, ideology and policy in a number of European countries. This book explores the idea that revolutionaries do not necessarily need to come from the left, nor use arms in order to overturn liberal democracy. In the post-World War Two era, the extremists of the revolutionary right took three different paths: 1) parliamentary; 2) extra-parliamentary; and 3) metapolitical. The New Right (*nouvelle droite* – ND in France) took the metapolitical path, but that did not mean it abandoned its revolutionary desire to smash liberal democracy throughout Europe. The book examines four interpretations of the New Right. These interpretations include the following: 1) The New Right as a fascist or quasi-fascist movement; 2) The New Right as a challenge to the traditional right-left dichotomy, which has structured European political debates for more than 200 years; 3) The New Right as an alternative modernist movement, which rejects liberal and socialist narratives of modernity; accepts the technical but not political or cultural effects of modernity; and longs for a pan-European political framework abolishing liberal multiculturalism and privileging ethnic dominance of so-called original Europeans; and 4) The New Right as a variant of political religion and conversionary processes. The book concludes by analysing the positions, cultural and political impact, and relationship

to democracy of the New Right. This work will be of great interest to students and scholars of racism, fascism, extremism, European politics, French politics and contemporary political theory.

The Teacher of Generation Alpha Routledge

The Port Arthur massacre on 28 April 1996, when 35 people were shot dead by Martin Bryant, transformed Australia's gun control debate.

Public outrage drove politicians from all sides of politics to embrace gun control. Non-violent 'people power' galvanised government resolve to outlaw semi-automatic weapons, register all guns and tighten gun ownership laws. Simon Chapman's book gives an insider's view of the struggle for gun control, highlighting the public discourse between shooters determined to preserve the right for civilians to bear military-style weapons, and activists dedicated to getting Australia 'off the American path' of gun violence.
