Long-Term Athlete Development describes how to systematically develop sporting excellence and increase active participation in local, regional, and national sport organizations. This resource describes the long-term athlete development (LTAD) model, an approach to athlete-centered sport that combines skill instruction with long-term planning and an understanding of human development. By learning about LTAD, sport administrators and coaches will gain the knowledge and tools to enhance participation and

improve performance and growth of athletes. This text offers the first in-depth and practical explanation of the LTAD model. Long-Term Athlete Development integrates current research on talent development and assessment into practice to help sport leaders plan athletic development across the life span or design detailed programs for a particular group, including those with physical and cognitive disabilities. Authors Balyi, Way, and Higgs—pioneers and veteran LTAD facilitators—critique current talent development models, discuss the limitations of the LTAD model, and demonstrate the benefits of LTAD

as a new approach. By integrating knowledge of these models, readers are able to analyze their own programs and take steps to improve sport and coaching philosophies and reach adherence and performance goals. Explanations and visuals of concepts help readers understand the state of knowledge in talent identification and long-term athlete development. Chapter-opening vignettes offer examples of how the LTAD model can be used to alleviate common issues. Listings at the end of each chapter offer sources for further study, and reflection questions guide readers in applying the content. The text

offers a logical presentation of current research:

- Key factors that guide and shape the LTAD model, such as physical literacy, the differences between early- and late-specialization sports, and variations in trainability across the life span
- Information on the time needed to develop excellence in sport and how periodization of training is related to the developmental stage of the athlete
- The seven stages of LTAD, from development of fundamental movement skills to training for elite competition and the transition to lifelong physical activity
- Considerations in the development of optimal programs

for participants passing through each of the seven stages Long-Term Athlete Development is an essential guide to improving the quality of sport, developing high-performance athletes, and creating healthy, active citizens. It offers parents, coaches, and sport administrators a deeper understanding of the LTAD model, helping them create an enjoyable, developmentally appropriate environment for both competitive athletes and enthusiastic participants.

Olympic rowers Gary and Paul

O ' Donovan may be the face of Irish rowing and Skibbereen Rowing Club, and have enormously increased the popularity of rowing in Ireland, but they're just one piece of a much larger jigsaw. Without their club and the people behind the scenes, they wouldn ' t be Olympic silver medalists, 2018 world champions, former European champions and, in Paul's case, a three-time world champion. Almost one hundred Skibbereen Rowing Club athletes have represented Ireland at various regattas over the years; a staggering figure when viewed in light of the size of the club. Founded in 1970, it is now the undisputed most successful rowing club in the country, producing five Olympic rowers since 2000 and four world champions between 2016

and 2018. It is the characters involved in the club, the coaches, members and the athletes themselves, who come together to make Skibbereen Rowing Club what it is. *Something in the Water* reveals what goes on behind the scenes to create an environment that allows locals to excel on the national and international stages. The story is told through the people and families involved, showing how relatable they are to people around the country.

name a few will rattle off a remarkably similar list of name plates: Jaguar, Corvette, Triumph, MG, Aston Martin, Ferrari, Lotus, Alfa-Romeo, BMW. Pressed harder, more exotic and obscure brands will emerge: DB, Alpine, Bugatti, Lancia. Sports cars have offered road and track excitement for nearly 100 years.
