xxxxx proposes a radical, new space for artistic exploration, with essential contributions from a diverse range of artists, theorists, and scientists. Combining intense background material, code listings, screenshots, new translation, [the] xxxxx [reader] functions as both guide and manifesto for a thought movement which is radically opposed to entropic contemporary economies. xxxxx traces a clear line across eccentric and wide ranging texts under the rubric of life coding which can well be contrasted with the death drive of cynical economy with roots in rationalism and enlightenment thought. Such philosophy, world as machine, informs its own deadly flipside embedded within language and technology. xxxxx totally unpicks this hiroshimic engraving, offering an dandyish alternative by way of deep examination of software and substance. Life coding is primarily active, subsuming deprecated psychogeography in favour of acute wonderland technology, wary of any assumed transparency. Texts such as Endonomadology, a text from celebrated biochemist and chaos theory pioneer Otto E. Roessler, who features heavily throughout this intense volume, make plain the sadistic nature and active legacy of rationalist thought. At the same time, through the science of endophysics, a physics from the inside elaborated here, a delicate theory of the world as interface is proposed. xxxxx is very much concerned with the joyful elaboration of a new real; software-led propositions which are active and constructive in eviscerating contemporary economic culture. xxxxx embeds Perl Routines to Manipulate London, by way of software artist and Mongrel Graham Harwood, a Universal Dovetailer in the Lisp language from AI researcher Bruno Marchal rewriting the universe as code, and self explanatory Pornographic Coding from plagiarist and author Stewart Home and code art guru Florian Cramer. Software is treated as magical, electromystical, contrasting with the tedious GUI desktop applications and user-led drudgery expressed within a vast ghost-authored literature which merely serves to rehearse again and again the demands of industry and economy. Key texts, which well explain the magic and sheer art of programming for the absolute beginner are published here. Software subjugation is made plain within the very title of media theorist Friedrich Kittler's essay Protected Mode, published in this volume. Media, technology and destruction are further elaborated across this work in texts such as War.pl, Media and Drugs in Pynchon's Second World War, again from Kittler, and Simon Ford's elegant take on J.G Ballard's crashed cars exhibition of 1970, A Psychopathic Hymn. Software and its expansion stand in obvious relation to language. Attacking transparency means examining the prison cell or virus of language; life coding as William Burrough's cutup. And perhaps the most substantial and thorough-going examination is put forward by daring Vienna actionist Oswald Wiener in his Notes on the Concept of the Bio-adaptor which has been thankfully unearthed here. Equally, Olga Goriunova's extensive examination of a new Russian literary trend, the online male literature of udaff.com provides both a reexamination of culture and language, and an example of the diversity of xxxxx; a diversity well reflected in background texts ranging across subjects such as Leibniz' monadology, the ur-crash of supreme flaneur Thomas de Quincey and several rewritings of the forensic model of Jack the Ripper thanks to Stewart Home and Martin Howse. xxxxx liberates software from the machinic, and questions the transparency of language, proposing a new world view, a sheer electromysticism which is well explained with reference to the works of Thomas Pynchon in Friedrich Kittler's essay, translated for the first time into English, which closes xxxxx. Further contributors include Hal Abelson, Leif Elggren, Jonathan Kemp, Aymeric Mansoux, and socialfiction.org.

As budgets tighten for school districts, a sound understanding of just how teaching and administration translate into student learning becomes increasingly important. Rebecca Barr, a researcher of classroom instruction and reading skill development, and Robert Dreeben, a sociologist of education who analyzes the structure of organizations, combine their expertise to explore the social organization of schools and classrooms, the division of labor, and the allocation of key resources. Viewing schools as part of a social organization with a hierarchy of levels—district, school, classroom, instructional group, and students—avoids the common pitfalls of lumping together any and all possible influences on student learning without regard to the actual processes of the classroom. Barr and Dreeben systematically explain how instructional groups originate, form, and change over time. Focusing on first grade reading instruction, their study shows that individual reading aptitude actually has little direct relation to group reading achievement and virtually none to the coverage of reading materials once the mean aptitude of groups is taken into consideration. Individual aptitude, they argue, is rather the basis on which teachers form reading groups that are given different instructional treatment. It is these differences in group treatment, they contend, that explain substantial differences in learning curricular material.

A "radical" approach to holistic healing that examines the root causes and cures for ailments such as Alzheimer's disease, breast cancer, and heart attacks • Offers cutting-edge detoxification and draining therapies to address the tremendous chemical onslaught of modern life • Explains the profound health problems caused by dental amalgams, vaccinations, antibiotics, cosmetics With the historic use of toxic mercury amalgam fillings, excessive courses of antibiotics, damaging childhood vaccines, and the many industrial pollutants and chemicals that have been spread into our air, water, and food over the past century, general holistic health guidelines are simply no longer adequate for most people. Only through radical measures--that is, getting to the true root or underlying cause of disease--can effective healing occur. In Radical Medicine, naturopathic physician Louisa Williams describes how to treat these and other modern-day "obstacles to cure," in order to ensure against future degenerative disease and achieve the optimal health that is our birthright. Examining the many health problems triggered by dental amalgams and poor dentistry, Dr. Williams explains that our teeth are focal points for health issues that arise elsewhere in the body. She explores the impact of vaccinations, the excessive use of antibiotics, and the chemical-laden products used as health and beauty aids--which are linked to Alzheimer's disease, heart attacks, and breast and other cancers--and provides information on cutting-edge detoxification treatments as well as drainage and nutritional therapies. A practical guide for practitioners and patients alike, Radical Medicine offers a wealth of holistic, natural therapies for overcoming what is poisoning us and our world so we can achieve optimal health and well-being.

In her new book, award-winning journalist Marci McDonald draws back the curtain on the mysterious world of the right-wing Christian nationalist movement in Canada and its many ties to the Conservative government of Stephen Harper. To most Canadians, the politics of the United States — where fundamentalist Christians wield tremendous power and culture wars split the country — seem too foreign to ever happen here. But The Armageddon Factor shows that the Canadian Christian right — infuriated by the legalization of same-sex marriage and the increasing secularization of society — has been steadily and stealthily building organizations, alliances and contacts that have put them close to the levers of power and put the government of Canada in their debt. Determined to outlaw homosexuality and abortion, and to restore Canada to what they see as its divinely determined destiny to be a nation ruled by Christian laws and precepts, this group of true believers has moved the country far closer to the American mix of politics and religion than most Canadians would ever believe. McDonald's book explores how a web of evangelical far-right Christians have built think-tanks and foundations that play a prominent role in determining policy for the Conservative government of Canada. She shows how Biblical belief has allowed Christians to put dozens of MPs in office and to build a power base across the country, across cultures and even across religions. "What drives that growing Christian nationalist movement is its adherents' conviction that the end times foretold in the book of Revelation are at hand," writes McDonald. "Braced for an impending apocalypse, they feel impelled to ensure that Canada assumes a unique, scripturally

ordained role in the final days before the Second Coming — and little else.” The Armageddon Factor shows how the religious right’s influence on the Harper government has led to hugely important but little-known changes in everything from foreign policy and the makeup of the courts to funding for scientific research and social welfare programs like daycare. And the book also shows that the religious influence is here to stay, regardless of which party ends up in government. For those who thought the religious right in Canada was confined to rural areas and the west, this book is an eye-opener, outlining to what extent the corridors of power in Ottawa are now populated by true believers. For anyone who assumed that the American religious right stopped at the border, The Armageddon Factor explains how US money and evangelists have infiltrated Canadian politics. This book should be essential reading for Canadians of every religious belief or political stripe. Indeed, The Armageddon Factor should persuade every Canadian that, with the growth of such a movement, the future direction of the country is at stake.

There is a growing sense of crisis in rural ways of life, which manifests itself in economic decline, depopulation, depleted environments, and a crisis of rural identities. Crime is one potent marker of crisis, the more so as it spoils the image of healthy, cohesive community. The social reaction it elicits, the policing of this 'other rural', is also a guide to the dimensions of crisis. The social sciences have witnessed a renewed international interest in the study of 'other rurals': the neglected, invisible or excluded aspects of country life. This book brings a fresh approach to the study of crime that challenges the urban-centric assumptions of much western criminology and sociology. It explores rural crime and social reactions to it, in relation to processes and patterns of community formation and change in rural Australia, including the social, economic, cultural and political forces shaping the history, structure and everyday life of rural communities. Policing the Rural Crisis is based on five years of extensive original empirical research in rural and regional Australia. It draws on ideas and debates in contemporary social theory across several disciplines, making the analysis relevant to the study of crime and social change elsewhere.

With more than two hundred straightforward, nutrient-dense, and appealing recipes, The Heal Your Gut Cookbook was created by GAPS Diet experts Hilary Boynton and Mary G. Brackett to help heal your gut and to manage the illnesses that stem from it. Developed by pioneering British MD Dr. Natasha Campbell-McBride, who provides the book’s Foreword, Gut and Psychology Syndrome (GAPS) refers to disorders, including ADD/ADHD, autism, addictions, depression, and obsessive-compulsive disorder, stemming from or exacerbated by leaky gut and dysbiosis. GAPS also refers to chronic gut-related physical conditions, including celiac disease, rheumatoid arthritis, diabetes type one, and Crohn’s disease, as well as asthma, eczema, allergies, thyroid disorders, and more. An evolution of the Specific Carbohydrate Diet, the GAPS Diet will appeal to followers of the Paleo Diet, who are still struggling for optimum health, as well as anyone interested in the health benefits of fermentation or the Weston A. Price approach to nutrition. In The Heal Your Gut Cookbook, readers will learn about the key cooking techniques and ingredients that form the backbone of the GAPS Diet: working with stocks and broths, soaking nuts and seeds, using coconut, and culturing raw dairy. The authors offer encouraging, real-life perspectives on the life-changing improvements to the health of their families by following this challenging, but powerful, diet. The GAPS Diet is designed to restore the balance between beneficial and pathogenic intestinal bacteria and seal the gut through the elimination of grains, processed foods, and refined sugars and the carefully sequenced reintroduction of nutrient-dense foods, including bone broths, raw cultured dairy, certain fermented vegetables, organic pastured eggs, organ meats, and more. The Heal Your Gut Cookbook is a must-have if you are following the GAPS Diet, considering the GAPS Diet, or simply looking to improve your digestive health and—by extension—your physical and mental well-being.

This brutally honest, open, and real love story, wrapped around research, unfolds over four decades. Full of surprises, heartaches, and joy, it sheds light on the innermost feelings of a family coming to grips with autism. But there is more to this story. Jimmy's doctors, pastors, friends, and countless others share their insights as well. While this family's journey is full of challenges, it's far from tragic. And in each chapter, bits of new research show that this family is not at all unique. Like many affected by autism, family members struggle to cope and bounce back, and eventually learn to come together and do what they can to change the world in which they live; a world that can be misinformed and judgmental. As one reviewer wrote, "the book and Jimmy give hope that autistic individuals and their families cannot only survive, they can thrive." "Dr. Bucher, with his remarkable family, does more than share his family's experiences. He deftly illustrates their innermost feelings; he draws me into their world. This book should not only be read by parents and educators of children with autism, it should be read by anyone who has the desire to truly understand the joys and the challenges faced by families affected by autism. The Buchers exemplify the journey faced by all such families." --Bill Moss, Executive Director of The Linwood Center (see [www.linwoodcenter.org](http://www.linwoodcenter.org)) "When I was little, people would ask me about my family and whether I had any brothers or sisters. I would answer, 'I have a mommy, a daddy, a sister, and a Jimmy.'" I said this because he is not your everyday brother who picks on you and puts gum in your hair. He buys me presents and gives me hugs and kisses, and when I was little he sang to me.' --the sister (Suzy)

My Journey We've all got a few demons inside us, Some that walk beside us, Some that fight us, They all try to find us, Some to control us and ride us, But we're the ones that are riding, Down this path, Who begin slipping and gliding, It's frightening when we become blinded and can't see a way out, I couldn't find him, The boy that I used to call Ed, He led me into the dark, Made me temporarily dead, Now his temper is dead, And so is he, So, goodbyes must be said, I won't cry, But my head is leaking, My thoughts keep on seeping, Into these poems, Some obvious, Some discretely, Some slowly, Some quickly, Some funny, Some sick themes, Because what I went through was sickening, I'll start with topics that are rather dark, Suicidal thoughts, Self-harm, One broken heart, Delusions about noughts, Anger that's calm, And all the other things that left marks, Both physical and mental, I was typically mental, I became temperamental, And my temper became mental, Only calmed by instrumentals, My Instagram went mental, Posting pics in the shower, Retweeting anything and everything for hours, I'd forgotten I was a coward, But it took all of this for me to blossom and flower, I thought I had powers, And thought I could wow crowds, But today will I wow crowds, With a poem about dark clouds, And drugs, And violence, And everything violet, That colour kept me silent, Brought me peace, I couldn't fight it, Now I write and like it, And type things, About how life felt when I was psychotic, That's my new topic, Why? Because I can't top it, In the summer of 2016, I couldn't stop it, My brain was moving faster than a 214-ton rocket, But I still don't want to crop it out, Because why would I want that to happen, It gives me something to talk about, Helps me with my rapping, Helps me find my passion, That I know I'm not lacking, Because I wasn't acting, I was simply extracting, Everything negative that I was attacking, So my mind began battling, It was baffling, But to tell you the end of this little story, It's not like the rest it's actually quite boring, But it's beautiful like the scars that used to be sore, And the things that distressed me that now give me glory, Like my book, Just look, And you'll see someone who took, All the pain that they felt, Rearranged it and shook, It around until it looked, Something like the person you see today, Who can finally say, I'm more than just... Okay. Life Is Worth Living x
