Draft Horses and Mules

Human Kinetics Publishers
"This is a follow-up volume to Gracie's Spring Wildflowers of the Northeast. This new book treats 35 species of summer blooming wildflower some common, others less so concentrating on each species

life history and, in the same manner as the earlier book, providing intriguing insights into the biology, ecology, folklore, and, where relevant, ethno-botany of each flower. Each species account is richly illustrated with a range of color photos"--

A Guide to Backcountry Skiing in New Hampshire's Presidential Range

Storey Publishing

Is your child getting lost in the system, becoming bored, losing his or her natural eagerness to learn? If so, it may be time to take charge of your child's education—by doing it yourself. The Well-Trained Mind will instruct you, step by step, on how

to give your child an academically rigorous, comprehensive education from preschool through high school—one that will train him or her to read, to think, to understand, to be well-rounded and curious about learning. Veteran home educators Susan Wise Bauer and Jessie Wise outline the classical pattern of education called the trivium, which organizes learning around the maturing capacity of the child's mind and comprises three stages:

the elementary school “grammar stage,” when the building blocks of information are absorbed through memorization and rules; the middle school “logic stage,” in which the student begins to think more analytically; and the high-school “rhetoric stage,” where the student learns to write and speak with force and originality. Using this theory as your model, you’ll be able to instruct your child—whether full-time or as a supplement to classroom education—in all levels of reading, writing, history, geography, mathematics, science, foreign languages, rhetoric, logic, art, and music, regardless of your own aptitude in those subjects. Thousands of parents and teachers have already used the detailed book lists and methods described in *The Well-Trained Mind* to create a truly superior education for the children in their care. This extensively revised fourth edition contains completely updated curricula and book lists, links to an entirely new set of online resources, new material on teaching children with learning challenges, cutting-edge math and sciences recommendations, answers to common questions about home education, and advice on practical matters such as standardized testing, working with your local school board, designing a high-school program, preparing transcripts, and

applying to colleges. You do have control over what and how your child learns. The Well-Trained Mind will give you the tools you'll need to teach your child with confidence and success.

Often credited as the "birthplace of extreme skiing" in North America, the steep gullies of the Presidential Range have inspired east coast skiers for more than a century. As the sport continues to grow in popularity, the need for a

definitive guidebook has presented itself. This is the first guidebook to focus solely on backcountry skiing in the Presidential Range, giving these iconic mountains the attention they deserve. While Tuckerman Ravine and the east side of Mount Washington serve as the focal point to this guide, other lesser explored areas throughout the range are also featured-some of them in writing for the first time ever. Inside are detailed descriptions of 91 different routes, spanning from King Ravine on the north side of Mount Adams down to the Webster Cliffs in Crawford Notch. Each area features

stunning aerial photography, detailed maps, approach information, inspiring action shots, and much more. This is without question the most comprehensive guide to backcountry skiing in the Presidential Range to date!

For the first time, the art and craft of creating concrete countertops is detailed, step-

by-step. This invaluable manual will guide craftsmen through each step of creating a cast concrete countertop, from the careful process of measuring for a template, to building a mold, through casting and installation. Moreover, you will be inspired by a gallery of more than 60 color images that explore actual kitchens and baths featuring hand-crafted countertops. With more than 30 years of experience in concrete art and fabrication, artist Buddy Rhodes shares his skills and experience in this tell-all book. Most importantly, he shares the process he pioneered for creating the natural, stone-like pressed surface countertops

that have become his hallmark. Additionally, he details techniques for hand-trowelled and polished countertop surfaces. As the popularity of concrete in home decor soars, this book will be an indispensable guide for any craftsman who hopes to make his mark in this expanding market. Amateurs alike will appreciate the intricate detail and the helpful hints that Rhodes includes in this comprehensive guide.
